

University Study Rejects Contributory Retirement; Asks Cost-Of-Living Boosts

A COMMITTEE of University of Michigan professors has flatly rejected the suggested establishment of a contributory retirement system for the Armed Forces and has urged that the Services be given swift assurance that:

- No major changes are contemplated in the retirement system, and
- The purchasing power of retirement income "will be maintained through periodic cost-of-living increases."

The Michigan group, reporting the results of an independent study of the military retirement system ordered by the Senate Armed Services Committee, also ruled out the institution of penalties for early retirement.

Both the contributory retirement and penalty recommendations had been advanced by Senator John C. Stennis (D-Miss) who was instrumental in authorizing the study.

The University report, transmitted to the Senate Committee on 6 July, agreed with Senator Stennis that those who received a 6% increase under the 1958 Military Pay Act should not be allowed to recompute their retired pay on the basis of active duty rates.

The Committee failed to come to grips, however, with two important questions involved in the recomputation proposal, backed both by President Kennedy and former President Eisenhower. The report offers no opinion as to whether the Government was morally justified in abandoning the traditional practice of basing retired pay on active duty pay, nor does it attempt to rationalize the disparities in retired pay accorded those retired immediately before and immediately after passage of the 1958 Act.

In other recommendations, the Michigan group, headed by Doctor Carl H. Fischer, Professor of Actuarial Mathematics and Insurance, urged:

- 10-year retirement for short-term "career" officers.
- Modification of 20-year retirement to permit retention of certain "technical"

Gen. Burns Honored

Lt. GEN. Robert W. Burns, USAF (left) receives the Legion of Merit from Admiral Harry D. Felt, Pacific, commander-in-chief, Pacific, in ceremonies at Camp Smith, Hawaii, Admiral Felt acted for General Emmett O'Donnell, Jr., commander-in-chief, Pacific Air Forces, who was away. General Burns commanded PACAF's Fifth Air Force for the past three years. He returns to Washington for assignment as Chairman, Inter-American Defense Board.

Congress Acts On Air Force Promotion Bill, Army MSC Plan, Naval ROTC Measure

THE House has passed and sent to the Senate the Officer Grade Limitations Act amendment giving the Air Force 4800 additional promotion slots for lieutenant colonel.

The action highlighted a number of Capitol Hill developments on the military legislative program following the Fourth of July Congressional recess.

In the Senate, the Navy bill requiring ROTC graduates to seek release from active duty in the same manner as Annapolis graduates was cleared for the President's signature along with several veterans' bills.

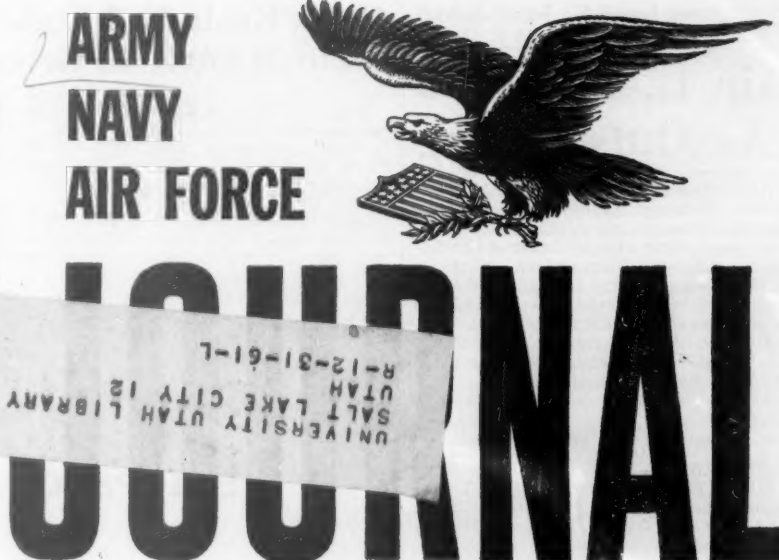

The Senate Military Appropriations Subcommittee on 10 July opened the final

phase of the Defense Department budget hearings and announced plans to complete action on the bill by the 22d.

In the House, the measure overhauling the so-called Hiss Act and removing bars to military retired pay came up for vote on 11 July but was temporarily set aside. It was brought up again the next day and passed.

The House Armed Services Committee at the same time sent eight more military bills to the House floor where the Air Force proposal to institute accrual flight pay was still pending.

Measures approved by the House Committee on 11 July include the Army pro-

Committee Frowns On Recomputation; Suggests Cost-Of-Living Extension

THE University of Michigan Study Committee has concluded that Congress acted wisely in 1958 when it abandoned the traditional practice of relating retired military pay to the active duty pay scales.

At the same time, in a letter to Chairman Richard B. Russell (D-Ga.) of the Senate Armed Services Committee, Sec-

retary of Defense McNamara reiterated his plea for recomputation legislation.

The recomputation pay bill has been backed by both President Kennedy and former President Eisenhower.

In supporting the 1958 Congressional action, the University group said the cost-of-living method of increasing re-

Renovate House For JCS Chief

THE Army, at a cost of \$105,459, is renovating a set of quarters at Ft. Myer, Va., for the Chairman of the Joint Chiefs of Staff.

Scheduled for completion by Christmas Day, the house will be the first set aside exclusively for the use of the JCS Chairman and his successors since the establishment of the JCS during WW II.

Present JCS Chairman, General Lyman L. Lemnitzer, will move to the house—Ft. Myer's Quarters No. 6—later this year from his present residence at Quarters No. 1.

Traditionally the home of the Army Chief of Staff, Quarters No. 1 will be turned over to Army CofS General George Decker, General Decker and his family have been living at Ft. McNair, Washington, D. C., since he took over the top Army post.

According to present Army plans, the renovated house for General Lemnitzer will have 14 rooms, two less than at present, after remodeling is completed. A dining room and sun porch are being added to the present structure, the Army said.

Renovation of Quarters No. 6 began 29 June, the Army said in response to inquiries, and "will be completed by December 25, 1961."

The work is being done by Nicholson & Boyles Company of Merrifield, Va., the lowest of five bidders.

"Army Engineers, responsible for supervision of the renovation, said the cost of the work was considerably less than the cost of new quarters of similar size and quality," an Army spokesman said.

Air U. Picks 30 As Outstanding

Air University, Maxwell AFB, Ala., has named 30 recent graduates of two AU schools as outstanding students.

Of these, four were students of the Advanced Logistic Course at the Institute of Technology during the period 6 Sept. 1960 to 1 June 1961, and 26 were students of the War College Class of 1961.

Each outstanding student has received a letter of commendation which has been indorsed by the commander, AU.

Honored are:

Institute of Technology

AIR FORCE—Maj. Donald Y. Huff, Eastern Traffic Region, Military Traffic Management Agency, Pittsburgh 22, Pa., and Maj. Arthur F. Williams, Dayton AF Depot, Gentile AF Station, Dayton, Ohio.

NAVY—LCdr. Thomas J. Paolowski, jr., Bureau of Supplies & Accounts.

CIVILIAN—Carl E. Trimble, Central Intelligence Agency.

War College

AIR FORCE—Col. William H. Best, jr., Hq, 4th Weather Gp, Andrews AFB, Md.; Col. Heath Bottomly, Director of Plans, DCS/P&P; Col. Theodore S. Coberly, Wright-Patterson AFB, Ohio; Col. John M. Cutler, War College, Maxwell AFB, Ala.; Col. Carlton J. Wolf, MAAG, Det 6, USAF Section, Karachi, Pakistan; Lt. Col. Henson R. De Bruier, 1127th USAF Fld Activities Gp, Ft. Belvoir, Va.; Lt. Col. Fred Dietrich, Hq, AF Ballistic Missile Div., Inglewood, Calif.; Lt. Col. Harold R. Emerson, CinCPac Representative, Offutt AFB, Nebr.; Lt. Col. Frederick H. Fabringer, Office of the Secretary of the AF; Lt. Col. George E. French, jr., Office of Dir. of Procurement & Production, DCS/M; Lt. Col. Herbert G. MARINE CORPS—Lt. Col. Herman Poggemeyer, jr., Office of the Naval Attache, Box 49, Navy #100, c/o FPO, N. Y.

ROYAL CANADIAN AIR FORCE—Wing Cdr. Walter F. Davy, Director of Ground Training, Air Force Headquarters, Ottawa.

ROYAL AIR FORCE—Wing Cdr. Arthur Brown, NATO Standing Gp, The Pentagon.

CIVILIANS—David G. Boak, National Security Agency; E. Grant Meade, Information Agcy., and Ellwood M. Rabenold, jr., Department of State.

AF Contract Manager Wins First Star

Col. Gerald F. Keeling, Commander of the Western Contract Management Region at Mira Loma AFS, Calif., has been promoted to Brigadier General.

General Keeling, 46, is responsible for surveillance of all contracts administered by the Air Force in the 13 western states. Its present workload consists of 8,000 prime contracts with a face value of over \$23 billion.

General and Mrs. Keeling and their four-year-old son Richard reside at 104 Deborah Court, Upland, Calif.

Gens. Bush And Costello Named To Head MAAGs In Greece, Italy; Others Move

Maj. Gen. George E. Bush, Commanding General, VI U. S. Army Corps, Ft. Benjamin Harrison, Ind., will become Chief of the U. S. Military Assistance Advisory Group to Greece in October.

Maj. Gen. Normando A. Costello, Assistant Chief of Staff, G-3, U. S. Army Pacific, Hawaii, will become Chief of the U. S. Military Assistance Advisory Group to Italy in October.

Maj. Gen. Louis V. Hightower, Chief of Staff, Combined Military Planning Staff, Central Treaty Organization, Ankara, Turkey, has been reassigned as

Deputy Commanding General, Ryukus Command and IX U. S. Army Corps, Okinawa, effective in August.

Maj. Gen. Martin J. Morin, Chief, Joint United States Military Mission for Aid to Turkey, Ankara, Turkey, has been reassigned as Deputy Defense Advisor and Defense Representative, North Atlantic and Mediterranean Area, (DEFREPNA), Paris, France, effective in September.

Maj. Gen. John T. Snodgrass, Office Deputy Chief of Staff for Operations, Washington, D. C., has been reassigned

to Headquarters 1st Region, U. S. Army Air Defense Command, Ft. Totten, N. Y., effective in August. General Snodgrass previously had been scheduled to assume duties with the 2d Region in July, but a reorganization within the Air Defense organization shifted the functions involved to the New York headquarters.

Col. John A. Beall, jr., Special Assistant to the High Commissioner, Ryukus Islands, Okinawa, nominated by the President for promotion to the grade of brigadier general, has been reassigned to Camp Irwin, Calif., effective in October.

Brig. Gen. Philip H. Bethune, U. S. Army Attache to Mexico, will be retired 31 July.

SHIPS ON A SIMULATED SEASCAPE

CHANGE COURSE WITH C

Sec'y Would Like To See Flag Board Pick One Or More From "Well Below" The Zone

SECRETARY of the Navy John B. Connally has advised a Navy flag selection board that it will receive his "unqualified approval" if "you should find and select one or more pre-eminently outstanding officers from a lineal position well below the selection zone."

In addition to the accent on youth, Secretary Connally also wrote Admiral H. P. Smith, President of the Rear Admiral Selection Board, that their selections should not show "any thread of a pattern containing undue emphasis on any particular career pattern, element of the service, or service ties."

Following is the full text of the Sec-

Nav's mandate to the board, which met 5 July and will be in session about two weeks:

"I wish to welcome you as Senior Member of the Board which will select line captains for promotion to flag rank. A vital task awaits you and your fellow board members. Each of you are assured of my confidence in your abilities and judgment to properly discharge this task."

"I know that each of you are aware of the demands of these difficult times for flag officers of great competence, diligence, imagination, and leadership. Therefore, I shall not belabor you with

lengthy and detailed guidance. I would, however, like to remind you briefly of certain salient points. I hope these will be helpful to you in the deliberations you are about to embark upon.

"It is my thought that these times demand flag officers of great resourcefulness and objectivity. The national needs are so great that it is my hope that your selections will not contain any thread of a pattern containing undue emphasis on any particular career pattern, element of the service, or service ties."

"Great respect accrues to an officer who seeks programs and positive con-

tributions without any personal thought of self-interest.

"I know that you will investigate the entire service careers of all those under consideration. You should, however, bear in mind that it is an unusual aspect of humanity that some who perform brilliantly in their thirties and forties subside in their fifties, while others seem to arise and find their destiny as captains and junior flag officers. It is an absolute requirement that selections be based on potential for the future in these times.

"I hope that it will be possible for the Government of the United States to be pleased to have any officer you select represent this government abroad.

"You are aware that progress in technology demands flag officers who have kept abreast of their profession, sometimes at the expense of becoming 'well-rounded.' You are equally aware that the increasing complexity of the naval establishment requires an increasing degree of sub-specialization among line officers of all grades.

"The capability of serving as a flag officer of this nation at this time is not a matter of even and mathematical distribution within our senior officer population. The laws of the nation give you wide latitude in making your selections. If, in the course of the proceedings, you should find and select one or more pre-eminently outstanding officers from a lineal position well below the selection zone, you will receive my unqualified approval.

"The Chief of Naval Personnel will provide you with detailed information and analyses concerning current laws, directives and statistics bearing on flag officer selections.

"Again, I extend my best wishes and full confidence to you and to the other board members. Please advise me if I can be of assistance to you."

Naval Justice School Graduates 36 Officers

The 89th officers' class was graduated in brief ceremonies at the U. S. Naval Justice School, U. S. Naval Base, Newport, R. I. recently.

Top honors among the 36 graduating officers went to Ens. Terrence E. Siple, USN. Ensign Siple, an ex-enlisted man now attached to the U.S.S. Joseph P. Kennedy, Jr. (DD-850), was scheduled for promotion to Lieutenant, junior grade, the day following graduation.

Also graduating with honor was Lt. (jg) Robert H. Pidgeon, USN.

Capt. Robert W. Clark, USN, Command Officer, U. S. Naval Officer Candidate School and U. S. Naval Schools Command, Newport, R. I., addressed the officer graduates and made the presentation of diplomas. Included in the group was Lt. Elizabeth M. Barrett, USN, who is a member of Captain Clark's command and who resides at 143 Evarts St., Newport. Miss Barrett graduated with distinction.

Electronics duplicate naval maneuvers on an ocean miles wide and fathoms deep—captured within the confines of a single building.

The view through the periscopes of Honeywell's attack centers for the Submarine Tactics Trainer will be as realistic as the view through the periscope of an actual atomic submarine! As many as nine targets will maneuver at proper speeds and change bearing and size as their courses dictate. Different types of weapons will make hits or misses as they would in actual individual or coordinated attacks, or defenses, without the expense of actual maneuvers. Effects of pitch and roll, night or day, fog or sun glare on the water will be imposed. All this will be programmed into the trainer once each second by a Honeywell 800 computer.

In short, the men being trained in these attack centers will have the feeling of engaging in active maneuvers. The flexibility of a Honeywell 800 computer will enable officers to experiment with new tactics and evaluate whether or not these would succeed or fail in actual practice. Two command centers and a critique room will allow participating officers to conduct war games, observe progress, change tactics and check performance of the attack center teams. The trainer can handle one to four problems simultaneously and thus submarine attack center crews can be trained separately or as a team.

Thus, without an atomic submarine leaving port, or the expense of actual maneuvers, a thorough training job can be done. Costing only a fraction of the cost of a submarine, the trainer is a good example of tax dollars wisely spent. Honeywell, as prime contractor, is developing and building the trainer at its Ordnance Division facility, Duarte, California, under the direction of the Naval Training Device Center, Port Washington, N. Y., for the Submarine School at New London, Conn. For more information on Honeywell management capabilities in the design and production of simulators and trainers, contact your local representative, or write: Honeywell Military Products Group, Minneapolis 8, Minn. 25TH DIVISION IN HAWAII BOLSTERED

THE 25th Infantry Division in Hawaii has been increased by an additional battle group and supporting units. The new units are the 2d Battle Group, 19th Infantry; 9th Howitzer Battalion, 1st Artillery; Company D, 3d Medium Tank Battalion (Patton), 69th Armor, and Company E, 65th Engineer Battalion. It is expected that all units will be at full strength by the end of July.

The 2d Battle Group, 19th Infantry, nicknamed "Chicks," will return to Schofield Barracks after an absence of three years. The "Chicks" were organized in 1861 at Indianapolis, Ind. The unit served with distinction during the Civil War and its unit crest symbolizes the Battle of Chickamauga.

Upon reactivation, the "Chicks" will be commanded by Col. John Millikin, Jr.

Montgomery, Hunter M, Knoxville, Tenn.
 Turner, Leonard C, Ft Benning.

—Continued on page 15

Northrop's Laminar Flow Control will enable large aircraft to fly up to twice as far as they now can, and stay aloft proportionately longer, on the same amount of fuel. Or it will permit them to carry heavier payloads over a given distance. And it will accomplish this without increasing the airplane's size, weight, or engine power.

Laminar Flow Control is a revolutionary technique developed by Northrop for reducing friction drag on an

airplane in flight. This drag is caused by the turbulence of the boundary layer of air as it flows over the surfaces of the plane. By drawing off this turbulent air through paper-thin slots in the aircraft skin with a suction system, and exhausting it in the direction of thrust, a smooth "laminar flow" of air is obtained.

The implications of Laminar Flow Control are far-reaching. To commercial operators it can mean substantial cost savings on long distance flights, and make

AF Will No Longer Require Applications From Reserves For Regular Line Commissions

The Air Force has ended the application system for Regular line officer augmentation.

In the future, no application from Reserve officers will be necessary. They will be selected for augmentation by a board at Air Force Headquarters, screened by their commanders, and then proffered Regular commissions.

The new policy will apply to all line Reservists with more than two and less than 17 years active commissioned service.

Up to the present time, applications

have been required from Reserve officers who wished to obtain Regular status between their second and seventh year of service. Reserve officers with seven, but less than 17 years service were considered automatically.

It is estimated that more than 5,000 officers with between two and seven years service will be chosen for augmentation by Fiscal Year 1962 boards. In addition, between 1,000 and 1,500 officers will be offered regular commissions upon their entry into the Air Force from the Distinguished Military Grad-

uate, Military Academy, and professional programs.

"Only a nominal number" of Reservists will be chosen for augmentation in the seven-to-seventeen year groups, an Air Force spokesman said.

The schedule for the FY'62 line augmentation program has been divided into the following four phases:

Reservists in the one and two year groups AFCS as of 30 June 62 will be screened by Headquarters boards during November and December.

Those with four, five and six years of active federal commissioned service as of 30 June 62 will have their records reviewed by Headquarters boards during September and October.

Separately from the Headquarters action, major commanders will nominate "truly deserving" officers in the seven-through-sixteen year groups who possess college degrees for consideration by boards which will meet at Headquarters in January.

As a fourth phase, all officers selected for below-the-zone promotion to lieutenant colonel in the Fiscal '62 cycle will automatically be considered for Regular augmentation.

Following are pertinent parts of Air Force instructions for the FY'62 line augmentation:

"The FY 62 program is designed to broaden eligibility zones and will give major commands an opportunity to recommend and nominate eligible officers. Applications from individual officers are not required and will **not** be accepted at any level; authority is granted major commands to return applications. Major commands will **not** establish screening boards for the purpose of making recommendations and nominations. Only officers in active Federal commissioned service groups and possessing all eligibility qualifications listed below will be considered. Requests for waivers of eligibility criteria will not be accepted. Eligibility criteria and actions required for the FY 62 Regular Line program will be as follows:

"Two and three year Line TAFCS groups computed as of 30 June 1962: Applications from eligible officers are not required and will **not** be accepted. Unit commanders will prepare recommendations on **all** Reserve officers in the 2 and 3 year groups assigned their command in accordance with format in Attachment 2. Local reproduction is authorized. Recommendations will be indorsed at the next higher level only and sent through channels prescribed by major commands. Screening boards will **not** be convened by major commands. Major commands will insure that all eligible Reserve officers in the 2 and 3 year groups are reported; losing commands will be responsible to make necessary reports on transferred officers through command assignment cut off date of 30 September 1961 inclusive. . . . Headquarters USAF line central selection boards for this phase of the program are scheduled to convene in November and December 1961.

"Four, five and six year Line TAFCS groups computed as of 30 June 1962: Applications from eligible officers are not required and will **not** be accepted. Major commands will prepare rosters and punch cards on **all** officers in the eligibility zones assigned their commands. Major commands will also identify on the rosters persons not recommended for appointment. For those not recommended, a brief explanation will be submitted with the rosters which

—Continued on page 25

More sky per gallon

possible non-stop flights over greatly increased distances. To the military, it will be immensely important for surveillance and airborne alert missions, or for any operation requiring aircraft to stay aloft over long periods. On logistic missions, planes can fly in and out of trouble spots without refueling. Dependence on overseas bases will be reduced.

Northrop is conducting a continuing research program for the U.S. Air Force to investigate the applica-

tions of Laminar Flow Control to many kinds and phases of flight. Two airplanes are now being modified under a separate Air Force contract to demonstrate the practicability of this new aerodynamic technique in day-to-day operation.

NAVY SETS NEW TRANSPORT POLICY

SECRETARY of the Navy John B. Connolly has assigned additional responsibilities in the field of transportation equipment management to the Bureau of Yards and Docks. Objective is to centralize responsibilities for requirements, assignments, and utilization of transportation equipment.

The significant change provided by the new authority is to extend the program responsibilities previously assigned to the Chief of Naval Operations, Commandants of Naval Districts, and the Bureau of Yards and Docks for passenger carrying vehicles, by adding certain trucks, trailers, construction and weight handling equipment. Specialized types of equipment that are designed, developed, and constructed for any bureau or office for its predominant use are not involved.

in telemetry systems management

The ascendant position of Vitro Electronics in telemetry systems management and products stems from the facilities, experience, and talent it takes to produce on time. Vitro telemetry capability is demonstrated daily down the AMR and PMR ranges. Management versatility is reflected in our ground, mobile, shipboard, airborne, and space operations around the globe. ■ This specialty of Vitro's trusted electronic competence is founded on long and familiar experience in the functions of telemetry conception, design, engineering, procurement, production, testing, and installation. Where the utmost in exacting telemetry systems performance is demanded — Vitro is at work.

Outstanding opportunities for telemetry systems, RF and advanced development engineers.

FLY FLAG AROUND THE CLOCK

President Kennedy has author-
ized the American flag to be flown
night and day at the Marine Corps
Memorial in Arlington, Va.

The White House cited the Iwo
Jima campaign as one of the most
significant and costly battles of
WWII. It points out that the Amer-
ican flag-raising on Mt. Suribachi
on 23 February 1945 is a symbol of
the courage and valor of the Amer-
ican fighting forces in the war.

The American flag will now be
flown 24 hours a day at eight places

in the United States. In four places
as authorized by Presidential Pro-
clamation, and in four others by
tradition.

Those authorized by proclamation
are: Ft. McHenry, Md.; Flaghouse
Square, Baltimore; the Capitol,
and the Marine Memorial. By tra-
dition the flag is flown 24 hours a
day at the following: Francis Scott
Key's Grave; the War Memorial,
Worcester, Mass.; The Plaza, Taos,
N. Mex., and a civilian cemetery
in Deadwood, S. D.

NEWEST NAVY WEAPON JOINS HATWING 1

The first fleet unit to receive the new A3J Vigilante attack-bomber is U.S. Navy Heavy Attack Wing #1 (HATWING #1). The A3J is the most versatile Mach 2 weapon possessed by any navy in the world. Whatever the mission—at high or low level, from carriers or small-space airfields, day or night, in any weather—the A3J can carry out its duty promptly and effectively. It was designed and built by the Columbus Division of North American Aviation.

TRANS-ATLANTIC RECORD

Capt. Bill Bollinger, "A" Flight Commander of the 353d TAC Fighter Squadron, Myrtle Beach AFB, S. C., believes he holds the base record and probably the world record for Atlantic crossings in single engine jet aircraft. He has flown the "pond" 18 times.

Are there any challengers? If so, write to the Office of Information, Headquarters Tactical Air Command, Attn: TOI-II, Langley AFB, Va.

Board Will Consider

25,000 USAFR 1st Lts.

A Board of Officers will convene at the Air Reserve Records Center, 7-31 August, under the provisions of Sections 8362 and 8366, Title 10, United States Code, to consider approximately 25,000 eligible Reserve First Lieutenants for promotion to the grade of Captain.

To be eligible for consideration, officers must hold a promotion service date on or before 30 June 1959, have a total years service date on or before 30 June 1956, and must have been in an active status for one year prior to the Board's convening date.

Now: a complete nationwide support program for the Cessna CH-1C. Furthering an idea pioneered by Cessna for its U-3A, the CH-1C now becomes the first rotary-wing aircraft in history to offer the military the proved economies of complete off-the-shelf logistics support. As with the U-3A, support of the CH-1C can tie in with world-wide support of its commercial counterpart (Skyhook) and be carried out by designated Cessna dealers across America. Now the Cessna CH-1C can make rotary-wing flight for the military practical as never before.

Chairman Vinson Again Tackles Army Needs; Appeals To Senate

"SHOCKED" to learn that the Army is 15,000-men understrength, Chairman Carl Vinson (D-Ga.) of the House Armed Services Committee, has called the matter to the attention of the Senate and urged "remedial action."

In a letter to Senator A. Willis Robertson (D-Va.), Acting Chairman of the Senate Military Appropriations Subcommittee, Chairman Vinson said he had read in the 1 July issue of THE JOURNAL that current Army strength is 856,233.

"We are faced with the cold, hard fact," he wrote, "that the Army is well below the strength which, I am sure, both you and I thought it had. And that strength must be further reduced unless some remedial action is promptly taken."

The powerful House member, who has been battling for the ground forces for the past several years, said the "irony" of the situation "is that we find the Army strength declining, principally for money reasons, at the same time we are trying to assure the Nation and the world of our firm national resolve to stand firm in Berlin as well as other trouble spots in the world."

Senator Robertson told THE JOURNAL he has asked the White House to permit General Maxwell D. Taylor, Military Advisor to the President; General Lyman L. Lemnitzer, Chairman of the Joint Chiefs of Staff, and General George Decker, Army Chief of Staff, to appear before the Committee and give their personal views about Army manpower needs.

He also questioned Deputy Secretary of Defense Roswell Gilpatric on the subject during the Pentagon official's appearance before the Committee on 10 July.

Secretary Gilpatric said steps have been taken to bring the Army up to strength as rapidly as possible, including an 8,000-man draft call which has been ordered for August. He added, however, that the Department "is not convinced" that the Army needs the 925,000-man force backed by General Decker. "If they can demonstrate that they need more," he said, "we will come and ask you for it."

Secretary Gilpatric said a new review of military requirements ordered by President Kennedy as a result of the Berlin crisis may demonstrate, however, "that actions other than those already taken may need to be taken." In a later Pentagon press conference, he said the Defense Department may order a call-up of Reserve and National Guard units.

The Deputy Secretary told the Senate

Subcommittee he thinks the Army can get better use out of its presently authorized manpower. By eliminating training elements in the three STRAC divisions, he said, the Pentagon believes it will be possible to get an additional 20,000 fighting troops for the Army.

In his letter to the Appropriations Subcommittee, Chairman Vinson said he has been making inquiries to determine why the Army is 15,000-men below its authorized fiscal '61 strength.

While his investigation is "incomplete as to all of the details," he said, the "principal reason" seems to stem from a short-

age of travel funds.

While the Army might not be "without fault in this matter," he told Senator Robertson, "there is one very substantial difference in the problem facing the Army and the same problem which faces the other services. I refer to the fact that 40% of the Army is stationed overseas. In addition, some 200,000 inductees or first-term enlistees will enter the Army during Fiscal '62."

Chairman Vinson said "These personnel must be trained and transported to their units during the same period of time that approximately the same num-

ber will be separated for service and sent home. Since no other Service has this problem, which results from the short-term service of draftees, there is obviously a substantial reason why the Army problem is relatively greater."

The House Chairman said he was "deeply concerned" about the Army situation. He ended his letter with the statement that the "implications" of the matter "are too obvious to require further discussion."

Senator Robertson later informed Chairman Vinson that he plans to "do all in my power" to see that the Army's manpower needs are met.

Manned space flight requires reliable and efficient thermal and atmospheric systems and secondary power equipment.

Complete and integrated systems, as pictured, are being studied or under development at The Garrett Corporation. Through optimized design they offer an unmatched degree of compatibility and high performance.

Their design reflects Garrett's 20 years of leadership in developing and producing secondary power and environmental controls for aircraft and spacecraft, including NASA's Project Mercury life support system. This unique capability offers an unequaled source of research, development and production to the government and industry.

Text Of Pay Recommendations

HERE is the full text of the recommendations transmitted to the Senate Armed Services Committee by the University of Michigan Study Committee in its report on the military retirement system:

POLICY and planning for military retirement involves long-term considerations. Today's decisions will produce fiscal results some of which will take place 20 or 30 years hence. Likewise, the costs of military retirement which looms so great for the 1960's must be viewed as deferred costs of World War II. Officers and enlisted personnel who were mobilized during World War II did not enter into service because of retirement benefits. However, the decision of many to remain in the military as a career after the war was deeply influenced by their view of the military retirement system.

In 1947-48, Congress undertook a general review of the personnel practices of the armed forces which resulted in many fundamental changes. Unfortunately, the military retirement system was not fully evaluated. At that time, it was clear that the United States for the first time in its history was underwriting a large permanent peace-time establishment and as a result would incur greatly expanded military retirement costs. It was also clear that the character of the military profession had changed and that for many persons, military service would be the first step in a two-step career.

It was at this point that Congress should have introduced new concepts in management of the military retirement system. This failure to modernize the retirement system will not only be costly in the years ahead but has in effect complicated military personnel practices. The central personnel problem of the military is selectivity to keep personnel on active duty for longer periods of time or to release them earlier so that they can be effectively integrated into the civilian labor force.

The recommendations that the Study Committee proposes are likewise heavily influenced by the im-

mediate problems of the military establishment. But the Committee assumes that a military establishment of present proportions will continue and that future retirement costs are in substantial measure deferred costs of current military efforts.

Personnel Requirements

Recruitment—Although the military retirement system does not guarantee effective recruitment of officers, it is a consideration for those currently entering the service. It serves at least as another reason for testing our interest in a military career. The Study Committee below makes a series of recommendations to increase the flexibility of the military retirement system in order to assist in the retention of personnel; we also believe that a more flexible retirement system will serve to increase the ability of the military establishment to recruit officer personnel.

Retirement benefits seem to be less significant in the initial recruitment of enlisted personnel.

Retention—The retirement system is a key element in the retention of both officers and enlisted men. The retirement benefits loom large in the military profession because it is a profession which does not offer lifetime employment. On the one hand, the Study Committee found no evidence that the retirement system forces the services to retain unsuited personnel. On the other hand, the Committee became aware that the military retirement pension was not and could not be competitive with private industry for officers with outstanding administrative and technical specialties. Such officers had to be motivated more by considerations of public service.

Therefore, the military retirement system must be judged in terms of

—Continued on page 21

Committee Frowns On Recomputation; Suggests Cost-Of-Living Extension

From first page—

tired pay should, in fact, be extended to those retiring in the future.

Here is what the Committee said in its report to the Senate Armed Services Committee:

"The Study Committee accepts without qualification the premise that given the trend of economic conditions, the pay of retired military personnel has to be increased periodically. Increases in retired pay must be extended for those who depend upon it for old age security as well as for those who depend upon retired pay to maintain their economic status.

"The question is not whether retired pay should be increased but how it should be increased. This matter is of importance to our inquiry.

"Military personnel, and especially retired military personnel, take the position that the traditional system of basing retired pay upon current active duty basic pay scales should be reinstated; thus increase in retired pay would be geared to increases in the basic pay of the active duty forces. Congress abandoned this approach in 1958, and to some extent in 1955, when it adopted a "cost-of-living approach." Under the legislation approved in 1958, Congress provided a six per cent increase in retired pay for all ranks except at the three and four-star ranks which received larger increases. Since 1958, the matter of the proper method of increasing retired pay has been repeatedly before the Congress.

"The Committee concludes, after a thorough study of all the evidence, that the cost-of-living method of increasing retired pay should be retained and that this policy should be continued in the future.

"Although several of the arguments advanced in behalf of basing retired pay on current active duty pay scales have merit, the Study Committee does not believe these arguments are persuasive. The reasons for adoption of the cost-of-living approach are as follows:

"First and foremost, the cost-of-living approach is more equitable, especially in the short run, and, therefore, will better achieve the objectives which retired pay is designed to accomplish.

"In the past, the basic pay structure was a symmetrical system, with rather equal gradations between ranks. With a few exceptions, technical skills were not required and pay for such skills was not reflected in the basic pay structure. There was also little or no problem of retaining people at the upper ranks—there were more people than positions—and the pay scale did not have to be used for this purpose. Pay increases were extended in a manner throughout the ranks to maintain the differentials.

"Under this system, basing retired pay upon changes in the active duty pay provided for an equitable method of increasing retired pay because all personnel tended to receive approximately equal percentage increases in compensation.

"This situation was greatly changed by 1958. The problem of retaining people (especially in the upper ranks) was acute; many were leaving the service. Moreover, the pay structure did not provide a career incentive for young people. The 1958 legislation was designed to meet these needs. As a result, there were substantial increases in the basic pay of

¹ For example, even though retired personnel are subject to recall and court martial, the number so affected is minimal.

University Study Rejects Contributory Retirement; Asks Cost-Of-Living Boosts

From first page—

and logistical personnel" without disturbing the promotion flow for other officers.

- Modification of the "discriminatory" Dual Compensation Act.
- More super-grades for enlisted men.
- Partial payment of retired pay in a "lump-sum" with reduced monthly payments.
- Uniform "separation pay" for both Regulars and Reservists.
- Minimum retired pay for those with at least 30% disability, and
- Establishment of a "high level" review board to handle complaints of retired members of the Armed Forces.

Although operating under contract to the Senate, the Fischer Committee was not hesitant in criticizing Congress for its "failure" to "fully evaluate" and "modernize" the retirement system when it wrote the Officer Personnel Act in 1947. It was "clear" at that time, the Committee said, that "the United States for the first time in its history was underwriting a large, permanent peace-time establishment and as a result would incur greatly expanded military retirement costs."

These mounting costs, expected to exceed \$3.4 billion by 1983 without any further pay increases, "must be seen as deferred costs of WWII and the Korean conflict and the present national security requirements," the Committee said.

The present retirement system is "a key element" in retention of career military personnel, the Committee reported, and "it is necessary to maintain the present levels of benefits." The system is not and cannot be "competitive with private industry" for officers with outstanding and technical specialties.

The Michigan group said it is both "necessary and desirable to develop means of making the system more flexible" but advised the Senate Committee that present levels of retirement benefits "are essential to compensate officers and enlisted personnel for the costs involved in making a transition to civilian life."

While a few officers earn big salaries in civilian employment after retirement, the "bulk have decreased earning pow-

er," the University group found. The Committee rejected the "idea that military retired pay be adjusted in terms of civilian income, either for the present or future."

In seeking a "more flexible system of options" for the retirement system, the Fischer Committee suggested that members of the Armed Forces be given an opportunity at the time of retirement to accept part of their retirement pay in a lump-sum, with a corresponding reduction up to one-fourth or one-half of their monthly retirement checks. The lump-sum payment, the Committee said, would help to meet the immediate expenses of their transition to civilian life.

The Committee also suggested a "new approach" to disability retirements, with retired pay based on two components: (1) rank and service, and (2) extent of disability. A "minimum" amount would be prescribed for those with at least 30% disability regardless of rank or length of service, and a periodic disability review, such as that used by the Veterans' Administration, would be established for the Armed Forces.

Among other recommendations, the Committee also suggested strengthening the "vocational counseling services in the Armed Services and Department of Labor in order to assist in the transfer from military to civilian employment." A central part of this service, the Committee said, "should be the development of meaningful 'experience records' for each retiring military personnel."

The Defense Department also is urged to hold "a biennial assembly on the problems of utilization of retired military personnel."

In addition to Doctor Fischer, members of the University Committee included Doctors Dallas L. Jones, Associate Professor of Industrial Relations; William Haber, Professor of Economics; Morris Janowitz, Professor of Sociology; Paul W. McCracken, Professor of Business Conditions; Fred C. Munson, Assistant Professor of Industrial Relations; and Frank W. Reynolds, Associate Professor of Public Health Practice. Doctor Gerald Gurin, Assistant Program Director of the University's Survey Research Center, served as Consultant to the Committee.

the upper commissioned and enlisted grades but little or no increase in the lower commissioned and enlisted grades. The changes in the pay structure thus were based, as they had to be, upon the needs of the active duty forces and not upon the needs of the retired group.

"If the traditional method of increasing retired pay had been followed, there would have been substantial increases in the upper grades—15 per cent for lieutenant colonels up to 74 per cent for former chiefs of staff—but for some individuals in some grades there would have been no increases. In fact, if there had not been a "saving clause," there would have been decreases for some grades. Stated another way, some officers would have received substantial increases but some 38,000 others would have received little or nothing. The remainder would have received increases of varying amounts.

"It is clearly apparent that to have utilized this method to increase retired pay would have defeated the basic purpose of retired pay to maintain income security either for old age or for an economic base in a second career. The evidence clearly reveals that many officers in the lower ranks who must receive additional income, would have received little or nothing. The economic status of this group would have continued to deteriorate.

"The available information also indicates that in the future the pay structure will be used more and more to meet active duty needs. As a consequence, changes in the active duty pay structure will not meet the needs of the retired group; nor should the active duty pay structure be tied to the needs of the retired group if an efficient defense establishment is to be maintained. At the same

time, the economic needs of the retired group must be recognized and met.

"It is the Study Committee's conclusion that these needs can best be met by assuring retired personnel that the purchasing power of their income will be maintained through periodic cost-of-living increases. Such assurances will be of great help in maintaining the morale of both retired and active duty personnel.

Conclusions and Recommendation

"The evidence clearly indicates that retirement pay is essential to maintain the economic status of retired military personnel. Retired pay is essential for old age security. Under the present manpower concept held by the Department of Defense, retired pay also is necessary for most personnel in order to maintain income status prior to complete withdrawal from the labor market. Although a few individuals attain high incomes after leaving the service, the vast majority do not. The Study Committee believes, therefore, that the present levels of pay—from 50 to 75 per cent of base pay—should be maintained with no income limitations.

"The Committee also concludes that the cost-of-living method of increasing retired pay not only is the most equitable, but more closely will achieve the objectives of the retirement system. Such an approach also provides more flexibility in meeting the needs of the active duty forces. The Study Committee believes, however, that all possible assurances should be given retired personnel and active duty personnel that no major changes are contemplated in the retirement system and that future increases in retired pay can be expected whenever necessitated by changing economic conditions."

Col. Ireland Will Head Presidential Wing; 1254th ATW Lists New Leaders Assignments

COL. Clare T. Ireland, Executive Officer to the Deputy Air Force CofS for Personnel, will take command of MATS 1254th Air Transport Wing at Andrews AFB, Md., in August.

He replaces Col. Grover J. Dunkleberg, reassigned to command the recently-activated Eastern Air Rescue Center, Robins AFB, Ga.

The 1254th, which flies the Presidential jets and other Special Mission aircraft, this month completes its move from Washington National Airport to Andrews.

Left behind at Washington National will be a small contingent of Wing personnel headed by Lt. Col. Roy Parnell, who formerly commanded the wing's Bolling AFB squadron.

The move will see a reduction in the number of personnel assigned to the wing, as the result of the elimination of its service squadron. Service functions for the wing will be performed by existing units at Andrews.

Stepping up from Wing Director of Operations to the Deputy Commander

billet is Col. Vernon O. Elmore. He replaces Col. Thomas Collins, reassigned as MATS Director of Operations, MATS AFB, Ill.

New Wing Director of Operations will be Lt. Col. Doyle E. Simons.

The Wing's 1298th Air Transport Squadron, which flies all its four-engine intercontinental aircraft with the exception of the Presidential jets, will be commanded by Lt. Col. Clifford O. Korbol. The wing's Convair-equipped 1299th ATS will be under the command of Lt. Col. Orlo V. Harkness.

3 Stars For RADms. Ward And McDonald

RAdm. Alfred G. Ward, USN, Commander of the U. S. Sixth Fleet in the Mediterranean, has been nominated by President Kennedy for three-star rank.

Also nominated 10 July for vice admiral was RAdm. David L. McDonald, Commander of Amphibious Forces, U. S. Atlantic Fleet.

Admiral Charles R. Brown, CinC Allied Forces Southern Europe, and VAdm. Frederick N. Kivette, Commander of the Western Sea Frontier and Pacific Reserve Fleet, were named for their present rank on the retired list.

Careers End At Campbell

Eight Ft. Campbell, Ky., officers and enlisted men have retired.

Col. Benjamin T. Ammons, Deputy Post Commander, will reside in Jackson, Tenn.; Maj. Robert E. Rogers, USAH, has chosen Lexington, Ky.

Also retiring were M/Sgt. William G. Guinn, San Antonio; M/Sgt. Elim L. Hawkins, Los Gatos, Calif.; M/Sgt. Walter W. Stephens, Cherry Valley, Ark.; SFC Henry J. Berghammer, Hopkinsville, Ky.; SFC Wilbur I. Marcum, San Bernardino, Calif., and S/Sgt. Richard H. Wood who will reside in Temple City, Calif.

Atomic Aircraft Chief Commands Flight Test

Brig. Gen. Irving L. "Twig" Branch, of Hq. USAF, has been named as new commander of the Air Force Flight Test Center, Edwards AFB, Calif. and is expected to arrive there later this month.

Maj. Gen. Robert H. Warren, previously named to replace Maj. Gen. John W. Carpenter, III, will instead return to Eglin AFB, Fla., from Korea to become Commander Air Proving Ground Center, also an AFSC unit.

General Branch had been Assistant Chief of Staff/Development for Nuclear Systems and Chief of the Aircraft Nuclear Propulsion Office, a joint Department of Defense and Atomic Energy Commission office. He was also the Assistant Director, Division of Reactor Development of the Atomic Energy Commission.

General Branch is married to the former Margaret Rogers of Bristol, Va. They have two sons, Christopher—22, and Richard—15. "Chris" is a 1961 graduate of Stanford University and will enter the Air Force as a Second Lieutenant later this Summer.

B/G Branch

Technical Research Ship Commissioned

The USS Oxford (AG-159), a technical research ship, was commissioned 8 July at the New York Naval Shipyard in Brooklyn. RAdm. Ernest Holtzworth, Commander of the Shipyard, officiated at the ceremonies.

Oxford has been primarily equipped to conduct research in the reception of electromagnetic propagations. Most of its work will be classified.

First Commanding Officer of Oxford will be Cdr. H. R. Lund, a recent graduate of the U. S. Naval War College, Newport, R. I. Oxford will be assigned Norfolk as a home port and will be under the operational control of Commander Service Force, U. S. Atlantic Fleet.

WHAT IS *Fred Hemmrich's* SECRET OF SUCCESS?

Fred Hemmrich is 41 years old, married and has five children. When he retired from the 82nd Airborne Division as a Lieutenant Colonel three years ago, Fred joined Acacia as an agent in our Louisville, Kentucky branch office.

In his first six months under Acacia's generous agent's contract, Fred earned more than \$6,000 in new business commissions and bonuses.

In his first year with Acacia, his earnings topped \$9,000.

In 1960, his third year as a full-time Acacia agent, Fred earned more than \$16,000.

Fred's "secret" is really not a secret at all. His army career taught him that an organized plan of operation and conscientious work habits pay off in any line of endeavor. Fred also gives credit to Acacia's basic and advanced training programs for getting him ready quickly for a life insurance selling career. You see, Acacia specializes in selling personalized life insurance protection and, therefore, we devote all our training efforts to that one field.

We're proud of Fred Hemmrich, and all of our other Acacia career life insurance salesmen and saleswomen who have found the *secret of success* in life insurance specialization . . . at Acacia. Perhaps when you leave the service you, too would be interested in a career with Acacia.

Measure your potential success in life insurance sales work with the help of a unique booklet published by Acacia titled, "Measure Your Success". Write to H. J. Shaffer, Agency Vice President, for your copy.

Congress Must Act On Retired Pay

The University of Michigan study of Service retired pay has given Senator John C. Stennis (D-Miss) what he wanted in the way of opposition to the pay equalization measure, but has proved a staunch opponent to the Senator's efforts to saddle the defense forces with a contributory retirement system.

In other areas, the Michigan study, which THE JOURNAL reports at great length in this issue, is most interesting, proposing many plans which are stimulating but few of which have any chance of enactment. The Senate Committee, which declines to reveal how much it is paying for the study, said that it wanted an independent viewpoint on retired pay, and that is what it got, for none of the members of the study group, it seems, has had any prior experience in the problem.

We have reported in full text (pages 1 and 10) those portions of the Michigan report treating of readjustments in retired pay. The group concludes that Congress acted "wisely" in 1958 when it denied the benefits of the new active duty pay scales to those already retired, giving to them, instead, a token six per cent increase which fell far short of even a cost-of-living increase. They ignore completely the fact that this action went counter to the report of the Cordiner Committee upon which the rest of the pay bill was based. They ignored, too, the fact that the injustice of the present double standard for retired pay has been recognized and its correction urged by two Presidents of the United States, the Secretaries of Defense and the Directors of the Budget of two administrations, and by the entire membership of the House of Representatives which last year gave unanimous approval to a measure equalizing retired pay.

The departure from the traditional method of readjusting retired pay to keep in step with active duty pay was particularly unfortunate in connection with the 1958 pay bill, for that bill recognized the need for higher pay in the higher grades and changed the old ratio between the grades. But by withholding this recognition from those previously retired, Congress brought about a situation whereby a few days difference in retirement dates made vast differences in the amount of retired pay. Many of our top World War II generals, whose names will live long in history, were denied the higher pay which goes to those who reached the top in times of peace.

In view of the fact that the House passed corrective legislation in the last Congress, the House Committee now looks to the Senate to make the first move toward equalization of retired pay. We urge Chairman Russell to bring the matter before his committee and before the Senate, where sentiment in favor of the measure is strong. In fact, the only opposition has been from Senator John C. Stennis, (D-Miss), who was chairman in charge of the subcommittee which handled the bill last year. Chairman Russell already has set a precedent by bringing the military construction bill before his full committee instead of referring it first to a subcommittee headed by Senator Stennis as he did last year. He could do the same with pay equalization—and we hope he will.

The new endorsement of the pay equalization bill which Secretary of Defense Robert S. McNamara has sent to the Senate Armed Services Committee should be the starting point to spark committee action. The measure already has the endorsement of both President Kennedy and Vice President Johnson. The approval given previously by President Eisenhower should remove any political opposition.

We urge the committee to consider not only the injustices being wrought to retired WWII officers, but also the adverse effect present conditions are having upon personnel on the active list who fear for their own future status when they reach the retired list now that a precedent has been set in changing the rules. It is this weakening of faith which is damaging the morale of the active people and thus endangers the effectiveness of our forces. Congress owes it to the country to enact corrective legislation promptly.

WHAT IS LEGAL FORMULA FOR RETIRED PAY?

The University of Michigan Study Committee, which said it could find no "persuasive" arguments for relating retired military pay to active duty pay, might want to read what the law says about computation of retired pay.

The formula for computing the pay of retired members of the Armed Forces (it was in effect at the time of the 1958 Pay Act, and is still effective today for those who have since retired) is prescribed in Title 10, U. S. Code.

This is the formula as set forth in the Army section of Title 10 (Chap. 371, sec. 3991)—it is the same for all Services:

Take monthly basic pay to which member would be entitled if he were on active duty in his retired grade, multiply by 2½% of years of service credited to him, add amount necessary to increase the product to 50% of pay upon which computation is based, subtract excess over 75% of pay upon which computation is based.

The phrase "basic pay to which member would be entitled if he were on active duty" is the legal language which entitles retired members of the Armed Forces to base their retired pay on current active duty pay rates. The formula was abandoned in 1958 only for those retired prior to 1 June of that year.

United Nations Command In Korea Changes

GENERAL Guy S. Meloy, new Commander-in-Chief United Nations Command, Korea, gets his new fourth star from Mrs. Meloy and his predecessor General Carter B. Magruder, who retires. General Magruder and his wife, Luella, have left Korea for Hawaii. After several months traveling, they plan to reside in Arlington, Va., close to the National Capital.

Readers' Views

"Forgotten Men"

■ You are to be complimented for the forthright statement appearing on the editorial page, 1 July issue, entitled "A Shameful Record of False Economy."

Those of us among the "forgotten men" are very appreciative of your loyal support. You have been steadfast and consistent. Without your backing the issue would be dead.

The attitude of Stennis' colleagues (the other 99 senators), in the face of the overwhelming support for corrective action, proves once more that the Senate is a club and log-rolling (reciprocal support) a factor. I'm sure, if such was not the case, the bill would have been discharged long ago from Senator Stennis' subcommittee, by petition.

E. PASOLI, JR.
COLONEL, USA, RET.

Don't Let LTA Die!

■ Your editorial in today's JOURNAL (8 July), "LTA Should Continue In R&D," brings up a point of the most vital importance to our National Defense—that the Navy, or some defense agency, should keep up a continuing program of research and development in the lighter-than-air field.

We all know that lighter-than-air has suffered severely over the years by being dominated by heavier-than-air command.

LTA is still a fertile field. The United States has a great deal of experience in LTA which should not be allowed to go to waste by complete abandonment of non-rigid airships. Certainly, the cost of maintaining two or three on a purely R&D basis would be well worth the small expense involved.

Military Tax Exemptions Sought; Hydro-Aeroplane Is Coming; Delinquents Will Stand Trial In Washington

10 Years Ago—The Senate Finance Committee has been asked to give consideration to proposals to grant special tax exemptions to all Service persons on active duty.

50 Years Ago—Capt. Washington I. Chambers, USN, in charge of the hydro-aeronautic work for the Navy is quoted . . . : "The hydro-aeroplane is the coming machine so far as the Navy is concerned; in fact, it has already come. The Navy machine built by Glenn H. Curtiss has had several tryouts and has proved itself a success."

97 Years Ago—Every reader of our Army Gazette must be familiar with the standing head "Notice to Delinquents." Under this warning title are weekly published the names of officers who are ordered to appear within 15 days before a board sitting in Washington, to make a satisfactory defense to variously assigned offenses, in default of which they will stand dismissed from the services.

Vote Pension Raise For Medal Of Honor

After more than six years both the Senate and House have agreed to raise pension rates for Medal of Honor winners.

The plan, however, is still subject to conference action. As approved by the Senate on 11 July the proposal would provide an increase from \$10 to \$100 per month for all Medal of Honor winners when they reach age 50.

The increased pension would go only to those who make application.

The Senate version differs from a previously approved House bill and will now be subject to a conference compromise.

The House has passed legislation several times authorizing CMH pension boosts, but had previously failed to gain Senate concurrence.

At present, Medal of Honor holders receive a \$10 monthly pension when they reach 65, provided that they have been honorably discharged. When the increased pension plan last passed the House in 1958 there were about 67 Medal of Honor winners still on active duty. Incomplete records at that time indicated that the Army had about 44, the Air Force one, Navy 14 and Marines eight.

The Senate also approved and sent to the White House legislation (HR 4324) providing greater uniformity in the payment of re-enlistment bonus among the four Services.

Legislation providing for more effective participation in the Reserve components of the Armed Forces also won Senate approval, but with a committee amendment. It also will go to conference.

M/G Prather To Retire, M/G Coverdale Succeeds

Maj. Gen. Richard G. Prather, since November 1956 the commanding general of the U. S. Army Intelligence Center and Ft. Holabird, is being transferred to Sixth Army Headquarters, Presidio of San Francisco, where he will retire 31 August after more than 41 years of continuous Army service.

Replacing him as Intelligence Center and Ft. Holabird commanding officer will be Maj. Gen. Garrison B. Coverdale, who has been on duty as commanding general of the 5th Region, U. S. Army Air Defense Command at Ft. Sheridan, Ill.

General Prather, a native of Hickman, Ky., is married to the former Elizabeth Lucille Gowen, daughter of the late Brigadier General James B. Gowen and Mrs. Gowen. They have four children, James, Mrs. Marjorie Prather Manley, Betty Lou and Nancy Lavinia Prather.

USMC Promotion Status

The following officers of the U. S. Marine Corps are the last officers as of 1 July who have been promoted or for whose promotion vacancies existed to the grade indicated:

GRADE	PERMANENT	TEMPORARY
MajGen	R. C. Mangrum	H. K. Rottet
BrigGen(UNR)	L. F. Chapman, Jr.	J. F. Dobbin
BrigGen(SDO)	P. R. Tyler	J. O. Butcher
Col(UNR)	F. K. Coss	J. L. Warren
LaCol(UNR)	R. A. Bjorson	E. B. Fallon
LaCol(LDO)	H. G. Gosse	
Maj(UNR)	M. M. Hewlett	C. E. Kiser
Maj(LDO)	J. W. Wilson	
Capt(UNR)	D. A. Kelly	J. A. Eklam
Capt(LDO)	W. T. Evans	

R&R REVISED

The Army has ordered that all Rest and Rehabilitation periods taken by its personnel from Korea stations to Japan will be chargeable as ordinary leave.

Travel periods from Korea to Japan, however, will not count as leave. In the past neither the time spent in Japan nor the travel was chargeable.

The Army said that it made the change to bring its policies for troops in Korea into line with those in the rest of the world.

Before the change, Army personnel in Korea received two R&R periods in Japan per tour, neither of which counted against accrued leave time.

Service PRs In N. Y. Form Joint Council

The Armed Forces Information Council of Greater New York, comprised primarily of information personnel of several Defense Department activities, has elected its first slate of officers.

The Council was formed recently to give public relations personnel of the Armed Services and other DOD agencies located in and around New York City an opportunity to work together in furthering the Defense Department's information policies and objectives.

Also represented in the Council are the area's working press, service publications, advertising and public relations agencies, and industrial firms dealing with the military.

Elected Chairman was Lt. Col. William C. Byrns, 1st U. S. Army. Col. Harold D. Woodruff, in charge of the Secretary of the Air Force N. Y. Information Office, was elected Vice Chairman, Legislative Committee. Navy Lt. Jerry Bartosz was elected Vice Chairman, Membership; Marine Maj. Charles J. Gilroy, Jr., Vice Chairman, Special Projects; and Coast Guard Lt. John Duenzl, Vice Chairman, Rules Committee.

Other elected officers include: J. Spencer Gray, publisher of the White Plains, N. Y. Herald of Westchester, Exec. Vice Chairman; Col. Gordon Barclay, Information Officer for the 1st U. S. Army, Vice Chairman, Civilian Advisory Committee; Arthur Stewart, 1st U. S. Army, Vice Chairman Public Relations; and Edward Atchison, N. Y. Ordnance District, Vice Chairman, Finance.

The Information Council, which meets monthly, is a pioneer in the New York area. It's patterned after successful Councils in other cities, notably Detroit and Boston.

Division Reunions Set For August

The following is a schedule of Division reunions or conventions to be held during August, as compiled in the Office of The Adjutant General of the Army. In the list the name of the organization is followed by figures indicating the days of the month of August when the meeting will be held, which, in turn, is followed by the place and city of the meeting.

- 1st Armored, 25-26, Chase-Park Plaza Hotel, St. Louis.
- 2d Armored, 4-6, Penn-Sheraton Hotel, Pittsburgh.
- 5th Armored, 10-12, Warwick Hotel, Philadelphia.
- 6th Armored, 31-3 Sep, Sheraton Hotel, Philadelphia.
- 7th Armored, 18-20, The Benjamin Franklin, Philadelphia.
- 11th Armored, 10-13, Penn-Sheraton Hotel, Pittsburgh.
- 16th Armored, 11-13, Sheraton-Park Hotel, Washington, D. C.
- 17th Airborne, 11-13, Hotel Washington, Indianapolis.
- 101st Airborne, 25-26, The Pick-Carter, Cleveland.
- 1st Infantry, 24-27, Claridge Hotel, Atlantic City.
- 4th Infantry, 6-13, Hotel Seville, Miami Beach.
- 6th Infantry, 3-5, The Pick-Carter, Cleveland.
- 24th Infantry, 10-13, Brown Hotel, Louisville.
- 28th Infantry, 10-12, Hotel Penn Harris, Harrisburg, Pa.
- 69th Infantry, 18-20, Tamiment Hotel, Tamiment, Pa.
- 76th Infantry, 5, Hotel Commodore, New York.
- 80th Infantry, 2-5, Penn-Albert Hotel, Greensburg, Pa.
- 84th Infantry, 21-23, Sheraton-Gibson Hotel, Cincinnati.
- 88th Infantry, 10-13, Somerset Hotel, Boston.
- 95th Infantry, 18-20, The Chase, St. Louis.
- 102d Infantry, 3-6, Manger Hotel, Cleveland.

DoD Will Establish Joint, All-Service Intelligence Agency Under 3-Star Officer

The Defense Department will establish a new intelligence agency, to be headed by a three-star officer, "to obtain unity of effort among all components of the Department of Defense in developing military intelligence and strengthening the over-all capacity of the Department of Defense for collection, production and dissemination of intelligence information."

The Defense Information Agency, it was announced 11 July by Deputy Secretary Gilpatrick, "does not represent any reallocation or realignment of intelligence functions between the Department of Defense and CIA."

ment of Defense and CIA."

DIA, Mr. Gilpatrick said, "is going to be concerned with military intelligence. It will be responsible to guidance from the U. S. Intelligence Board and it will supply the Defense input to our National intelligence resources."

The new agency will be staffed jointly by all Services, the Deputy Secretary said.

He noted that in "developing our plans for this agency we acted on the recommendations of the Joint Chiefs and with the endorsement of the Service Secretaries."

USAF RESERVE SELECTION BOARDS FOR '62

Following is the schedule of selection boards to be convened at the Air Reserve Records Center, Denver, Colo., during Fiscal Year 1962.

In parentheses are the estimated numbers of officers to be considered by each board.

To Captain (30,000): mandatory board, PSD 30Jun59, TYSD 30Jun56; 1-25 August.

To First Lieutenant (600): review board, PSD 30Jun59; 5-6 September.

To Major (12,000): mandatory board, PSD 30Jun56, TYSD 30Jun49; 16-27 October.

To Captain, Major and Lieutenant Colonel (200): unit vacancy board, PSDs of 31Oct59, 31Oct57 and 31Oct57, respectively; 11-12 December.

To Lieutenant Colonel (1,200): mandatory board, PSD 30Jun56, TYSD 30Jun42; 8-12 January.

To First Lieutenant (600): review board, PSD 31Dec59; 5-6 March.

To Colonel (6,300): overall vacancy, PSD 30Jun57; 7-18 May.

To Captain, Major and Lieutenant Colonel (200): unit vacancy board, PSDs of 30Apr60, 30Apr58 and 30Apr58, respectively; 11-12 June.

Shift In Top DoD Medical Post Seen

Secretary of Defense McNamara is planning a new DoD medical shift which would see Dr. Frank B. Berry replace Dr. Edward Cushing in the top medical post of Deputy Assistant Secretary of Defense (Health and Medical) under Assistant Secretary of Defense (Manpower) Carlisle P. Runge.

Dr. Berry, former Assistant SecDef for Health and Medical, has been serving as Senior Medical Advisor to Mr. Runge since DoD medical activities were placed under the Assistant Secretary for Manpower last January.

Queried on the matter, a DoD spokesman told THE JOURNAL that "I can confirm only that a shift of personnel is being contemplated." He said an official announcement could be expected at any time.

Chemical Association Meets

The Armed Forces Chemical Association will hold its 16th Annual Meeting in Washington, D. C., 13-15 September at the Statler-Hilton Hotel.

"Balanced Military Power Through Science and Industry" will be the meeting's theme. The program has been jointly arranged by the Department of Defense and the chemical industry, with the Army acting as host.

FT. STORY UNIT MAKES PERFECT NIKE SCORE

For the first time, a perfect score has been chalked up by a unit of the U. S. Army Air Defense Command during its practice firing of Nike guided missiles at Fort Bliss's McGregor Range in New Mexico.

Battery D of the 4th Missile Battalion, 59th Artillery, stationed at Fort Story, Va., scored 100% of the 3,000 points on which missilemen are graded during their two-week stay. During this period, they care for and prepare the missiles they will fire at the end of their stay.

Every unit of ARADCOM visits the range to fire live missiles, since such practice cannot be accomplished at the sites throughout the country where the missilemen are stationed.

Maj. Borroum At Benning

Maj. James C. Borroum has been assigned to the Army Infantry School's Communication Department at Ft. Benning, Ga., after completing an associate course at the Command and General Staff College, Ft. Leavenworth, Kan.

Major and Mrs. Borroum and their two children will reside at 210 Austin Loop on the post.

MEMO--

ANGRY DENUNCIATION of the University of Michigan report on military retired pay is certain to erupt over the Committee's failure to draw categorical conclusions as to whether the Government broke faith with the Armed Forces in 1958 by revoking the historic relationship between retired pay and active duty pay. The subject is mentioned briefly in the background section of the Committee report but is thereafter ignored and goes unresolved in the final recommendations.

THE IMPORTANCE OF THE QUESTION has been underscored repeatedly. Former Secretary of Defense Thomas S. Gates, jr., pleading last year for recomputation legislation, told Congress that the "traditional relationship of retired pay to active duty pay is probably the oldest long-term incentive in the military pay system." He said the '58 Pay Act was "not sufficiently unique" to justify a departure from the traditional policy.

THE FAILURE OF THE PROFESSORS to come to grips with the question will not be easily understood by those who favor the recomputation proposal. The University group said it found no "persuasive" arguments for basing retired military pay on active duty pay. But this is begging the question. Persuasive arguments are not always the criterion for every clause in a contract, but this makes the contract no less binding.

ANOTHER INCONSISTENCY in the University report is the Committee's recommendation that "the cost of living method of increasing retired pay should be retained and . . . continued in the future" but that "all possible assurances should be given retired personnel and active duty personnel that no major changes are contemplated in the retirement system." These two recommendations are incompatible. A shift to the cost-of-living method to affect pay increases for those on the retired rolls would, in itself, be a major change.

ONLY THOSE RETIRED prior to 1 June 1958 are receiving the six percent cost-of-living boost. Pay for those who have since retired and those who will retire in the future is based on current active duty pay scales.

SURPRISINGLY, answers to the University questionnaire on retired pay disclose that Army officers (the only group whose answers were analyzed in terms of length of service) who "intend to leave the Army are not predominantly men who have developed valuable skills in the Army that are transferable into lucrative civilian jobs. Rather, the intention to leave the Army is associated with a feeling of lack of development of skills and abilities."

WHAT THIS MEANS in terms of career attractiveness is summed up by the Committee in this sentence: "Development of a meaningful, purposeful skill, then, would seem to be one way of insuring a commitment to the military, a commitment that keeps an officer in the military even though he feels the skill could be utilized in civilian life."

COMMENTING ON THE MILITARY PROMOTION SYSTEM, the Michigan Committee said one point that "deserves special emphasis" is the fact that the system "provides a broad base for the selection and development of military leaders." The report observes that leadership in the military must be recruited from within the organization, whereas private corporations can re-invigorate themselves by outside recruitment of top managers. Since military leaders must be found within the military establishment, the Committee said, "it is crucial to have an internal career management system that will provide them."

THE BUTCHERS BOARD, convened 1 June to select new Army colonels, is running slightly over the 40 days originally planned. The board, headed by Provost Marshal General, Maj. Gen. Ralph K. Butchers, was expected to report out momentarily this week as *The Journal* went to press. Names of those selected, the Army says, will be announced in September.

JCS CHAIRMAN LEMNITZER'S new quarters at Ft. Myer (see page 1) may have considerably less facilities than originally planned. Sizeable reductions have been proposed by the Army in an effort to trim down the estimated renovation cost from the present \$105,459.

COMPLETION OF THE FT. MYER HOUSE and another set of quarters nearby will bring to three the number of JCS members residing at Myer. General Lemnitzer's present home, Quarters No. 1, will be taken over by Army CofS Decker. Air Force CofS General Curtis E. LeMay, now residing at Quarters 63, Bolling AFB, will move into Ft. Myer's Quarters No. 8, when renovation work is finished on that house. The official residence of the Chief of Naval Operations is at the Naval Observatory on Massachusetts Avenue, Washington, D. C. Marine Commandant David Shoup resides at the Marine Barracks, 8th and I Streets S. E., Washington, D. C.

CUTBACKS IN MANPOWER authorizations at the D/A level have forced the Army to eliminate the Daily Intelligence Bulletin and the Daily Summary Cable. The latter provided overseas commanders with current intelligence.

SECDEF MCNAMARA is putting pressure on the Army to reduce the time lag in the RDT&E cycle. He says it is possible to take 12 to 15 months out of the schedule on many items, and has indicated that there is one piece of equipment where 33 months can be saved. This desire to save time in weapons development is a major reason why Secretary McNamara is pushing for a reorganization of the Technical Services. Action can be expected before year's end.

ARMY MODERNIZATION SHORTAGES have commanded top attention on Capitol Hill, but it's a fact also that the Marine Corps has troubles in this area. During this fiscal year, the Corps will get about \$203 million for weapons procurement. This is \$97 million short of its stated requirements. The current Marine Corps materiel inventory is valued at \$1.565 billion. The Army's inventory is about \$13 billion.

PLANS HAVE BEEN COMPLETED for establishment of an Air Force Academy Prep School at the USAF Academy site near Colorado Springs in September. During recent years, the Air Force has been sending prospective cadets to the Army Preparatory School at Ft. Belvoir, Va., and to a similar Navy facility at Bainbridge, Md.

A COLLEGE DEGREE IS a strong factor in selection for a Regular commission in the Air Force. In instructions to the field, the Air Force notes that "major commands should continue to emphasize the Air Force policy which gives priority consideration for selection of Regular officers to those Reserve officers on active duty who possess college degrees. As a result of this policy in the FY 1961 Regular line program 92% of the officers selected had college degrees. The 8% who did not have college degrees possessed outstanding records and most of them were engaged in educational programs leading to a baccalaureate degree."

ONE REASON FOR ENDING the application system for the augmentation into Regular Air Force ranks of line officers in their third through sixth year of service is the fact that many of the most deserving officers failed to apply. Screening the records of 3,197 Reserve officers in their second year of commissioned service who had not applied for augmentation, the Air Force found 1031 (91% of whom were non-

rated) which it wanted to retain. Almost 450 of these were later selected for augmentation and will be offered Regular commissions.

THE ARMY WILL RETURN to its pre-Civil War structure to provide medical support for its future ROAD divisions to be organized from the present Pentomic structure within the next two years. Under the ROAD structure, the division surgeon will be placed under the commander of the division's support command, who will usually be a quartermaster officer. The last time Army medical care activities were placed under the quartermaster was before the Civil War when its few ambulances were assigned to quartermaster control.

THE ROAD-MEDICAL MOVE has been strongly, but unsuccessfully opposed by senior Army medical officers who feel that removing the division surgeon from his role as an immediate advisor to the division commander jeopardizes battlefield medical care. They contend that medical care suffered during the 1958 Lebanon operation because of lack of coordination between senior commanders and the medical staff at the planning level. As a result of the Lebanon experience, former Secretary of Defense Gates ordered that a senior medical officer be included in the staffs of all unified and specified commands. The Army's new combat medical structure reverses, at least in part, the spirit of Secretary Gates' directive.

A STRAC-STRAF REORGANIZATION is under consideration. The plan would place active Army STRAF units directly under STRAC command, sizably increasing the strength of the Nation's "brushfire-war force." Reserve forces, with an increased two-to-eight week readiness, would perform the missions now assigned to STRAF.

THERE WILL BE NO MARINES assigned to the staff of General Maxwell D. Taylor, recently called from retirement to be Military Representative of the President. Besides Col. Julian J. Ewell, USA, assigned from the Office of the Deputy Chief of Staff for Operations as General Taylor's Executive Officer, other new officers on General Taylor's staff include: Col. L. J. Legere, USA, recently graduated from the National War College; LCDR. Worth H. Bagley, USN, a '61 graduate of the Naval War College; and Mr. Thomas Parrott, on loan from another Government agency. Selection of an Air Force officer for the staff was due as this week's *Journal* went to press.

TOO MUCH TRAVELING is the reason the Navy gives for shortening the tours of officers assigned to the Office of the Navy Inspector General, Washington, D. C. The Navy says that IG tours will be "18 to 24 months, with emphasis toward 18 months." Previously, they had been the normal "short tour" length of 24 to 36 months. "This shorter tour policy," the Navy says, "will compensate for the considerable time away from their permanent duty station which officers assigned to NIG experience."

THE COAST GUARD is replacing its famous 36-foot motor lifeboat by a new self-righting 44-foot steel hulled craft. Admiral A. C. Richmond, Commandant, reports that with the increase in pleasure boating in recent years, faster all-weather craft are needed. The old 36-footer, although reliable and seaworthy, cannot meet these standards. The 44-footers will be bought at a rate of 10 a year.

MILITARY PEOPLE, active and retired, will be interested in a new pamphlet entitled "Teaching: A Second Career." Designed to provide retiring military personnel interested in the teaching profession as a second career with information and facts, it is published by the Office of Armed Forces Information and Education in collaboration with the American Council on Education and the National Education Association. The pamphlet may be purchased for \$.30 by the public from the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C.

All-Service Concert

Lt. Col. Albert Schoepper, Director, Marine Band, has announced that the Fourth Annual Joint Armed Forces Symphony Concert will be held at the Potomac River Watergate at 8:30 P.M. Thursday, 27 July.

A highlight of Washington's summer concert season, the symphony orchestra is composed of instrumentalists from the Marine Corps, Navy, Air Force and Army Bands. The Marine Corps is coordinating the 1961 event, under Colonel Schoepper's direction.

Increased Life Insurance Protection With NO INCREASE IN PREMIUMS!

Now! \$20,000
Group Life Insurance
Only \$4.50 per month
Rates for Members Under 31 in Non-Flying Status... (Others See Schedule Below)

UNIFORMED SERVICES BENEFIT ASSOCIATION announces another important advantage to members. Rapid membership growth and efficient management by your NON-PROFIT association have made possible substantial increases in insurance coverage for most age groups. Check the new insurance schedule below.

- ★ Retainable After Separation or Retirement At Rates Per Schedule Below
- ★ Available To All Active-Duty Officers and NCO'S (E-4 Up)—All Services

COMPARE THESE ADVANTAGES MADE POSSIBLE BY USBA:

- No death claim exclusions
- Premiums waived in case of total disability
- Members share earned dividends
- Underwritten by MUTUAL BENEFIT LIFE INS. CO. OF N. J. Est. 1845
- Optional conversion to permanent insurance
- Dependent coverage—insure wife, children—\$1.75/mo. for all

U.S. ARMY INSTRUCTORS.

THE CONTINGENCY PROTECTOR

"Option Five"

Designed for the Officer who declined to elect an option under
USCOA or who prefers the Controlled Flexibility of Life Insur-
ance, the CONTINGENCY PROTECTOR is United Services
Life's answer to the problem described to us by thousands of
officers.

HERE'S HOW IT WORKS

Assume an Officer age 35, wife 32, youngest child 3, purchases
"Option Five." His allotment of \$38.30 (less than converting
\$12,500 of group at retirement) provides immediate coverage of
\$28,650 increasing yearly to retirement age 50.
If he dies before retirement the plan provides a lump sum of
\$10,000 and, after Social Security stops at child's age 18,
\$200 a month to his widow until age 62 when her Social Security
commences. Total benefits—\$46,000.
If death occurs between retirement and his age 65 the \$10,000
and \$200 a month start immediately. If he lives, the plan is
paid-up at 65, or much sooner by the use of dividends.

Issue Ages 31-45

UNITED SERVICES LIFE INSURANCE COMPANY
1625 Eye Street, N.W., Washington 6, D.C.

Please furnish details about your CONTINGENCY
PROTECTOR Plan

Dr. Witting Is Honored

Secretary of the Army Elvis J. Stahr, jr., has presented the Exceptional Civilian Service Award to Dr. Edward G. Witting, Deputy Assistant Secretary of the Army for Research and Development.

Dr. Witting, whose resignation will be effective 18 July, received a Ph.D. in physics from Johns Hopkins University in 1935. He began government service in 1940 with the Army Signal Corps, working on development of underwater sound equipment and other acoustic devices.

The Army's Assistant Secretary for R&D, Richard S. Morse, resigned last month.

L/C Hemperly Is Exec**At Ireland Hospital**

Lt. Col. Cecil W. Hemperly, MSC, has been assigned to Ireland Army Hospital at the U. S. Army Armor Center, Ft. Knox, Ky. He will be executive officer succeeding Col. Kenneth H. Reed, who retired.

Colonel Hemperly had been a member of the executive staff of Würzburg Army Hospital in Germany. He is married to the former Miss Marian M. Boyer of Port Royal, Pa., and has two children, John, 9, and Jan, 6.

Air Force Reorganizes Hq. Staff; Lt. Gens. Wilson And Bradley Get New Titles

THE Air Force has reorganized its Headquarters staff to parallel its command changes in the research and materiel areas.

Under the reorganization, the Officers of the Deputy Chiefs of Staff for Development and Materiel will become the Officers of the Deputy Chiefs of Staff for Research and Technology (DCS/R&T) and for Systems and Logistics (DCS/S&L), respectively.

The present incumbents of both these offices, Lieutenant Generals Roscoe C. Wilson (DCS/R&T) and Mark E. Bradley (DCS/S&L), will remain the same.

The Air Staff changes follow reorganization of the Air Research and Development Command and the Air Materiel Command into the Air Force Systems Command and the Air Force Logistics Command.

General Bradley's office will keep all of its former functions in addition to assuming some now performed by the former Office of the Deputy Chief of Staff for Development.

Part of the reorganization, not contained in the original Pentagon announcement, is the establishment of a Directorate of Systems Services under the DCS/S&L, to be headed by Brig. Gen. M. C. Smith. The Directorate will have charge of range and space-ground environment and support activities, control services to NASA, the Army and Navy, and standardize general engineering support for procurement items common to all weapons systems.

Official Text

Following is the complete text of the Pentagon announcement:

"Air Force Secretary Eugene M. Zuckert announced today that he had approved a reorganization of the Air Force Headquarters Staff. The reorganization is designed to improve the function of the Staff and to insure the most effective discharge of responsibilities assigned to the Air Force, including the newly assigned responsibilities for space.

"The reorganization of the Headquarters Staff follows closely recent changes in the field commands with the establishment of the Air Force Systems Command, the Air Force Logistics Command and the Office of Aerospace Research. The realignments in the Staff are the initial steps of a series to increase the planning and programming capability of the Staff and to streamline the review and approval channels for high priority programs.

"The principal change consists in combining staff responsibilities for development, procurement, and logistic support of aircraft, missile, space and electronic systems into one office called the Deputy Chief of Staff for Systems and Logistics (DCS/S&L) and in combining staff action on research, advanced technology, studies requirements and development planning into one office called the Deputy Chief of Staff for Research and Technology (DCS/R&T).

"Lt. Gen. Mark E. Bradley will be the new DCS/S&L and his office will assume all of the responsibilities previously assigned to DCS/Materiel. General Bradley will have two principal deputies—Maj. Gen. William O. Senter, Assistant Deputy Chief of Staff for Logistics, and Maj. Gen. Joseph R. Holzapple, Assistant Deputy Chief of Staff for Systems.

"The Director of Systems Acquisition under DCS/S&L, Brig. Gen. Milton B. Adams, will supervise the staff functions of development, procurement, production, and review of all system programs. Certain designated system programs such as Minuteman and the B-70 bomber will have individual system Staff Offices (SYSTO's), which will report directly to the Assistant Deputy Chief of Staff for Systems, obtaining only administrative support from the Director of Systems Acquisition. These specially designated SYSTO's will exist only during the critical phase of a System life cycle. At the appropriate time they return to normal status directly under the Director of Systems Acquisition.

"Both the Air Force Systems Com-

mand and the Air Force Logistics Command are now established as procuring authorities. To provide guidance for this program the DCS/S&L will have a Director of Procurement Management, Maj. Gen. William T. Thurman, responsible for establishing major policies and procedures for the field procuring agencies.

"Staff action on research, advanced technology, studies requirements, and development planning will be under Lt. Gen. Roscoe C. Wilson, the present Deputy Chief of Staff for Development. This office, retitled DCS/Research and Technology (DCS/R&T), will provide in-

creased emphasis on scientific research and technology in the Air Force. General Wilson's principal assistant will be Maj. Gen. Victor R. Haugen, Assistant Deputy Chief of Staff, R&T.

"Other principal assistants in DCS/R&T will be Maj. Gen. Marvin C. Demler, the Director of Advanced Technology; Brig. Gen. Ralph L. Wassell, the Director of Research, and Maj. Gen. William B. Keese, the Director of Development Planning.

"The Office of DCS/R&T will be responsible for the preparation of long-range plans, policy and objectives for Air Force research. It will monitor and provide guidance and support of the Air

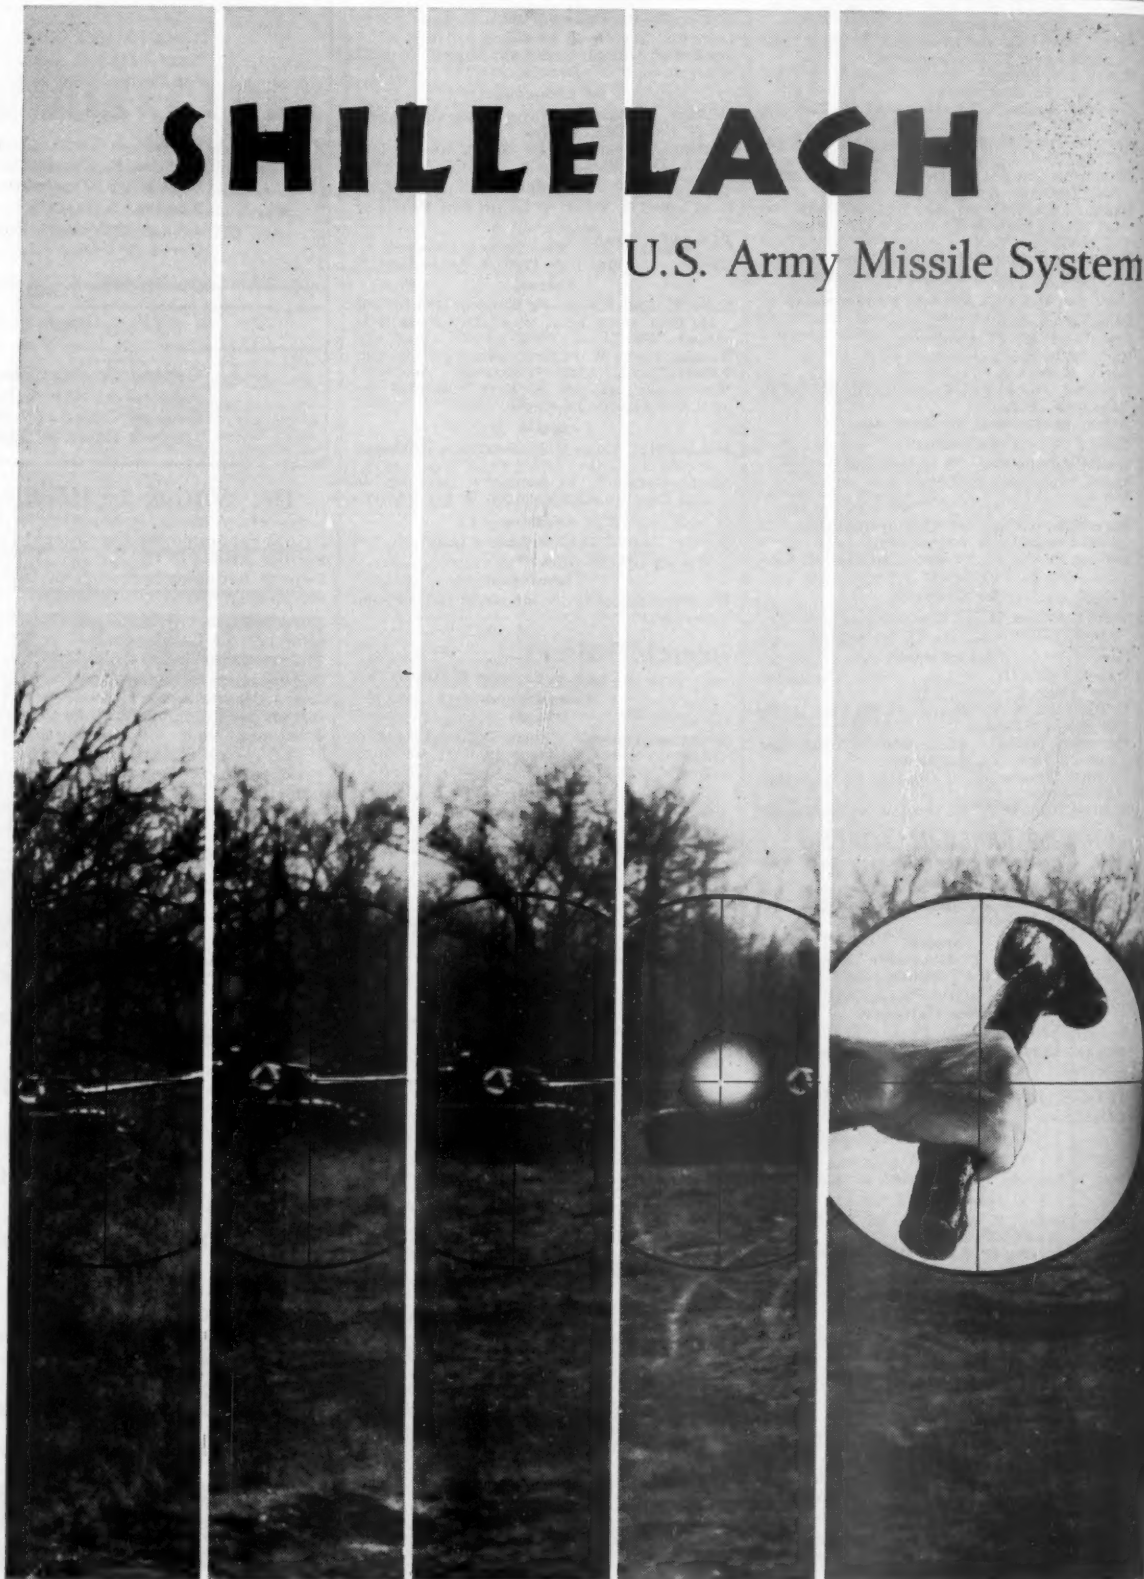

Force Development Study Program, Basic Research and Applied Research Programs.

"Also, it will identify and support technical advances which show promise of increased capabilities. In addition, it will be the military focal point in the Air Force for scientists throughout the nation and provide a point for scientific and technical interaction with similar scientific government agencies such as AEC and NASA.

"These staff changes are not anticipated to have an impact on numbers of personnel other than functional transfers to achieve the new staff groupings."

SHILLELAGH

U.S. Army Missile System

The SHILLELAGH is being developed for the U.S. Army under the over-all direction of the U.S. Army Ordnance Corps.

Lump-Sum Pay Check Proposed For Those Retiring After 20 Years

MEMBERS of the Armed Forces who retire after at least 20 years' service should be given an opportunity to accept up to half of their retirement pay in a single, lump-sum check.

This change in retired pay laws, recommended by the University of Michigan Study Committee, would, the Committee states, help Service personnel to meet the immediate expenses of their transition to civilian life.

The lump-sum payment would be optional and those who elected to receive it would have their monthly retirement checks reduced proportionately.

The Committee said the transfer of retired personnel to civilian life could be "facilitated" if the retirement system were made more flexible. "The burden of transition is greatest in the months following the individual's retirement from the Service" and he "should be given options, including the receipt of a partial lump sum payment, (with a corresponding reduction in his monthly pension), to help him make the transfer to civilian life."

The Michigan group said retired pay for many officers in the 20-year group "is essential to prevent serious income loss

during the shift to civilian employment and to maintain an attained economic position after employment is secured. Except for those officers who have either professional training or specific, transferable skills that are in demand in the labor market, most officers find it difficult to secure employment which, in addition to their retired pay, does little more than maintain the economic position which they had reached in the military."

Enlisted personnel, the Committee said, "may fare relatively somewhat better than officers" because those who

retire after 20 years' service normally do so at an earlier age than officers. And, too, "many enlisted personnel learn specific skills which can more easily be transferred to the civilian labor markets."

On the other hand, the Committee said, enlisted personnel are not always able to "utilize these advantages to the fullest extent because of 'lack of labor market information and counseling.'"

The Committee observed hopefully that the changing military technology may develop more officer skills "that are transferable to the civilian labor market," and pointed out that increasing Service emphasis on higher education also may "make it easier to transfer from military to civilian occupations."

But "there can be no doubt," the Committee stated, "that at the present time most officers and enlisted personnel must have retired pay in order to maintain the economic position which they have attained and for which they have made sacrifices."

ARMY ELIGIBLES

The Army announces in Circular 624-64 the names of Army, JAGC, Chaplain and WAC list lieutenant who are eligible for promotion consideration to temporary captain.

The board met 5 July.

The "fully qualified" method will be used.

The zones of consideration cover those with AUS promotion eligibility date of 30 June 1959 for the Army (minus JAGC) and WAC lists, and 31 December 1960 for the JAGC and Chaplain officers.

The United States Army SHILLELAGH surface-to-surface guided missile—like its Irish namesake—will be simple, reliable... lethal. Against enemy targets—moving or stationary—SHILLELAGH's accuracy and firepower will provide the U.S. Army a devastating new weapon that kills with a first-round probability approaching unity... and at ranges never achieved in antitank warfare. SHILLELAGH is now under development at Aeronutronic, prime contractor on this advanced weapon system.

AERONUTRONIC DIVISION *Ford Motor Company* DEFENSE PRODUCTS GROUP
FORD ROAD, NEWPORT BEACH, CALIFORNIA

SHILLELAGH is one of many advanced programs currently under development at Aeronutronic's new, million-square-foot Engineering & Research Center at Newport Beach in Southern California.

Write for information about Aeronutronic's capabilities and career opportunities now open for engineers and scientists.

2d ARADCOM Region To Oklahoma

A new Region area of the Army Air Defense Command will be established in Oklahoma City, Okla., it is announced by Lt. Gen. Robert J. Wood, CG at Colorado Springs headquarters.

Purpose of the move is to locate Army Air Defense region headquarters nearer to the North American Air Defense Command region headquarters which will be located at Oklahoma AFS as of 1 August.

The designation of the new headquarters will be 2d Region, ARADCOM. It will control Army Nike units now operational in Texas, Louisiana, and Georgia. The 2d Region, ARADCOM, headquartered at Ft. Meade, Md., will be moved to Oklahoma City with its history and colors, but less personnel and equipment.

The present area of the 2d Region will be placed under the control of the 1st Region at Ft. Totten, N. Y.

Maj. Gen. Dwight B. Johnson, who was CofS of ARADCOM in Colorado Springs from 1956 to 1959, will assume command of the 2d Region upon its relocation to Oklahoma City.

Complete Text Of Pay Recommendations

From page 10—

retention of typically effective officers. In this regard, the Committee believes that it is necessary to maintain the present levels of benefits but it also believes that it is necessary and desirable to develop means of making the system more flexible.

Retention of Short-Term Officers— Filling the needs for short-term officers falls mainly on reservists who are kept on extended active duty and who must face the possibility of separation through reduction in force, without any reflection on their officer efficiency. Separation pay ("re-adjustment pay") is an important compensation for these reserve officers. On the basis of equity and in order to retain the best officers, it is recommended that separation pay for reserve and regular officers be computed on the same basis.

However, all services have a greater need for short-term officers who will serve from 5 to 13 years. The present system of two or four-year tours of duty of reserve officers, plus the resignation of academy officers after obligated duty, is costly and the services are seeking to reduce these losses through modification in their personnel practices.

The Committee believes that Congress should give permissive legislation to the services to recruit and to guarantee officer employment status for approximately ten years, which would carry with it guaranteed pension rights, available optionally in lump sum payment. No officer would be eligible for both such pension and separation pay.

Retention of Long-Term Officers— The cost and the effectiveness of the military retirement system cannot be separated from the personnel and promotion system of the armed forces which is designed to maintain a flow of young officers through the rank system in order to meet basic military and leadership needs. The system of early retirement, twenty years' service as the typical career with smaller numbers being retained for thirty, is recognized as being vital to maintaining a promotion flow and an incentive system.

Nevertheless, the Study Committee believes that modification of these personnel practices for technical, logistical personnel should be undertaken in order to retain, outside of the promotion flow, officers whose skills remain valuable to the military. It is clearly recognized that increased length of service increases military retirement benefits, but we have concluded that selective modification of the early retirement will reduce such costs as training and replacement costs, and thus reduce total costs.

Retention of Enlisted Personnel— The level of military retirement benefits for enlisted personnel appears to operate effectively in stimulating retention for those who elect to enter into a first re-enlistment term. It is doubtful whether military retirement benefits could be modified so as to increase the first re-enlistment rate.

The military retirement system works, on the other hand, to stimulate enlisted men to separate from active service after twenty years of service. Because of the favorable retirement benefits, the Committee does not see how this situation could be corrected, except by increasing the number of super grades for noncommissioned officers and thereby encouraging the most qualified to continue on active duty and by selective promotion to limited duty officers.

Economic Security

Military retirement benefits in part constitute deferred pay. The Study

Committee concluded that the present level of retirement benefits are essential to compensate officers and enlisted personnel for the costs involved in making a transition to civilian life. Thus, the rising costs of military retirement must be seen as deferred costs of World War II and the Korean conflict and the present national security requirements.

While a few officers are able to earn substantial salaries after retirement, our data reveal that for the bulk the deferred payment constitutes a real compensation for decreased earning power associated with making a career shift in mid-life.

The Committee rejected the idea that for present or future retired military personnel, their military retirement pension should be adjusted in terms of their civilian income. This would appear justified only in a very few cases where retired officers on the basis of their military experience were able to earn a very high salary. Any such arrangement would not significantly reduce the costs of the retirement system but would have the effect of weakening confidence in the equity of the system.

The Study Committee rejected the idea of a contributory system, since military personnel contributions would in effect constitute a decrease in pay for those already on active duty and would probably reduce costs little if any.

The Committee believes that the economic security aspects of military retirement would be enhanced by a more flexible system of options. For some officers and enlisted men, the burden of transition to civilian life falls hard during the first years after service. Among the options which should be permitted would be a partial lump system plus a reduction in monthly payments up to one-quarter or one-half of basic monthly benefits.

The Study Committee also recommends the gradual elimination of the difference in method of computing retirement benefits as between officers and enlisted men so that the reserve service is taken into consideration for enlisted men.

Since the military retirement system is both a deferred pay and an old-age pension system, retired pay requires adjustment to meet changing social and economic circumstances. The Committee recommends that these adjustments be based on a cost-of-living concept rather than by changing retirement pay in terms of modification of the military pay scale.

Utilization of Retired Military Personnel

The Study Committee recognized that the problems of shifting retired military officers and enlisted personnel to civilian assignments will increase as the number of retired personnel grows and as the labor market changes during the coming decade.

The Committee recommends a strengthening of the vocational counseling services in the armed services and the Department of Labor in order to assist in the transfer from military to civilian employment. A central part of this service should be the development of meaningful "experience records" for each retiring military person.

A continuing program of research in the Bureau of Employment Security should be directed toward the specific problems which hinder the full utilization of military skills and experience in the transition from military to civilian careers.

The Study Committee recommends that the Department of Defense hold a biennial assembly on the problems of utilization of retired military personnel. Such a conference should as-

sess recent experiences and serve as a channel of information to civilian employers who need to be informed of the skill potentials of the retired military personnel.

The Study Committee believes that modification of the Dual Compensation Act is required. This is a case where the present rule which exempts the reserve officers who have served on extended active duty from the Act is clearly discriminatory against the regular officer. Modification of the Dual Compensation Act is desirable in order to make available to the federal government a group of trained personnel who are interested in governmental service, including overseas service. Since military retired pay is in part deferred pay, the Study Committee recommends liberalizing that portion of the pension an officer may still receive while earning a federal salary.

Disability Pensions

Because of the absence of adequate actuarial data, and because of the complexity of the problem the Study Committee does not make any definitive recommendations but offers a new approach as the basis for further exploration. The concept provides that for disabled personnel, their retirement pay should consist of two components. One component would be based on rank and length of service; the second component would be based on the extent of disability. In any case, there should be a minimum retirement pay for personnel with disability of thirty percent or more, regardless of their rank or length of service.

The Committee believes that while this system, as described in greater detail in the report, would probably be somewhat more expensive than the present system, it would be more equitable. The Study Committee urges that a system of periodic review of the extent of the disability be instituted, (as is done by the Veterans Administration), and that there be a mechanism by which military personnel be permitted to appeal judgments which they believe are too low.

Procedural

The military retirement system involves a complex body of rules and regulations. The changing conditions of military life constantly require modification by administrative rules and regulations under legislative control. The day-to-day arbiters of the system are government officials who administer the system within the Department of Defense and the armed services, while the Court of Claims and the Government Accounting Office serve as administrative review agencies. In most large pension systems, there exists a board of review and appeal to handle special cases and undefined questions. The Committee recommends that a high level, part-time military retirement board be appointed as a review board. This board ought to have jurisdiction over medical disability appeals as well.

In the years ahead the military retirement system will require periodic reassessment, as military requirements change and as the structure of American economy changes. The future of military retirement is closely linked to developments in the federal civil service and in the civilian economy. More basic information and fundamental research are needed not only for the military but for guiding public policy. It, therefore, is recommended that Congress establish in the Department of Health, Education and Welfare a unit on retirement and social security standards to collect basic information and conduct such research.

Committee Tells Reasons For Rejecting Contributory Retirement For Services

IN rejecting the idea of a contributory retirement system for the Armed Forces, the University of Michigan Study Committee said "military contributions would in effect constitute a decrease in pay for those already on active duty and would probably reduce costs little if any."

The Committee found that there has been a "substantial trend toward non-contributory retirement plans for U. S. workers over the past decade and that it is 'likely' that more are covered under such plans than under contributory plans."

Here is the full text of the Committee's discussion of contributory vs. non-contributory retirement plans:

"In any retirement system the question arises as to whether the financing should be arranged on an employer-pay-all basis or whether the employees also should make direct contributions. In the latter case the plan is commonly called a 'contributory' plan. This question is still a highly controversial one in both the private and the public pension fields."

"Because there are actuarial, financial, economic, psychological, public relations, and tax aspects to be considered, it is clear that the problem is not a simple one. Although complete statistics are lacking, it is fairly safe to say that a large majority of public retirement plans are contributory. In the case of private plans, perhaps a majority are contributory, but most of the larger ones are non-contributory; thus it is likely that there are more employees covered under non-contributory plans."

"Furthermore, during the past decade there has been a substantial trend in the direction of non-contributory plans. Not only are the new plans largely of this nature, but many of the older plans which were established originally on a

contributory basis are being converted to the non-contributory type. There is little movement in the opposite direction. The conversion of an existing private pension plan to a contributory basis without a corresponding increase in benefits would likely be looked upon as a wage cut and hence resisted strongly."

"The military retirement system in the United States has always been on a non-contributory basis. Furthermore, the payments of pensions have been made on a pay-as-you-go basis without any advance funding whatever."

"The standard arguments in favor of contributory plans may be summarized as follows:

"1. Lower direct cost to the employer.
"2. Possibility of a higher benefit level if an employee shares in the cost."

"3. Greater understanding and appreciation of the retirement plan by the employee if he shares in the cost."

"4. Belief that contributing a portion of the cost gives an employee a 'contractual right' to his pension."

"At first glance it would appear that if the employees contribute toward the cost of a pension plan the cost to the employer will be less. Before discussing the question of whether this is a real or an illusory saving, let us consider its possible magnitude."

"The cost of providing a lifetime pension of \$175 per month to a person retiring at the E-7 grade is \$43,300. Had this enlisted man contributed 6 1/2% of his salary during the previous 20 years, assuming a normal progression through the ranks and the current base pay level, the total of his accumulated contributions with interest would be about \$4,650."

"Correspondingly, a lieutenant colonel retiring after 20 years with a pension of \$375.50 per month, costing al-

most \$85,000 would have contributed, including interest, about \$9,500 had a 6 1/2% contribution been deducted from his pay at the current levels for the last 20 years."

"The accumulated contributions in each case would provide only about 11% of the cost. It can be seen from these illustrative figures that no major saving to the government would be possible through the establishment of a contributory system."

"However, this is not the whole story. The current military pay levels are based upon the assumption that nothing will be deducted for retirement costs. These levels have been carefully determined so as to attract and retain the capable men upon whom our national security depends. It is hardly likely that a further reduction in take-home pay could be made without seriously impairing the morale of the forces and promptly requiring an increase in the pay scale to offset this additional cost. Even in civilian life it has often been found that when a contributory pension plan is installed, a general pay raise is required to cover part or all of this deduction."

"An almost universal requirement of a contributory pension plan is that a careful account be maintained for each individual employee and that he or his beneficiary be permitted to receive the accumulated value of his contributions, with interest, at the time of his withdrawal or death prior to retirement."

"In other words, for the employees who do not stay with the system until they eventually reach retirement, a contributory pension plan is simply a forced savings plan. It can easily be seen that if the United States Government were forced to increase military pay scales to take into account a deduction for a con-

tributory retirement plan, the immediate cost probably would be much more than the present cost because a good deal of the additional pay would be going to people who would not remain in service long enough to retire."

"Even if the government were to raise the pay of each individual by an amount equal to his contribution to the pension plan, this increase would still leave the employee with less take-home pay than he now has because out of each additional dollar paid to the employee, there would be additional income tax of, perhaps, from 20 to 30 cents. Thus the employee in the minimal 20% tax bracket would have to receive a raise of \$1.25 for every dollar that he was required to contribute to the pension plan if he were not to receive less take-home pay than he now enjoys. For the officer in the 30% bracket, the figure would be \$1.43."

"Another cost to the government which would have to be taken into account as an offset against any problematical saving would be the administrative costs. The Armed Services would be in the position of running an enormous savings bank with accounts for some 2 1/2 million persons and with a heavy turnover among its customers. Such activities would require a further cost to the taxpayer or a diversion of money from more important defense purposes. Thus, it can be concluded that any saving in retirement costs by introducing a contributory provision is small at best and possibly non-existent."

"There appears to be little cogency in the argument that the serviceman would have a greater understanding and appreciation of the military retirement system if he were to have deductions made in his pay for retirement in addition to the deductions for other rea-

L/C Weltmer Is Exec

Lt. Col. Noyes Weltmer, Jr., has been assigned as Executive Officer of the Plans Division, G-3 Section, at Army Air Defense Command Headquarters, Colorado Springs after duty as Deputy Commander of the I Corps Support Command in Korea. He and his wife, and their two children are living at 1412 E. Monument St.

10-Year Tour, Pensions Proposed For Non-Regulars

sons already in effect. The argument may have some weight in the case of some private plans where communication between employee and employer is not very good.

"The Study Committee found, perhaps because of the nature of the organization, that military personnel at all levels appear to have a good understanding of the retirement provisions and an appreciation thereof far surpassing that which is commonly found in the case of civilian employees.

"It is difficult to evaluate the argument that the military man would have a 'contractual right' to his pension or at least a feeling that he had such a right if he made direct contributions toward the system. It is fairly evident to the Study Committee that such a feeling already exists. It appears unlikely that the contribution by military personnel of a small fraction of the total retirement costs could change that feeling very much.

"The Study Committee concludes, therefore, that the Congress should not adopt a contributory pension system for the military. It would produce little, if any, cost savings and its effect upon military morale might be adverse."

¹A recent study by the American Management Association quoting results from earlier studies pointed out in a study of 550 plans in 1948 it was found only 26.9% were non-contributory. A study of 491 plans in 1952 found 34.5% non-contributory and the current study of 1960 of 127 plans found 48.0% non-contributory.

²The 6 1/2% rate was chosen arbitrarily because it is used in some governmental retirement plans and because it appears to be a practical maximum rate of contribution. Obviously, if the contribution rate were lower, an even smaller fraction of the total cost would be provided from employee contributions.

TEN-YEAR obligated tours of duty with a "guaranteed pension," payable either in monthly installments or in lump-sum, have been recommended by the University of Michigan Study Committee as a means of satisfying Service requirements for short-term officers.

The Committee said military retirement needs to be adjusted to the changing manpower needs of the Services in order to make it "a more effective instrument of personnel policy."

Although military manpower needs "vary from service to service," the Committee observed, they "have certain common features."

"All services—the Navy, the Army, the Air Force, and the Marines—have an increasing need for short term officers who will serve from 5 to 13 years. But the most important reason for this development is the new skill and training requirements which greatly increase the time before an officer becomes valuable to the service.

"At present, many reserve officers serve only a two- to four-year tour of duty and some academy graduates resign immediately after completion at their obligated duty. This system is costly and inefficient. The services are seeking to modify these personnel practices and to overcome shortages of officers in the five- to 13-year category."

The Committee said "The military retirement system might prove to be a powerful instrument for assisting the armed services in dealing with this personnel problem. The short-term career should be viewed as the first step in a two-step career. In particular, the Study Committee believes that Congress should give permissive legislation to the services to recruit and guarantee, under

contract, officer employment for approximately 10 years which would carry with it specified pension rights. These pension rights would be based on length of service and base pay and might be paid in a lumpsum."

Such legislation, the Committee said, "should apply to all services, although it would probably have to be administered differently in each service depending on their personnel and military needs."

"These pension rights should be equal for all officers, regardless of the type or source of commission. They should be available only to those officers who obligate themselves for such duty and the military retirement benefits should include an option of a lumpsum payment."

The Committee also touched on the

subject of separation (or "readjustment") pay and urged that it be made uniform for both Regulars and Reservists pending action on the 10-year-obligated-tour proposal.

"Currently," the Committee observed, "responsibility for filling the needs for short-term officers falls mainly on reservists who are kept on extended active duty and who must face the possibility of separation from reduction in force, without any reflection on their officer efficiency."

"Extending the obligated tour of duty and guaranteeing pension rights for those under short-term contracts would eliminate the necessity of separations pay for officer personnel whose services are no longer required and who have not served 20 years."

As long as separation pay and readjustment pay are maintained as a standard personnel policy, however, the Committee said "on the basis of equity and in order to retain the best officers, it is recommended that separation pay for reserve and regular officers be made equal."

Name RAdm. Eastwold To Carrier Division 16

RAdm. Earl Russell Eastwold will relieve RAdm. John Edward Clark as Commander Carrier Division 16 later this month.

No orders have been issued yet for Admiral Clark who took command of Carrier Division 16 in Dec. 1959, with dual responsibilities as Commander Anti-submarine Defense Group ALFA and Commander Hunter Killer Force, U. S. Atlantic Fleet.

Admiral Eastwold will report to his new assignment from the Navy Department in Washington where he was Director, Strike Warfare Division, Office of the Chief of Naval Operations. A date for the change-of-command has not been announced.

Capt. Shaver Heads Bethesda Medical School

Capt. John S. Shaver, MC, USN, has assumed command of the Naval Medical School, National Naval Medical Center, Bethesda.

He relieves Capt. Malcolm W. Arnold, who has retired after more than 30 years service.

Before taking his new command, Captain Shaver, a Pearl Harbor veteran, was director of Laboratory Services at the school.

SERVICE FAMILY NOTES

Louise B. McGiffert
Family Editor

Bertie Johnson
Associate Family Editor

PROMOTION ceremonies at Walter Reed General Hospital last week for **Brig. Gen. Floyd L. Wergeland**, Commanding General of the hospital, to two-star rank, were highlighted by the orders being read by General Wergeland's son **2d Lt. David A. Wergeland**, now serving as aide-de-camp to Maj. Gen. Clinton S. Lyter, Commanding General of Walter Reed Medical Center. General and Mrs. Wergeland are also the parents of **Capt. Floyd L. Wergeland, Jr.**, who is now a resident in Ophthalmology at Walter Reed.

Mrs. Arthur J. McBride, wife of Colonel McBride, commander of the 4th Brigade at Ft. Ord, Calif., for the past two years, was honored by the officers' wives of the Brigade at a coffee. The McBrides have since left for Oklahoma City, Okla., where he will be senior advisor to the Oklahoma National Guard.

The group also said farewell to **Mrs. Don M. Davis** who is leaving for Hawaii with her husband, 1st Lieutenant Davis, former commanding officer of Company C, 14th Battle Group.

Mrs. I. E. Willis, wife of Commander I. E. Willis, Commanding Officer, US Naval Security Group Activity at Bremerhaven was bid farewell at a tea given by the Bremerhaven Navy Officers Wives Social Group. Commander and Mrs. Willis will be leaving 25 July for Washington D. C., where he goes on duty with the Naval Security Group Headquarters. The couple will take up residence in Chevy Chase, Md.

A farewell tea was given recently by the US Air Force Family Services Organization, the Air Force Officers Wives Club and the Air Force Enlisted Wives Club, US Army Port of Embarkation, Bremerhaven in honor of **Mrs. Jonathan Leet**, wife of Col. Jonathan Leet, Commander of the 6913th Radio Squadron Mobile. Colonel and Mrs. Leet have since left for a new assignment in the Mediterranean Area, where Colonel Leet will become base commander.

Six Fort Carson sons and daughters were among 13 seniors who received scholarships at recent graduation exercises of the Fountain-Fort Carson High School.

Karen Dawalt and **John Dawson** each won joint honor scholarships to the University of Colorado. **Darrell Musick**, **James Beard** and **Cornelius Martinez** won athletic scholarships to Otero Junior College at La Junta, Colo. **Carol Ryan** received a Charles A. Kettering National Merit Scholarship at the University of Colorado.

Miss Dawalt is the daughter of Col. and Mrs. Kenneth F. Dawalt. The colonel left Carson July 1 for assignment in Okinawa. Dawson is the son of S.Maj. and Mrs. Jack L. Dawson.

Miss Ryan is the daughter of former

Capt. Charles Ryan of missile command. Musick is the son of Lt. Col. and Mrs. H. M. Page, command adjutant general. Beard is the son of Sgt. and Mrs. Clarence Beard. Martinez is the son of Moses Martinez, a Carson civilian employe, and Mrs. Martinez.

Cdr. Richard P. Pawson, USN, was recently awarded the US Army's Commendation Medal by his division chief, an Air Force major general. The unique presentation was made in Paris by Maj. Gen. C. J. Bondley, Jr., USAF, Director of J-4 at USEUCOM, in the presence of Mrs. Pawson and other division officials.

Commander Pawson was cited for outstanding contributions while working in the Procurement Branch of USEUCOM's J-4 Division.

Mrs. Pawson is the former Jane Hasch, daughter of Mr. and Mrs. A. C. Hasch of Lytton, Iowa. Their two children, Kathy, 14 and Bruce, 13, attended Paris-American High School during the Pawsons' Paris assignment. Upon their return to the U. S. for Commander Pawson's new assignment in Washington, the family will reside in Springfield, Va.

RAdm. George H. Wales, Commandant, Third Naval District, has accepted checks totaling more than \$22,000, proceeds from the annual Navy Relief Society drive conducted 1 March through 7 June at the U. S. Naval Receiving Station, Brooklyn and the U. S. Marine Barracks, New York Naval Shipyard, Brooklyn. Capt. James W. Brock, Commanding Officer of the Receiving Station, and Col. Walter F. Laver, Commanding Officer, Marine Barracks, made the presentation.

The 1961 college scholarship presented by West Point's chapter of the Daughters of the United States Army was awarded to the 17-year-old son of a sergeant stationed at West Point, N. Y. The \$1,600 scholarship was given to **Roger Martin Pell, Jr.**, son of SFC and Mrs. Roger M. Pell. SFC Pell is an instructor in the Infantry section of the U. S. Military Academy's Office of Military Instruction.

The award to Pell marked the second in an annual series of scholarships presented by the West Point Army Daughters.

Robert Davis Offer, Jr., son of Colonel Offer, USMA '38, and Mrs. Offer, received a bachelor of science degree in chemistry from The Citadel, Military College of South Carolina. A Distinguished Military Student and on the Dean's List academically, he was commissioned a 2d Lt., Artillery, Regular Army, and is on duty with the 56th Artillery Group, Ft. Bragg, N.C. Lt. Offer is the grandson of Mr. and Mrs. Leigh L. Nettleton, Washington, D. C., and of Maj. and Mrs. Irving D. Offer, USA-Ret., of La Jolla, Calif.

The Fort Dix Commanding General **Reuben H. Tucker, III**, has received the twin stars of Major General. On hand to pin on the new stars were Lt. Gen. Edward J. O'Neill, Commanding General, First U. S. Army, and Mrs. R. H. Tucker. Three of the Tucker family, Glenn, Scott and Chris and all senior officers at Fort Dix were also present for the occasion.

Chaplain (Lt. Col.) Ernest E. Northern, Jr., and Mrs. Northern, Ft. Hamilton, N.Y., celebrated their silver wedding anniversary in June. At the same time, he marked the 30th anniversary of his ordination to the ministry in June. Chaplain Northern will retire in November. The couple has three children. The oldest son, Sp5 Paul Northern, is serving with the U. S. Army Field Band at Ft. Meade, Md. and Pauline and Joseph live at Hamilton.

Thomas M. Curtis, 16, a junior at Leavenworth Senior High School, was selected by the U. S. Olympic Development Committee to attend a sports clinic in San Antonio. Some of the clinic instructors were members of the 1960 U. S. Olympic team. One of these is Navy Lt. Bob Beck from Annapolis who won third place in Rome last year. Tom lives with his parents, Lt. Col. and Mrs. Elmer P. Curtis, and sister, Kathy, 17, at 208 Meade

Ave., Ft. Leavenworth, Kan. He is the grandson of Mrs. Margaret E. Curtis, 620 Southard St., Key West, Fla., and of Mr. and Mrs. H. R. Brown, Santa Rosa Ave., Santa Rosa, Calif.

Mrs. James P. Marley, wife of the late Major General Marley, is making her home at 504 B. Bellevue Place, Austin Tex. She is active in The Texas Poetry Society, the Austin Poetry Society, the Austin Kwill Klub, is Chaplain for The Austin Colony Chapter, D. A. R., and President of The Austin Harmony Club. She won the Georgia B. Lucas Annual Kwill Klub Prize for a Short Story, and won second place in three entries of the Annual Contest in the Austin Poetry Society.

Medi Care Chief Is B/G

The Executive Director of the Office for Dependents' Medical Care, Col. W. D. Graham, has been promoted to brigadier general.

General Graham, a 1931 graduate of the Medical School of the University of Minnesota, received a Master of Public Health degree from the University of California in 1949.

The General, his wife, Dorothy, and daughter, Ann, are living at The Dorchester, 1900 Columbia Pike, Arlington, Va.

Service Weddings and Engagements

GENERAL (USA) and Mrs. Bruce C. Clarke of Heidelberg, Germany, announce the marriage of their daughter,

Elisabeth Jean, to Lt. Arthur Ludlow Clark, II, USMC, son of RAdm. (USN) and Mrs. Thurston B. Clark of Norfolk, Va. The wedding took place 24 June at the NAS, Chase Field, Beeville, Texas.

Mrs. Clark, a graduate of Westhampton College of the University of Richmond, is the daughter of the Commander-in-Chief of the U. S. Army in Europe and Commander of NATO's Central Army Group. Her bridegroom, a Marine Aviator, whose father is Commander, Fleet Air Wings, Atlantic Fleet, and Commander, Fleet Air Wing Five, is a graduate of Princeton University. He is now undergoing Advanced Flight Training at Chase Field.

DITTMAR-TIBBS — Col. (USA) and Mrs. Richard B. Tibbs of Ft. Belvoir, Va., announce the marriage of their daughter, Carolyn Lucile, to 2d Lt. Richard Stuart Dittmar, son of Dr. and Mrs. Stuart W. Dittmar of Chambersburg, Pa., in a late afternoon ceremony at the Post Chapel, Ft. Belvoir, 22 June.

The bride chose as her attendants Misses Joy and Gayle Dittmar, sisters of the bridegroom. Mr. James Christie was best man.

Mrs. Dittmar is a June graduate of Middlebury College in Vermont, where she was a member of the Delta Delta Delta sorority, the Mortor Board and was elected to Phi Beta Kappa. Her father has been the Staff Judge Advocate at Ft. Belvoir, but her parents will sail 24 July for his new assignment at Headquarters, U. S. Army Hawaii. Her husband is also a June graduate of Middlebury, where he was a member of the Kappa Delta Rho fraternity and was an Army Distinguished Military Graduate.

The couple are now making their home at Ft. Dix, N. J., where the bridegroom is initially assigned.

VATTER-MENOHER — Col. (USA-Ret) and Mrs. William Menoher of 130 Magnolia St., Westbury, L. I., N. Y., announce the marriage of their daughter, Susan, to Mr. R. R. Vatter of Chicago, Ill., at Silver Spring, Md., 9 June.

Mrs. Vatter is the granddaughter of the late Maj. Gen. Charles T. Menoher, USA-Ret, and Mrs. Menoher of New York

City, and of Brig. Gen. (USA-Ret) and Mrs. Alexander M. Owens of Avon Park, Florida.

RICHARDSON-SULLIVAN — Mr. and Mrs. Philip C. Sullivan of Newport, R. I., announce the engagement of their daughter, Leslie Anne, to Lt.(jg) Daniel Charles Richardson, USN, son of Mr. and Mrs. N. W. Richardson of Pueblo, Colo. Miss Sullivan is a graduate of the University of Rhode Island's School of Nursing. Her fiancé is USNA '59. An August wedding is planned.

BOYDEN-CALENDER — Maj. (USA) and Mrs. Allie D. Calender of 12697 Woodford Way, Bridgeton, Mo., announce the engagement of their daughter, Alita Ann, to 1st Lt. Richmond Pearson Boyden, USA, son of Brig. Gen. (USMC-Ret) and Mrs. Hayne Davis Boyden of 251 Fairway Dr., Asheville, N. C.

Miss Calender, who studied in Japan, is employed as a secretary with the Army Transportation Materiel Command at St. Louis, Mo. Her fiancé, a graduate of North Carolina State College and MIT, is currently stationed with the Command.

A Fall wedding is planned.

SEYFARTH-SMALLEY — Col. (USA) and Mrs. Howard N. Smalley of 539-B Simonds Loop, Presidio of San Francisco, announce the marriage of their daughter,

Barbara, to Ens. Robert Ernst Seyfarth, USN, son of Mr. and Mrs. Ernst Seyfarth, West Newton, Mass., at the Presidio Chapel, 17 June, in an early afternoon ceremony.

The bride was given in marriage by her father and was attended by Miss Victoria Matchett of Okinawa. Ens. Thomas Snediger was best man for the bridegroom and 2d Lt. Gene Johnson, USMC, ushered.

Mrs. Seyfarth, who is the granddaughter of Col. (USA-Ret) and Mrs. Howard R. Smalley of 11 Eastland Ave., Rochester, N. Y., and of the late Col. and Mrs. Frank U. McCoskrie, is an alumna of Penn Hall Junior College. Her husband is a graduate of the USNA, and he and his bride are making their home in Norfolk, Va.

FEIR-BEITER — The Cathedral of St. Luke, Ancon, C. Z., was the setting for the candlelight ceremony, 24 June, uniting in marriage Miss Mary Deane Beiter, daughter of Col. (USA) and Mrs. Dean

Promotions Celebrated At Parris Island

CAPT. Orlando Ingvaldstad, USN, (left), and **LCdr. John Koutrakos** (right), have just received promotions. Mrs. Ingvaldstad and Mrs. Koutrakos (left and right front), share their husbands' joy. Maj. Gen. Thomas G. Ennis, Commanding General of this East Coast Marine Corps Recruit Depot presented the promotions. Captain Ingvaldstad is Senior Depot Chaplain. LCdr. Koutrakos is a Dental Officer with the Depot Dental Detachment.

Stirling Beiter of Ft. Clayton, C. Z., and Maj. Philip Robert Feir, USA. The bridegroom is the son of Mrs. A. E. Feir of Long Beach, Calif., and the late Mr. Feir.

Given in marriage by her father, the bride chose Mrs. J. L. Magness of Ft. Kobbe, C. Z., as her matron of honor, and Mrs. C. E. Fernandez of Ft. Sherman, C. Z., as bridesmaid, with Miss Catherine Norris, daughter of Maj. and Mrs. R. S. Norris, Ft. Gulick, C. Z., as junior bridesmaid, and little Misses Leslie and Patricia DiMatteo, daughters of Col. and Mrs. A. J. DiMatteo, Ft. Clayton, as flower girls. Young Master John Mertz, son of Capt. and Mrs. H. M. Mertz of Ft. Clayton, was ring bearer. Serving as best man for the bridegroom was Lt. Col. Arthur Newton of Ft. McPherson, Ga.

Mrs. Feir attended Stephens College and the Parsons School of Design, New York University. Her husband, a graduate of the USMA, received a Master's degree from the Georgia Institute of Technology.

Major Feir and his bride will honeymoon aboard the S. S. Santa Maria, en route to West Point, where he is assigned as an instructor in the Department of Electricity.

GABEL-BENTLER—Mrs. J. K. Beaty of Tampa, Fla., and Mr. L. E. Bentler of Ft. Lauderdale, Fla., have announced the engagement of their daughter, Carole Ann, to Cadet Beau Ernest Gabel, USAFA, son of Mrs. Roberta Gabel Coffey of 3800 Barcelona Ave., Tampa, Fla., and the late Col. P. Ernest Gabel, USAF.

Miss Bentler attended Florida State University and is now a student at the Ft. Lauderdale Junior College. Her fiancé is a first classman at the Air Force Academy.

The wedding is planned for the Summer of 1962.

SCHMIDT-ROBINETTE — Lt. Col. (USA-Ret) and Mrs. Albert L. Robinette of 1247 Golden Trophy Dr., Dallas, Tex., announce the marriage of their daughter, Linda Jean, to Ens. John Allan Schmidt, USCG, son of Mrs. John A. Schmidt of Cupaw Lake, N. J., and the late Mr. Schmidt, 4 July, at St. Gabriel's Catholic Church, Holmdel, N. J.

The bride, attended by her cousin, Miss Patricia Boyette, and her sister, Miss Ann Robinette, as junior bridesmaid, was given in marriage by her father. Mr. James Schmidt was best man for his brother.

Mrs. Schmidt, whose father (USMA '39) is now associated with Chance Vought Corporation, is a graduate of the Washington School for Secretaries. The bridegroom, USCGA '60, will enter Flight School at Pensacola, Fla., following their wedding trip.

RAY-WALTERS—The Marvin Methodist Church, Tyler, Tex., 8 July, was the scene of the ceremony uniting in marriage Miss Charlotte Walters and Lt. James Floyd Ray, USA. The bride is the daughter of Mr. and Mrs. Marquis T. Walters of Tyler, and parents of the bridegroom are Col. (USA) and Mrs. Claude E. Ray of Ft. Sam Houston, Tex.

The bride, who was given in marriage by her father, whose sister, Miss Margaret L. Walters, to be her maid of honor, Mrs. Neal Velvin and Mrs. Brenda Bisell, as bridesmaids, with Miss Joanne Ray, sister of the bridegroom, as junior bridesmaid. Colonel Ray served as best man for his son, and groomsmen included Lt. Peter Strombert, Lt. Paul

Miles and Mr. Bob Ray. Messrs. Walter Strong, Donald Adams and Neal Velvin ushered.

Mrs. Ray is a graduate of Southern Methodist University, where she was a member of the Kappa Alpha Theta sorority and the Mortar Board, and was editor of the Rotunda. Her husband, a graduate of the USMA, is a Rhodes Scholar, now attending University College, Oxford, England, where he and his bride will reside for his final year of study, following a European wedding trip.

BUTTNER-BABIZE — Mr. and Mrs. Auguste C. Babize of Kenilworth, Ill., announce the marriage of their daughter, Marianne, to Lt. Peter Buttner, USAR, son of Col (USA) and Mrs. Louis Buttner of 1517 Center Pl., Camp Kilmer, N. J., in an evening ceremony, 1 July, at the Congregational Church, Winnetka, Ill.

The bride was given in marriage by her father and was attended by her sister, Miss Jeannine Babize, as maid of honor, and Misses Mollie Babize, Susan Buttner, Trudy Roda and Marie True as bridesmaids. 2d Lt. Benjamin T. Harris was best man and ushers included Midshipman David Durfee, Cadet Thomas Durfee, Messrs. Milton Denlinger and John True.

Mrs. Buttner, a graduate of Smith College, received a Master's degree in Education from Harvard University. Her husband, MIT '61, received an Army Reserve commission in the Signal Corps, and will be stationed at Arlington Hall, Va.

Col. Atkins Directs MATS Services

Col. Walter J. Atkins has assumed duties as director of administrative services at Military Air Transport Service global headquarters, Scott AFB, Ill. He has been assistant director for several months.

USAF Line Commissions For Reserves

From page 5—

will be prepared alphabetically indicating reasons for non-recommendation (examples-on control roster, poor effectiveness, disciplinary reasons, etc.). Prepare a single sheet for each person not recommended identifying name, AFSN, temporary rank, command, year group, and reasons for non-recommendation. Unit commanders or designated representative will sign the sheet. Non-recommendations will be indorsed at the next higher level and submitted through channels prescribed by the major commands. Major commands will insure that all eligible Reserve officers in the 4, 5 and 6 year groups are reported. Losing commands will be responsible to make necessary reports on transferred officers through the command assignment cut off date of 31 August 1961 inclusive for the 4, 5 and 6 year groups. . . . Headquarters USAF line central selection boards will convene in September and October 1961 to consider all three year groups shown above.

"Seven but less than 17 Line TAFCS groups computed as of 30 June 1962: Applications from eligible Reserve officers are not required and will not be accepted. Major commands will nominate only truly deserving eligible officers in these year groups who have college degrees from accredited colleges or universities, preferably those with training in or performing duty in fields shown in Attachment 3.* Major commands may, however, nominate truly deserving eligible officers in the 7 but less than 17 year groups with college degrees who are performing duties other than those shown in Attachment 3. Nominations for officers without college degrees in the 7 but less than 17 year groups will not be accepted at any level. . . . Headquarters USAF line central selection boards will be con-

*Weather, R&D Director, R&D Administrator, R&D Assistant, Nuclear Research, Mathematician, Physicist, Metallurgist, Aero Engineer, Electronics Engineer, Mechanical Engineer, Communications-Electronics, Civil Engineer, Base Engineer, Maintenance Engineer, Utilities Engineer, Electronic Data Processing Officer.

vened in January 1962.

"Line Reserve officers promoted to temporary grade of Major and Lieutenant Colonel 'below the primary zone of eligibility' in the FY 62 temporary promotion cycle: There is no requirement for major commands to forward rosters or recommendations, since Headquarters USAF will take necessary action to submit the names of all such Reserve officers to Headquarters USAF selection boards in January 1962. All officers promoted from below the zone, regardless of educational level achieved, will be eligible for consideration.

"It is requested that these instructions be implemented at all echelons of command and that they be given wide publicity. In addition major commands should continue to emphasize the Air Force policy which gives priority consideration for selection of Regular officers to those Reserve officers on active duty who possess college degrees. As a result of this policy in the FY 1961 Regular line program 92% of the officers selected had college degrees. The 8% who did not have college degrees possessed outstanding records and most of them were engaged in Air Force educational programs leading to a baccalaureate degree. Therefore, it is recommended that commanders at all levels of command encourage those officers on active duty who do not have a degree to work towards a degree whenever possible.

THE ARMY AND NAVY LEGION OF VALOR

solicits inquiries leading to membership from those who hold the Medal of Honor-Distinguished Service Cross or Navy Cross. We are to hold our 71st annual reunion this year in beautiful Miami Beach at Hotel Barcelona August 14-15-16. This is a wonderful organization which you will enjoy belonging to.

Write Capt. G. T. Fleet, 331 Rosemary St., San Antonio, Texas.

Retired Officers Hold "Disadvantaged Position" In Job Market; Earn Low Pay

RETIRED military officers hold a "disadvantaged position" in the civilian labor market and face "severe readjustment problems" following retirement.

These conclusions are made by the University of Michigan Study Committee.

The group also found that former military officers who continue working after retirement from the Armed Forces earn a "median salary" of less than \$6,000 per year—an amount "considerably below what the average person of their age and educational background is earning."

The Study Committee combed more than 3,000 questionnaires completed by officers retired between 1955 and 1960. Summarizing "some of the high points" of its findings, the Committee said:

- Half of the officers retired in the past five years are 45 or younger.

- Half of the group retired as O-4's or O-5's with a little over 20 years' active service.

- Most still have families to support (97% with at least one dependent; 68% with more than one).

- All tend to be better educated than the average American (almost half have had at least two years of college).

- Their education is reflected in the civilian jobs they obtain. They belong almost exclusively to the white collar, middle class group, with managerial, sales and government jobs predominating.

- They maintain some connection with the military even in retirement. (80% live close enough to military bases to use the commissary, PX and medical facilities).

- They congregate in certain geographical areas, with fully one quarter living in California, and almost one out of five living in Florida and Texas.

The Michigan report, discussing present employment and employment income, observes that retired officers are in a "disadvantaged position" in civilian job market competition.

Only 66% have a full-time job; 10% have part-time jobs; 3% are studying; and "fully 21% are apparently doing nothing at all."

Among those who are working, the median salary is something less than \$6,000 a year, considerably below what the average person of their age and educational background is earning.

The Committee noted that several

questions in the questionnaire asked specifically about the officer's problems in getting employment, and how he felt his military experience had prepared him for the vocational readjustment in civilian life. "A great many of the officers apparently made the readjustment smoothly," the report states.

- 43% reported that they had "no difficulty" in getting their first employment after retirement.

- 37% feel that the skills they learned in the military helped them "a great deal" in the work they have done in civilian life.

- 40% "did not require or seek" Service counselling or information to help them with their retirement plans.

The Committee said, however, that "although many make the readjustment easily, it is also apparent that many have difficulties." Of those questioned, 32% had "some" or "a great deal" of difficulty getting their first jobs; 24% feel that the skills they learned in uniform helped "very little" or "not at all" in the work they have done in civilian life; 17% of those who felt the need for some counselling help with their retirement plans reported that they received adequate assistance, 21% feel they could have used help but got none at all, and an additional 20% received some help but would have liked more.

The Michigan group said "It is apparent, then, that many retired officers do suffer severe readjustment problems, and could utilize help in meeting these problems."

Commenting on the finding that 21% of the recently retired officers "are totally unemployed, neither working part-time nor going to school," the Committee said "In an educated population that is still of working age, this number constitutes a serious problem."

"In a country such as ours, where work is the focus of a man's identity and self-respect, unemployment is serious even for those who are managing on their retirement income and have not even attempted to get work."

In spite of economic comfort, we can assume that almost all men in their forties and fifties would want to work if they had a chance for a meaningful job, and that when they are not working or not even trying to find work, it is because they do not see the possibility of obtaining such a job."

Dual Compensation Act Discriminates Against Regulars; Modification Sought

THE "discriminatory" Dual Compensation Act should be modified to permit retired Regular officers to accept Government employment and retain a "portion" of their retired pay.

This recommendation is made by the University of Michigan Study Committee in its report to the Senate Armed Services Committee.

Present rules which exempt Reserve officers from the limitations imposed by the Act are "clearly discriminatory against the Regular officer," the University group said.

The Michigan Committee told the Senate that "Modification of the Dual Compensation Act is desirable in order to make available to the Federal Government a group of trained personnel who are interested in governmental service, including overseas service."

"Since military retired pay is in part deferred pay," the Study Committee said it "recommends liberalizing that portion of the pension an officer may still receive while earning a federal salary."

In a questionnaire prepared by the Committee, more than 4200 retired officers were asked, "Under the present laws, certain categories of retired officers cannot work in a civilian capacity for the federal government while others cannot draw full retirement pay while working for the federal government. Did

this affect your employment opportunities?"

Of the more than 3100 officers who completed the questionnaire, 44% said it did affect their employment opportunities, that they might have worked for the federal government if not for the dual-pay statutes.

Fourteen per cent said the restriction did not affect their employment opportunities because they obtained federal jobs anyway. Another 33% said they had no desire to work for the Government and thus the restriction did not affect them. Nine per cent of the group fell into a "not ascertained" category.

Even with the restrictions, the University group noted, "about one out of six of the retired officers who are employed work for the federal government, and we might expect that the figure would be considerably higher if there were no limitations on this employment."

Numerous efforts to win overhaul or outright repeal of the Dual Compensation and Dual Employment laws have been launched in the Congress over the past several years, but without success.

Earlier this year (THE JOURNAL, 18 March), the Senate Subcommittee on National Policy Machinery charged that the complex laws are discriminatory and should be amended. No action has been forthcoming, however.

Group Finds 20-Year-Retirement "Vital" To Service Incentives, Promotion Flow

The University of Michigan Study Committee has reaffirmed the long-standing policy of permitting members of the Armed Forces to retire at the end of 20 years' service.

Such retirements are "vital" the Committee said, if the Services are to maintain "an incentive system" and proper promotion flow.

At the same time, the Michigan group recommended, however, that certain "technical" and "logistical" officers be retained for more than 20 years, but under a modified system which would not impede the normal flow of promotions.

During Senate debate on the 1958 Military Pay Act, Senator John C. Stennis, (D-Miss) of the Armed Services Committee, said he believes Congress "ought to consider writing into legislation a penalty for early retirement, and make that a part of the retirement policy."

In announcing the award of the contract for the military retirement study last December, Senator Stennis said the Michigan group would take a look at this specific question. "Many officers, including those of full rank," he said "are being retired at an early age—many before 55—when they are at the peak of experience and mental ability." He said "The question arises whether the interests of the military services, as well as the persons concerned, are best served under this policy."

Concluding its study, the University group said "The cost and the effectiveness of the military retirement system cannot be separated from the person-

nel and promotion system of the Armed Forces which is designed to maintain a flow of young officers through the rank system in order to meet basic military and leadership needs.

"The system of early retirement, 20 years' service as the typical career with smaller numbers being retained for 30, is recognized as being vital to maintaining a promotion flow and an incentive system."

The Committee said it nevertheless "believes that modification of these personnel practices for technical, logistical personnel should be undertaken in order to retain, outside of the promotion flow, officers whose skills remain valuable to the military."

Although recognizing that "increased length of service increases military retirement benefits," the Committee "concluded that selective modifications of the early retirement will reduce such costs as training and replacement costs, and thus reduce total costs."

Twenty-year retirement, the University group declared, "is essential to prevent the military establishment from being dominated by men too old for the rigors of military life."

Under the Committee's recommendations, officers in the technical and logistical fields would be retained "for longer periods of time" if their skills remained valuable. They also would be subjected to "slower promotion, or even remaining in grade with only general pay increases."

Officers in the group, the Committee said, "should be carried on the table of organization outside the promotion flow."

New Pay Formula For Service Disabled Charted By Michigan University Study

THE University of Michigan Study Committee has charted a "new approach" to the payment of disability retired pay to members of the Armed Forces.

The Committee's recommendations, which it says are not intended to be "definitive" but simply the "basis for further exploration," provide that:

● All disability retirees, regardless of length of service, could compute their retired pay under the same formula used by longevity retirees (2½% of base pay times years of service).

● Those retired with less than 30% disability would receive, in addition, "disability severance pay" based on the extent of disability and not on rank or length of service.

● Those retired with 30% or more disability would receive, in addition to retired pay, benefits comparable to the service-connected disability payments made by the Veterans' Administration. A "minimum" of \$200 combined retired pay and disability benefits would be established for this group.

● Periodic reviews of all disabilities would be instituted "to assure more equitable compensation for those with progressive disabilities."

● A "Court of Appeals" would be established to permit members of the Services to challenge disability judgments they consider unfair.

The Committee also suggested that "many Servicemen with 10% or 20% disability might profitably remain in the Service, carrying out duties within their capacities. The determination of who should be retained and who should be retired should be made individually and in consideration of the individual's special talents and usefulness to the Service." If no progressive change takes place in the disability, the man would receive disability severance pay, in addition.

Cadet Nominated

The President has nominated Thomas S. Myerchin, a member of the Military Academy graduating class of 1961 for appointment as second lieutenant in the Regular Army.

RETIRED ACTIVITIES:**RAdm. Briggs Heads Firm; Col. Winkle Joins Stock Brokers**

RAdm. Harold Briggs, USN-Ret., has been named President and Chief Executive Officer of Washington Technological Associates, Inc., Rockville, Md. The company has performed engine studies and engineering for handling and storage of such missiles as Polaris, Talos, Terrier and Typhon.

Maj. Gen. D. W. Hutchison, USAF-Ret., who had commanded TAC's Ninth Air Force, Shaw AFB, S. C., and Mrs. Hutchison, the former Jean D. Miller of Allentown, Pa., plan to settle in Oklahoma City, Okla. He is a USMA '31 graduate.

Maj. Gen. J. B. Medaris, USA-Ret., President of The Lionel Corporation, has announced an agreement to acquire the government products division of M. Steinthal & Co., Inc., of New York City and Roxboro, N. C. M. Steinthal & Co., is a manufacturer of air retardation and recovery devices, ranging from parachutes for airborne troops and cargo, to weather instrument and missile capsule recovery parachutes and devices, as well as deceleration parachutes for jet aircraft.

Last year, M. Steinthal & Co. did over \$6 million in its government products division, with a net profit of over \$200,000 after taxes. The purchase by Lionel was based on an exchange of stock.

Col. Charles B. Winkle, USAF-Ret., 900 Burr Road, San Antonio, formerly Deputy CofS, Operations, Fourth Air Force Reserve Region, Randolph AFB, Tex., will join Bache & Co., members of the New York Stock Exchange and other leading stock and commodity exchanges, national and international. Colonel Winkle will be in the San Antonio office of Bache & Co., where Mr. Jay Lewis Rubin is the Resident Partner.

Cdr. Milton J. Silverman, USN-Ret., USNA '41, former Commanding Officer of Assault Craft Unit One, Pacific Fleet Amphibious Force, who has been succeeded by LCDR. Joseph C. Meredith, Executive Officer, will reside at 9623 Rosemount Blvd., Rosemount, Calif.

Col. James Q. Simmons, Jr., USA-Ret., former First Army Surgeon, Governors Island, N. Y., will join the National Multiple Sclerosis Society as Assistant to the Director, Dr. Thomas L. Willmon, in New York City. Colonel Simmons is married to the former Anita J. Wiesner of Breslau, Germany. They have an 8-year-old son, Michael C. Colonel Simmons has two sons by a former marriage: Dr. James Q. Simmons, 3d, of Los Angeles, and Capt. John L. Simmons, MC, USA.

Maj. Arthur C. Renfrow, Jr., USA-Ret., until recently Dependent Schools Officer at Ft. Benning, Ga., and Mrs. Renfrow, the former Margaret Epley of Morgantown, N. C., will make their home at 2480 Walker St., Columbus, Ga. They have four children, Susan 14, Jean 7, John 2, and Glenn 1.

Maj. Theda W. Rogers, ANC-Ret.'s address will be 8 Dyer Street, Provincetown, Mass.

Capt. Thomas W. Rogers, USN-Ret., has joined the Washington, D. C., staff of Maxson Electronics Corporation. It is announced by Joseph W. Stehn, Director of Military Sales. Captain Rogers recently served in technical and managerial capacities in the Navy Bureau of Ships, the Mare Island and Pearl Harbor shipyards, and on the staff of the Navy Inspector General. Captain Rogers received his BS Degree in engineering from the U. S. Naval Academy and his Masters Degree in electronics from Harvard. He also did other graduate work at the University of Pittsburgh.

Capt. Johnny W. Thomas, USMC-Ret., former Parris Island, S. C., Marine Corps Depot Bakery Officer, whose bakery has won top acclaim in the Marine Corps,

plans to operate a bakery in the Beaufort, S. C., area. He is the husband of the former Miss Gladys E. Stubblefield of Clayton, Ga. They live with their two children, Jeffrey W. 6, and Michael A. 4, at 1006 Battery Creek Rd., Beaufort.

Maj. Gen. Raymond W. Curtis, Commanding General of the II U. S. Army Corps, was honored at a retirement review at Ft. Jay.

He reviewed the troops with Lt. Gen. Edward J. O'Neill, First U. S. Army Commander, with a grandstand star-studded and filled with friends from the Regular Army, National Guard, and Reserve. Among them were Lt. Gen. Willis D. Crittenger, former First Army Commander, and more than 14 general officers who later attended also the reception and dinner for General Curtis at the Ft. Jay Officers Club.

The General plans to settle in the San Diego, Calif., area.

Col. Thomas F. Victory, First U. S. Army Engineer, who retired with more than 30 years of Army service on 30 June, has been awarded a First Oak-Leaf Cluster to the Army Commendation Medal. Colonel Victory and his wife Mary, live at 410 Stafford Ave., Scranton.

Maj. Gen. John S. Guthrie, formerly Commanding General of the XIVth Army Corps at Minneapolis, has been named a Vice President of Motec Industries, Inc., Edmund F. Bryan, President, announces. He was also appointed a member of the Operating Committee of the Company.

Reporting directly to the President, General Guthrie will function as Vice President of Systems Management and Director of the Moletronics, Motec Engineering and Mohawk Foundry & Forge Divisions.

Capt. Eugene Tatom, USN-(Ret.), who retired 1 July after 30 years' service, has joined United Aircraft Corporation's Norden division as chief—research and development. His responsibilities will include the engineering department's activities in radar and communications, television and infrared, stabilization and navigation, and applied physics.

Presently maintaining a residence at Colorado Springs, Col., Captain Tatom, his wife and four children, soon will relocate in the Fairfield County area of Connecticut.

RAdm. Philip W. Snyder, USN-(ret.), Vice Chief of Naval Material, Navy Department, from 1960 until his retirement 30 June, has joined the Grace Line to assume the newly created post of Technical Director in the Executive Offices of the President.

In making the announcement, W. J. McNeill, Grace Line president, observed that "Admiral Snyder's distinguished record in the fields of ship design, construction, and maintenance, will provide Grace Line with unique and invaluable professional guidance in matters relating to daily operations, and particularly in connection with the fleet replacement and Research and Development programs."

Admiral Snyder currently resides with his wife, the former Mary Louise Hillis of Baltimore, at 4437 Greenwich Parkway, N.W., Washington, D. C.

Maj. Gen. Henry R. Paige retired at Camp Pendleton, Calif., 1 July, because of physical disability, after nearly 38 years of military service.

Commander of the Camp Pendleton-based 1st division from November 1959, General Paige relinquished his command to Brig. Gen. Frederick E. Leek on 7 June.

Upon retirement the general and his wife have chosen to reside on Mesa Drive in Oceanside, Calif.

The Paiges have three daughters and a son, 1st Lt. Reid B. Paige, a Marine Corps jet pilot stationed at Beaufort, S. C.

In parade ground retirement ceremonies at Ft. Monroe, Va., **Col. Joseph G. Cocke**, Surgeon, Headquarters, United States Continental Army Command, was presented the Legion of Merit (Second Oak Leaf Cluster) by General Herbert B. Powell, Commanding General, USCONARC. Colonel Cocke plans to enter medical practice at the San Antonio, Tex., State Hospital.

Col. Fayette G. Hall, AUS-Ret., and his wife Frances now reside at 51 Dolphin Drive, Paradise Island, St. Petersburg Beach, Fla. Colonel Hall, formerly Post Dental Surgeon at Ft. Riley, Kans., retired 30 May after 31 years commissioned service.

Commissioned Warrant Officer George T. Edwards has retired from active duty after more than 30 years' service in the Marine Corps. Maj. Gen. Thomas G. Ennis, Depot Commanding General, Parris Island, presented Warrant Officer Edwards his certificate of retirement during ceremonies at the East Coast Marine Corps Recruit Depot.

Warrant Officer and Mrs. Edwards live at 2411 Pine St., Beaufort, S. C., with their daughter Carol, 16. He will stay in Beaufort and operate a service station on Ribault Road.

The Army Commendation Medal was awarded to **Lt. Col. Augustine G. MacDonald** during parade ground ceremony at Ft. Monroe, Va., honoring him upon retirement after more than 20 years of active service. Presenting the decoration was General Herbert B. Powell, Commanding General, USCONARC.

Colonel MacDonald is married to the former Mary O'Connor of Brockport, N. Y. He plans to enroll at the State College of Education, Brockport, to earn a teaching degree.

Capt. Irvin W. Stultz, ChC, USN-Ret., will reside in Andover, N. H., and teach at Proctor Academy there.

Col. Philip L. Elliott, Deputy Chief of Staff for Logistics at the U. S. Military Academy has retired from active service after 21 years service. He was presented an Army Commendation Medal for his "exceptionally meritorious conduct in the performance of outstanding service" during his three years at West Point. He and his wife, the former Mary Ellen Dean of Pearl River, N. Y., will live in Coral Gables, Fla., with their two children, Betty, 13 and Jeffrey, 9.

Col. C. C. Harris, Jr., USAF-Ret., former Commander of Maxwell AFB, Ala., plans to live in Montgomery, Ala., with his wife and daughter.

Maj. Corles N. Goff, USA, 42, 102 Middlebury, San Antonio, who retired 31 July after 20 years' service, will teach in the San Antonio area.

IT'S HAWAII FOR A NATIVE TEXAN

Col. Orval N. Burroughs, USAF-Ret., former MATS Director of Administrative Services, Scott AFB, Ill., the son of a U. S. marshal in Coke County, Tex., who left West Point in 1929 on the death of his father, has chosen Hawaii as his residence.

Colonel Burroughs is married to the former Louise Bush of Freeport, Long Island, N. Y. They have three children. He plans to attend the University of Hawaii and will work as managing director of a newly-formed chemical firm.

Colonel Burroughs' brother, John H. Burroughs, is the former governor of New Mexico. His mother, Mrs. James H. Burroughs, lives in Lovington, N. M.

PL 810 Retirements

The Army has placed the following named National Guard and Reserve officers on the retired list upon their attainment of age 60 and completion of at least 20 years creditable service as provided under Title III, PL 810, 80th Congress:

Brig General	
Hamilton, William M. NG	
Colonel	
Anderson, Raynor E	Hall, Stanton A
Keller, John G	Maddux, Milton R
Klein, George C	Ribal, Raymond R
Johnston, Ambrose F	Grannis, John D, Jr
Thoman, Robert J	King, Daniel P
Ward, William W	
Lt Colonel	
Ernst, Victor L	Zamba, Peter
Godfrey, George H	Miller, Abraham W
Elwin, John	Olsen, Harry E
Combs, Zenas P	Brittingham, L W
Cummings, John L	Lefkowitz, Aaron M
Applarius, Walter P	Hoffman, R H
Samuell, John H	Machle, Edward P
Major	
Wilson, William S	Holt, Samuel E
Gardner, Joseph H	Borlie, Henry P
Clark, Glen L	Kitchen, H Dean
Captain	
Hodges, Charles C	Oxford, William D

The following named enlisted men are also retired under PL 810:
Heinsohn, M/Sgt John H. NG.
Frey, Sic Charles W, sr, NG.
Seifert, Kurt W, NG.

RAdm. Parham Heads Firms Navy Programs

RAdm. John C. Parham (USN-Ret) has been appointed Manager of Navy Programs for Motorola's Military Electronics Division.

The appointment represents a major expansion of Parham's responsibilities in that he also retains his post as Manager of the Washington Office to which he was named in 1959.

Motorola also announced that Frank Ransom has been appointed Manager of Army and FAA Programs and Arthur J. Wilde Manager of Air Force Programs for its Military Electronics Division.

Atomic Agency Deputy Retires

Brig. Gen. Richard H. Harrison, Deputy for Army, Defense Atomic Support Agency, is retiring after more than 30 years service.

Assigned to DASA as Deputy Chief, Army, in February 1958, he also served as Chief, Joint Atomic Information Exchange Group, and was Acting Chief, DASA, during the transition of this position from Navy to Army.

General Harrison USMA '31 is married to the former Patricia Donahue, of Seattle. They have one daughter, Patricia Jean, 22, and presently reside at 1559 North Jefferson Street, Arlington, Va.

Former Army Nurse Chief Ends Career

Two Army Medical Service officers were awarded the Legion of Merit decorations upon their retirement at Brooke Army Medical Center, Ft. Sam Houston, Tex.

Brig. Gen. Henry R. Sydenham, Director of Dental Activities, and **Col. Ruby F. Bryant**, Director of Nursing Activities, received the decorations from Maj. Gen. John F. Bohlender, Medical Center Commander.

In the citation accompanying his decoration, General Sydenham was praised for his distinguished service since November 1954 in the Dental Division, Office of the Surgeon General in Washington, as Chief of the Dental Service at Letterman General Hospital, San Francisco, and at Brooke Army Medical Center. He came to his Brooke assignment in July 1959.

General and Mrs. Sydenham will make their home in San Antonio.

Colonel Bryant was praised for her exceptionally meritorious service from Aug. 1951 to the present time. During the first seven years of that period she was Chief of the Army Nurse Corps in Washington and later was Chief Nurse, U.S. Army in Europe.

She retires after 30 years' military service and will reside at Warsaw, Va.

DoD Asks Senate To Restore Budget Cut In Planes, Schooling, Repairs

THE Defense Department has accepted without argument all but a handful of the House additions, deletions, changes, and restrictions in the Fiscal '62 military budget.

Deputy Secretary of Defense Roswell Gilpatric, appearing before the Senate Military Appropriations Subcommittee on 10 July, said that although the House-passed appropriations bill contains the usual "large number of reductions and limitations . . . designed to enforce economy and efficiency in the management of the Defense Establishment," the Pentagon also believes "there is considerable room for improvement" and has "decided to accept as many of these limitations and reductions" as possible.

House cuts which Secretary Gilpatric asked the Senate to restore because they would "interfere seriously" with Defense plans, include \$12 million for the

operation of Air Force four-engine transport planes, \$1.5 million for dependent schooling, \$58.4 million in repairs and alterations to existing Armed Forces' facilities, \$2.5 million for Naval civilian pay, and \$4.1 million to pay Army and Air National Guard contributions to State retirement funds.

Secretary Gilpatric also asked that the limitation on Army travel funds be raised \$6.4 million to provide for drill pay travel for the ANG and Reserve. He said the Pentagon will maintain National Guard and Reserve strength at the levels recommended by the House.

The Deputy Defense Secretary said the Department would accept a House restriction on Defense-contractor advertising provided the language is changed to permit the Pentagon to continue the allowances now made for advertising designed to recruit personnel, obtain

scarce items or dispose of scrap or surplus material.

Although he did not appeal a 2% across-the-board reduction in Defense Department procurement funds, Secretary Gilpatric said the Pentagon is "not at all sure at this time that such an extensive saving can be accomplished" but that it will try.

If the saving proves impossible, Service programs "will have to be reduced to fit the available resources."

Secretary Gilpatric said President Kennedy on 8 July asked the Department "to make another review as to whether our programs are sufficiently financed in light of increased tension."

The review is now underway, he said, and if it is found that additional funds are needed they will be requested.

Discussing the cut in procurement funds, Secretary Gilpatric said the Pen-

tagon does "not expect to reduce the number of items of major hardware," but believes "contractor costs can be reduced."

Acting Subcommittee Chairman A. Willis Robertson (D-Va.) asked Secretary Gilpatric to "justify for the record" why the cut in procurement funds will not hit major weapons.

Secretary Gilpatric said the Department is accepting the \$238 million additional appropriation for manned bombers, but has not changed its mind about utilizing the funds for either B-52s or the B-70 program. He said the money "might be used" if the Pentagon later decides to go ahead with either program.

Although the Department accepted an \$85.8 million increase in the Air Force DynaSoar program, Secretary Gilpatric under questioning said he does not think the funds are needed and the action "may be premature."

Esenwein Succeeds Gen. Cook In AIA

August Esenwein, who recently retired as Executive Vice President of the Convair Division of General Dynamics Corporation, has been elected President of the Aerospace Industries Association, H. M. Horner, Chairman of the Board of Governors of AIA, announces.

Mr. Esenwein will succeed General Orval R. Cook, USAF-Ret., who notified the Board in May 1960 that he would resign at the end of his current term on 31 December 1961. After a short vacation, General Cook plans to go into consulting work. Mr. Esenwein will assume the title of Deputy General Manager of AIA on 1 October, pending his succession to the presidency.

General Cook was elected to his present position in November 1956.

BEST NAVY MESSES

A Naval Air Station and a Destroyer Escort have been picked as having the Navy's best food service facilities on land and at sea. Honored as the naval establishment's outstanding general messes in the 1961 Ney Memorial Awards Program were the USS Courtney (DE 1021) and the Naval Air Station, Patuxent River, Md.

Runners-up in the fourth annual race for the Navy's top food crown were the USS Galveston (CLG 3) in the afloat category, and the Naval Submarine Base, Pearl Harbor, Hawaii, in the ashore competition.

Commission 22-Knot Attack Transport, Holds 22 Landing Craft, Copter Platform

The Navy's newest, largest and fastest attack transport ship—the USS Francis Marion—joined the U. S. Atlantic Fleet Amphibious Force following commissioning ceremonies at the Norfolk Naval Shipyard in Portsmouth, Va., 6 July.

Several hundred military and civilian dignitaries were present at the commissioning when VADM. John McN. Taylor introduced the principal speaker, Lt. Gen. Joseph C. Burger. These two officers command the Amphibious Force and Fleet Marine Force, which comprise the two components of the Atlantic Fleet's amphibious striking capability.

Commanded by Capt. David S. Bill, Jr., the "super" attack transport recently underwent a \$10 million conversion. It was rebuilt from the former merchant ship SS Prairie Mariner.

The ship's primary mission is to transport and land troops, supplies and equip-

ment in amphibious assaults. It can also serve as a flagship for amphibious commanders.

Displacing nearly 17,000 tons, the Francis Marion has a speed in excess of 22 knots and a range of more than 18,000 miles.

The ship carries 22 assault landing craft for its role in the waterborne phase of an amphibious assault landing. A 3600 square foot helicopter platform on its stern enables the Francis Marion to launch and recover helicopters.

The Francis Marion can lift a full Marine battalion landing team of 1,650 officers and men to an objective area and support it with weapons, supplies, communications equipment and medical facilities.

The ship, with a complement of 68 officers and 573 enlisted men, will be homeported in Norfolk.

NORAD Reveals New Satellite Object Board; Space Computer Operational

General Laurence S. Kuter, USAF, NORAD Commander, and Lt. Gen. Robert M. Lee, USAF, Commander Air Defense Command, have unveiled the North American Air Defense Commands new Satellite Object Board, an integral part of NORAD's new Space Detection and Tracking System designed to show the position of all man-made objects in outer space.

The "heart element" of the space system for military warning, and which has now gone formally into service, is the Philco 2000 Electronic Data Processing System.

"The Space Detection and Tracking System, (SPADATS)," General Kuter said, "detects, tracks and identifies man-made objects in space and consolidates and displays information regarding such objects."

"The system presently consists of Navy and Air Force operated sensors linked by a communications network to SPADATS located in the NORAD Combat Operations center," General Kuter continued.

"An integral part of SPADATS is the data processing element which utilizes an electronic computer to analyze the inputs from the various sensors, perform orbital calculations and comparisons and catalog the data.

"These data along with important information from a variety of other sources displayed in the NORAD Combat Operations Center form the basis of judgment and aerospace defense actions by the Commander-in-Chief, NORAD."

Philco's vice president Henry F. Argento, General Manager of the Government and Industrial Group, participated in the briefings with General Laurence S. Kuter, Commander of NORAD, as the computer formally went into operation. It provides the basis for a system which,

in time, will provide a 24-hour cataloging of every man-made object in space.

SPADATS requires a technical crew, the 1st Aerospace Squadron to man it which is furnished by a NORAD component, the USAF Air Defense Command. Its Commander is Col. Robert Miller.

SPASUR (Space Surveillance Detection Net), an east-west satellite detection fence developed by the Navy for ARPA to discover 'dark' or non-radiating satellites functioning across the southern U. S. from Brown Field, San Diego to Ft. Stewart, Ga., reported into SPACETRACK (National Space Surveillance Control Center—NSSCC). SPACETRACK was established by the Air Force for ARPA and received, analyzed, and cataloged orbital data received from SPASUR and other sources.

Under the realignment, SPACETRACK and SPASUR report directly to the Commander-in-Chief, North American Air Defense Command, in Colorado Springs.

SPADATS cleared its acceptance tests ahead of schedule and the turnover to NORAD's operational command began as scheduled on 1 July 1961.

Minute Man Flag To Ammo Command

The Minute Man flag, the Treasury Department's highest award for participation in the savings bond program, has been awarded to Ordnance Ammunition Command, Joliet, Ill.

This is the first E flag Award to be presented in this area since the end of WWII.

Col. Elmer W. Grubbs, Commanding Officer, accepted the flag for the OAC personnel.

Army Lists Juniors

Following are the Army junior officers on each Promotion List as of 30 June 1961.

ARMY PROMOTION LIST

Colonel—Leslie A. Arnold, 080615, MPC
Lieutenant Colonel—Robert P. Armstrong, 080370, TC
Major—Frank J. Gigliotti, 084617, QMC
Captain—John G. Bishop, 087678, QMC
First Lieutenant—Osborne C. Oakley, Jr., 083966, CE
Second Lieutenant—Robert F. X. Buck, 092368, FC

CHAPLAINS PROMOTION LIST

Colonel—Maury Hundley, Jr., 026424
Lieutenant Colonel—John A. Zwack, 061068
Major—Paul E. Kietz, 067588
Captain—Walter DeM. Forsythe, 085749
First Lieutenant—Sterling A. Wetherell, 092146

WOMEN'S ARMY CORPS PROMOTION LIST

Lieutenant Colonel—Patricia E. McCormick, L115
Major—Judith C. Bennett, L529
Captain—Laurie A. Lee, L665
First Lieutenant—Carol Von Moenitz, L682
Second Lieutenant—Arlene G. Burbank, L597

MEDICAL CORPS PROMOTION LIST

Colonel—Edward J. Dehne, 051965
Lieutenant Colonel—John J. Pope, 031214
Major—Philip H. Welch, 070157
Captain—Deiland M. Collins, 086633
First Lieutenant—Kermit L. Newcomer, 091657

DENTAL CORPS PROMOTION LIST

Colonel—Eugene W. Gray, Jr., 051183
Lieutenant Colonel—Russell W. Sumnicht, 031208
Major—Bernard R. Scully, 081829
Captain—Thomas J. Schaefer, 084800
First Lieutenant—Jesse T. Bullard, 093030

VETERINARY CORPS PROMOTION LIST

Colonel—Stephen G. Asbill, 021471
Lieutenant Colonel—Everest H. Akins, 084814
Major—Irven R. Cooper, Jr., 070307
Captain—Harold K. Chandler, 086614
First Lieutenant—Richard O. Spertzel, 091391

MEDICAL SERVICE CORPS PROMOTION LIST

Colonel—Gordon A. Rohn, 031075
Lieutenant Colonel—Conan H. Millstein, 049920
Major—Robert W. Bailey, 081868
Captain—Dwight W. Glenn, 074945
First Lieutenant—Richard C. Dickson, 082317
Second Lieutenant—Lawrence J. Ryan, Jr., 092854

ARMY NURSE CORPS PROMOTION LIST

Colonel—Eileen W. Brady, N91
Lieutenant Colonel—Harriet A. Dawley, N644
Major—Ella L. Brookover, N2828
Captain—Francis M. Burke, N2811
First Lieutenant—Kathryn M. Teale, N2967
Second Lieutenant—Carol A. Bairden, N2995

ARMY MEDICAL SPECIALIST CORPS PROMOTION LIST

Lieutenant Colonel—Cordelia Myers, J62
Major—Winifred E. Soady, J65
Captain—Virginia A. Metcalf, M10164
First Lieutenant—Mary S. Hall, M10183
Second Lieutenant—Beverly A. Derrick, M10185

Army Sec'y Sees Sub

SECRETARY of the Army Elvis J. Stahr chats with Cmdr. Paul N. Lacy, of Dallas, Tex., skipper of the Polar submarine Ethan Allen, during a tour of the ship at her General Dynamics dock in Groton, Conn. The 6,900-ton, 410-foot Ethan Allen will be commissioned next month.

Col. Flanagan Is Named Japan Transport Chief

Col. Andrew P. Flanagan is the new U. S. Army Japan Transportation Officer, after duty with the Army Chemical Corps at Edgewood, Md.

He succeeds Col. Robert H. Fillmore, who departs for the U. S. 19 July to assume Colonel Flanagan's vacated post.

Colonel Fillmore, Regional Vice-President Far East for the National Defense Transportation Association, will become Transportation Consultant to the Chief, Chemical Corps.

Births • Marriages • Deaths

(No charge for Service announcements. Please print all names.)

Born

ARNOLD—West Point, NY 2 Jul Capt & Mrs Edward L. Arnold, Qts. 4-31, West Point, daughter, Elizabeth Rose.

BARTELL—Brooke GH, Ft Sam Houston, Tex 30 Jun 2d Lt & Mrs John F. Bartell, son.

BAUER—Air Force Academy, Colo 3 Jul 1st Lt & Mrs Otto F. Bauer, son.

BENEDETTI—Vicenza, Italy 23 Jun Maj & Mrs Bart P. Benedetti, daughter.

BILLINGS—Maxwell AFB, Ala 16 Jun Capt & Mrs Gilbert M. Billings, Jr, Command & Staff College, Maxwell AFB, son, Brennan Charles.

BRIOT—Brooke GH, Ft Sam Houston, Tex 30 Jun Capt & Mrs William R. Briot, daughter.

BROWN—DeWitt AH, Ft Belvoir, Va 30 Jun Capt & Mrs Boyce R. Brown, son.

BROWN—Neubucke, Germany 17 Jun Maj & Mrs Michael J. Brown, son, Kevin.

BUCEK—Madigan GH, Tacoma, Wash recently 1st Lt & Mrs R. C. Bucek, son.

BULLOCK—Ft Eustis, Va recently Capt & Mrs C. A. Bullock, son.

CARMICHAEL—Madigan GH, Tacoma, Wash recently Capt & Mrs B. B. Carmichael, daughter.

COLE—La Chapelle, St Mesmin, France 21 Jun Maj & Mrs Elwood L. Cole, son, Karl.

CONVERSE—Lackland AFB, Tex 1 Jul 1st Lt & Mrs Merle E. Converse, daughter.

CURCI—Ft Eustis, Va recently 2d Lt & Mrs F. M. Curci, daughter.

CYGAN—Brooke GH, Ft Sam Houston, Tex 27 Jun 1st Lt & Mrs Herbert E. Cygan, son.

DODGE—Lackland AFB, Tex 29 Jun 1st Lt & Mrs Nathan Dodge, daughter.

DUFAULT—DeWitt AH, Ft Belvoir, Va 5 Jul Lt Col (USAF) & Mrs William F. Dufault, daughter.

DU RETTE—Langley AFB, Va 26 Jun Capt & Mrs John C. Du Rette, 18 Marvin Dr, Hampton, Va, son, John Skafle Emerson.

FALKENBURY—DeWitt AH, Ft Belvoir, Va 2 Jul Capt & Mrs Stephen D. Falkenbury, Jr, daughter.

FARR—La Chapelle, St Mesmin, France 23 Jun Capt & Mrs Johnny B. Farr, son, James.

FAY—Brooke GH, Ft Sam Houston, Tex 28 Jun Capt & Mrs Charles I. Fay, twins, son & daughter.

FORRESTER—Walter Reed GH, Washington, DC, 4 Jul Lt Col & Mrs Ralph Forrester, son.

FREDERICK—Brooke GH, Ft Sam Houston, Tex 23 Jun Capt & Mrs James M. Frederick, son.

GRAMLEY—Madigan GH, Tacoma, Wash recently Capt & Mrs P. A. Gramley, Jr, daughter.

GRIGSBY—Madigan GH, Tacoma, Wash recently Capt & Mrs O. A. Grigsby, Jr, daughter.

HARGROVE—DeWitt AH, Ft Belvoir, Va 5 Jul CWO & Mrs Carl S. Hargrove, daughter.

HARRIS—Ft Rucker, Ala 17 Jun 2d Lt & Mrs Franklin N. Harris, son, Timothy Allen, grandson of Lt Col (Ret) & Mrs Roy B. Harris, Fostoria, O, & nephew of 2d Lt Donald G. Harris, USAF, Mather AFB, Calif.

HENDERSON—Ft McClellan, Ala 27 Jun 2d Lt & Mrs James F. Henderson, son, James Herbert.

HESTERMAN—Madigan GH, Tacoma, Wash recently Capt & Mrs V. D. Hesterman, daughter.

HIEBERT—Langley AFB, Va 29 Jun Capt & Mrs Frederic C. Hiebert, 16 Marvin Dr, Hampton, Va, daughter, Dana Lynne.

HOPKINS—Brooke GH, Ft Sam Houston, Tex 22 Jun 2d Lt & Mrs David C. Hopkins, son.

HOSFORD—DeWitt AH, Ft Belvoir, Va 6 Jul Maj (USAF) & Mrs Bowen I. Hosford, daughter.

HUNT—Vicenza, Italy 25 Jun 1st Lt & Mrs Larry H. Hunt, son.

JANOSKY—Lackland AFB, Tex 5 Jul 2d Lt & Mrs Henry Janosky, daughter.

JOHNSON—Carlisle Bks, Pa 27 Jun Capt & Mrs Charles A. Johnson, daughter.

KAISER—Keesler AFB, Miss 2 Jul 2d Lt & Mrs Richard A. Kaiser, son, Richard David.

KASER—Neubucke, Germany 18 Jun Capt & Mrs William T. Kaser, son, Thomas.

KIMBROUGH—La Chapelle, St Mesmin, France 25 Jun Capt & Mrs Joseph D. Kimbrough, daughter, Michelle.

KINGSBOROUGH—Ft Ord, Calif 24 Jun Lt & Mrs Paul E. Kingsborough, 1198 8th St, Apt 2, Monterey, Calif, son, Paul Scott.

LAIN—Neubucke, Germany 15 Jun Capt & Mrs David E. Lain, daughter, Leslie.

LAMBERT—DeWitt AH, Ft Belvoir, Va 5 Jul Lt Col & Mrs Robert O. Lambert, twin sons.

LAYDEN—Ft Jackson, SC 30 Jun Capt & Mrs James F. Layden, son.

LITTLE—Ft Eustis, Va recently Maj & Mrs C. D. M. Little, son.

MCGUIGAN—Ft Lee, Va 1 Jul Lt Col & Mrs William J. McGuigan, 278 Blizerte Circle, Ft Lee, 10th child, 5th son, Thomas Paul.

MEURET—Madigan GH, Tacoma, Wash recently 1st Lt & Mrs C. J. Meuret, Jr, daughter.

MEYERPETER—Keesler AFB, Miss 1 Jul 1st Lt & Mrs William R. Meyerpeter, daughter, Paula Sue.

MILLER—DeWitt AH, Ft Belvoir, Va 5 Jul Capt & Mrs Henry T. Miller, daughter.

MURRAY—La Chapelle, St Mesmin, France 29 Jun 1st Lt & Mrs Ernest C. Murray, daughter, Elizabeth.

MYRICK—Bremerhaven, Germany 10 Jun Capt & Mrs Howard A. Myrick, daughter, Keris.

NICOL—USNH, San Diego, Calif 17 Jun Lt (USNR) & Mrs Donald J. Nicol, son, Robert James, grandson of Mr & Mrs James Nicol, East Weymouth, Mass, & of Col (USA-Ret.) & Mrs Kenneth Strother, Santa Monica, Calif.

5 Army Wives Have 31 Children

Five Army wives at Ft. Leavenworth are now the mothers of 31 children. Within a three day period (June 28 to 30) each of the five gave birth to a new son or daughter at Munson Army Hospital there as follows:

Mrs. Frank Barnhart, her fifth child.
Mrs. David Stewart, her fifth child.
Mrs. Willie Lillie, her sixth child.
Mrs. Robert H. Schellman, her eighth child.
Mrs. Robert Yerks, her seventh child.
Mrs. Lillie is the wife of an enlisted man assigned to the First Guard Company; the others are the wives of officers on duty with the U. S. Army Command and General Staff College or the post garrison.

O'CONNOR—Ft Jackson, SC 4 Jul Capt & Mrs George L. O'Connor, daughter.

OVERGARD—Madigan GH, Tacoma, Wash recently 1st Lt & Mrs R. N. Overgard, son.

PARKER—Brooke GH, Ft Sam Houston, Tex 2 Jul 1st Lt & Mrs Lester B. Parker, son.

PEREZ—DeWitt AH, Ft Belvoir, Va 6 Jul 2d Lt & Mrs Jorge E. Perez, daughter.

PETERS—Walter Reed GH, Washington, DC 1 Jul Capt (USAF) & Mrs Jerry M. Peters, son.

PITCHER—Brooke GH, Ft Sam Houston, Tex 2 Jul Capt & Mrs James L. Pitcher, daughter.

PORTER—Bryan, Tex 6 Jul Capt & Mrs John G. Porter, son, John Robert.

RAWLINGS—Keesler AFB, Miss 1 Jul Capt (Ret) & Mrs John B. Rawlings, twin sons, William Craig & Robert Scott.

REBER—Brooke GH, Ft Sam Houston, Tex 23 Jun Capt & Mrs John A. Reber, son.

ROBERTS—Keesler AFB, Miss 26 Jun Capt & Mrs Joseph T. Roberts, daughter, Elinor Jebb.

ROBINSON—Lackland AFB, Tex 3 Jul 2d Lt & Mrs William R. Robinson, son.

ROTH—Neubucke, Germany 14 Jun 1st Lt & Mrs Robert W. Roth, daughter, Elizabeth.

SAFERSTEIN—Ft Jay, NY 30 Jun Capt & Mrs Harold L. Saferstein, son, Aaron Jay.

SMITH—Brooke GH, Ft Sam Houston, Tex 21 Jun Capt & Mrs Frank G. Smith, son.

SMITH—Brooke GH, Ft Sam Houston, Tex 3 Jul Capt & Mrs Perry G. Smith, son.

SOLTYS—Brooke GH, Ft Sam Houston, Tex 24 Jun 1st Lt & Mrs T. V. Soltys, daughter.

SURRIDGE—Brooke GH, Ft Sam Houston, Tex 3 Jul Capt & Mrs Allan J. Surridge, son.

SVEC—Keesler AFB, Miss 6 Jun 1st Lt & Mrs Ronald K. Svec, son, Charles Kevin.

TAYLOR—Brooke GH, Ft Sam Houston, Tex 27 Jun Lt Col & Mrs Royce R. Taylor, daughter.

TIPPLE—Madigan GH, Tacoma, Wash recently 1st Lt & Mrs J. D. Tipple, daughter.

TOMPKINS—Madigan GH, Tacoma, Wash recently Capt & Mrs F. G. Tompkins, daughter.

TRIPP—Walter Reed GH, Washington, DC 4 Jul 2d Lt & Mrs Robert H. Tripp, son.

VIGNEAUT—Brooke GH, Ft Sam Houston, Tex 2 Jul Capt & Mrs Marcel L. Vigneault, daughter.

VOLLMER—Ft Ord, Calif 24 Jun Capt & Mrs Gene E. Vollmer, 202 Algeria Rd, Ft Ord, daughter, Nancy Alice.

WAGNER—Brooke GH, Ft Sam Houston, Tex 4 Jul Capt & Mrs Douglas A. Wagner, daughter.

WASHINGTON—Ft Ord, Calif, 29 Jun Lt & Mrs Raleigh N. Washington, 159 Luzon Rd, Ft Ord, son, Derek Todd.

WHITAKER—Brooke GH, Ft Sam Houston, Tex 21 Jun Maj & Mrs Harry T. Whitaker, son.

WIENBAKER—Neubucke, Germany 16 Jun Capt & Mrs Fred P. Wienbaker, daughter, Marie.

Married

FINK-VIEAU—The Roman Catholic Church of St Patrick, Glen Cove, LI, NY 8 Jul Miss Joyce Marie Vieau, daughter of Mr & Mrs Lawrence A. Vieau, Syracuse, NY, and Lt George E. Fink, USN, son of Mr & Mrs Henry C. Fink, Brooklyn, NY.

HORN-KAISER—Recently Miss Edna Jane Kaiser, daughter of Col (USA) & Mrs Maurice Evans Kaiser, Arlington, Va, and Mr LeRoy Bennett Horn, son of Mrs Irvin Horn, Hagerstown, Md.

SHERER-DICKEY—St Anne's Episcopal Church, Annapolis, Md 24 Jun Miss Diane Dickey, daughter of Col (USMC-Ret) & Mrs Joseph L. Dickey, Lindamoor-on-the-Severn, Md, and Ens Robert Wallace Sherer, USN, son of Mr & Mrs Truman D. Sherer, Annapolis.

Died

AUSTIN—Died Ankara, Turkey 27 Jun, of a heart attack. Lt Col Orlo L. Austin, USAF, 41. Training Officer with the US Military Mission to Turkey. Survived by his widow, Mrs Mildred Austin; one son, William Austin; one daughter, Connie Austin; and his mother, Mrs Grace Austin, Yakima, Wash.

BRANCH—Died Walter Reed GH, Washington, DC 9 Jul, following surgery. Lt Col Matthew Douglas Branch, USA, 44, veteran of WWII & Korea, graduate of Howard University & University of Michigan, who had recently completed the course at the Army C&GSC, Ft Leavenworth, Kans and expected to be appointed Military Attache to Liberia. Survived by his widow, Mrs Mary Alice Branch, 912 Gallatin St, NW, Washington; his mother, Mrs Iola Branch, Washington; and five brothers, one of whom is M/Sgt Milton Branch, Denver.

CONDON—Killed in the crash of a civilian helicopter he was piloting while on leave, near Roanoke, Va 5 Jul Lt Col David E. Condon, Asst Transportation Officer for Aviation, at Ft Eustis, Va. Survived by his widow, Mrs Mildred C. Condon, 8 Barren Dr, Newport News, Va; three daughters, two sons, and his mother, Mrs Grace D. Condon, Goshen, Va.

CONLEY—Died 2 Jun Capt Lee R. Conley, USA-Ret, 67. Survived by his widow, Mrs Susan K. Conley; two daughters, Mrs John E. Kirk, Wellesley, Mass, & Mrs Paul C. Logue, Jr, Millersville, Md; two sons, R. L. Conley, Arnold, Md, & J. D. Conley, Annapolis, Md; and 12 grandchildren. Burial Arlington National Cemetery, Washington, DC.

de RHAM—Died at his home at Southampton, LI, NY 7 Jul LCDR Stephen W. de Rham, USN-Ret, 55. Survived by his widow, Mrs Kinta de Rham, Little Plains Rd, Southampton, or 2 E 70th St, New York City.

FARMER—Died 26 Jun Lt (Jg) Norman L. Farmer, USNR.

FISHER—Died VA Hospital, Coral Gables, Fla 6 Jun CWO-4 Roy P. Fisher, USA-Ret, 69. Survived by his widow, Mrs Olga Fisher, Miami, Fla; and seven children.

HENDERSHOTT—Died 30 Jun Lt (Jg) Robert J. Hendershott, USN.

HOSSELD—Died Walter Reed GH, Washington, DC 5 Jul Col Henry Hossfeld, USA-Ret, 86. Survived by his widow, Mrs Maud Hossfeld, 3665 Upton St, NW, Washington, DC; one daughter, Mrs Clara E. Miller, and two sons, Raymond F. & Theodore C. Hossfeld. Burial Arlington National Cemetery.

McCULLOH—Died 4 Jul Naval Cadet Gerald R. McCulloh, USNR.

McFAELAND—Died 1 Jul Cdr Robert R. McFarland, USNR.

MILTON—Died at his home at Crete, Ill 5 Jul Col Ray C. Milton, USA-Ret (USMA '23), 61. Survived by his widow, Mrs Ann Milton, Crete; two sons, Kent & Charles Milton; one daughter, Mrs Elizabeth Patterson, and ten grandchildren. Burial Steger, Ill.

PURDY—Died Letterman GH, Presidio of San Francisco, Calif 2 Jul Col Charles O. Purdy, ChC, USA-Ret, 81. Survived by his widow, Mrs Belle C. Purdy, 2335 Corona Ct, Berkeley 8, Calif; two daughters, Mrs Robert H. Rhine, Canal Zone, & Mrs James B. Harrington, Jr, Colorado Springs. Interment National Cemetery, Presidio of San Francisco.

SCHOLL—Died suddenly at her home at Washington, DC 10 Jul Mrs Martha Z. Scholl, widow of Lt Col Philip A. Scholl. Survived by two daughters, Anna Jean Scholl & Mrs Carl A. Anderson. Burial Arlington National Cemetery.

SPROSS—Died at his home at Plattsburgh, NY 3 Jul Maj Edward F. Spross, USA-Ret, veteran of WWII & Korea. Survived by his widow, Mrs Leola Spross, 37 Waterhouse St, Plattsburgh.

SULLIVAN—Died USNH, Bethesda, Md 7 Jul Lt Col Paul Sullivan, USMC-Ret. Survived by his widow, Mrs Esther C. Sullivan, 3500-14th St, NW, Washington, DC. Burial Arlington National Cemetery.

WHITNEY—Died Walter Reed GH, Washington, DC 6 Jul Col Joseph W. Whitney, USA-Ret, 70. Survived by his widow, Mrs Anna M. Whitney, 1127 No Gulfstream Ave, Sarasota, Fla. Burial Arlington National Cemetery, Washington, DC.

B-52H Tests Speeded At Edwards Center

An accelerated 1,000-hour test program involving more than a half-million miles of flight to verify B-52H systems capability under actual service conditions has been transferred to the Air Force Flight Test Center, Edwards AFB, Calif., with delivery by The Boeing Company of a production ballistic missile bomber for the test work.

A total of 100 hours had been logged on the B-52H previously by Boeing experimental flight test personnel. An additional 900 hours will be flown by the Air Force at Edwards in checking each of the systems installed in the new missile-launcher to determine reliability and life of all systems.

Information gained during this comprehensive test program will be relayed to the Wichita Division to evaluate any further increase in capability that could be incorporated during production of the B-52H weapon system.

In addition to testing the superior long-range bomber, the program at Edwards also will serve to train personnel as instructors for B-52H installations. Four or five SAC crews will be trained in this B-52H. Upon completion of their training, they will become flight instructors on the new missile bomber.

At the same time, more than 200 ground maintenance personnel will receive training on the B-52H. Like the flight crews, they will become instructors at B-52H bases upon completion at Edwards AFB.

Lt. Col. Wayne D. Morgan, Project Officer for SAC, said three Air Force commands, Strategic, Logistics and Systems, will be engaged in the 1000-hour test program at Edwards, which will continue into early 1962.

After the program is completed, the 450,000-pound bomber will be returned to Wichita for inspection, maintenance and repairs if needed. It will then be re-assigned.

SAMPSON JOINS NAVY

The guided missile destroyer Sampson (DDG-10) has joined the fleet. The third destroyer in the Navy to bear this name, given in honor of RADM. William T. Sampson, a hero of the Spanish American War, the 3,370-ton ship was constructed by the Bath, Me., Iron Works.

Cdr. Forester W. Isen is the first skipper.

Principal armament for the 431-foot Sampson, headed for Atlantic Fleet duty, is the Tartar surface-to-air guided missile, designed for use on destroyer-type ships and as a secondary battery on larger ships. Highly effective against both low and high altitude targets, the Tartar is powered by a solid fueled, dual-thrust rocket motor. Tartar is slated for use on 21 destroyers and three cruisers. Also included in DDG-10's armament is ASROC (anti-submarine rockets), 5-inch/54-caliber guns and torpedo tubes. She is further equipped with both search and missile guidance radar and long-range sonar to permit the most effective use of her armament.

Honeywell Will Build More Centaur Systems

A letter contract for eight additional inertial guidance systems for the Centaur space vehicle has been awarded to Minneapolis-Honeywell by General Dynamics/Astronautics. The contract, received by Honeywell's Aeronautical division facility in St. Petersburg, Fla., is expected to total about \$5 million over a 1½-year period.

Honeywell began developing the Centaur inertial guidance system under a \$5.4 million contract from General Dynamics in July 1959. The initial contract called for nine systems, four of which have been delivered, officials said.

Centaur, being developed for NASA, will be capable of placing a payload on the moon, or placing instrumented space research and communication satellites in precise orbits ranging from 300 to 22,000 miles.

INFLATABLE RADOMES

The Goodyear Tire & Rubber Company, Ohio, will build nearly \$750,000 worth of inflatable radomes for use by the Air Force and the Marines in two mobile tactical radar systems.

Designed by Westinghouse Electric Corporation, these radar systems featuring the "Paraballoon" air-supported antenna can be moved by helicopter to mountain tops or other remote locations for tactical advantage in surveillance and detection.

Contracts to build 24 radomes have been signed with the Electronics Division of Westinghouse, according to E. M. Eickmann, General Manager of Goodyear's Aviation Products division.

The domes, which resemble huge white basketballs, will protect the sensitive radar equipment from wind and weather damage. All radomes will be made from white hypalon rubber on nylon. Some of the units will be sectionalized and equipped with inflatable airlocks for entry and exit.

Bath Will Build Escort Research Ship

The Bath, Me., Iron Works Corporation will construct a \$10.2 million escort research ship (AGDE).

She will be an experimental surface vessel, 415 feet long with a beam of about 43 feet, intended to develop more effective equipment and tactics for surface ships similar to those developed for submarine ships by the experimental submarine Albacore. Significant advances in ASW surface ships are expected to result from experimental development carried out in the AGDE.

The ship will be fitted with the latest long-range sonar and anti-submarine weapons. Other weapons, devices, and equipment including propulsion systems may be installed or alterations may be developed as required to improve anti-submarine warfare capabilities in escort vessels.

The AGDE will be capable of conducting research tests in anti-submarine warfare operations with hunter-killer groups supporting amphibious forces or providing escort for military convoys. Initially the armament for the escort research ship will consist of a twin Tartar launcher, with ASROC capabilities, one 5"/38-caliber gun, anti-submarine torpedoes and anti-submarine helicopters.

New Pershing Contract

The Martin Company has received Army contracts totaling \$7.7 million for additional hardware and development of the Pershing missile.

The selective range artillery missile is in the development stage and has achieved a "highly-successful record" in test firings recently at Cape Canaveral, Fla.

New Atlantic Fleet

Chaplain Reports

Capt. Paul W. Dickman, ChC, USN, has relieved Capt. Merle M. Young, ChC, USN, as Fleet Chaplain on the staff of Admiral R. L. Dennison, Commander-in-Chief, U. S. Atlantic Fleet, and as Force Chaplain on the staff of RADM. D. W. Knoll, Commander Service Force, U. S. Atlantic Fleet.

Chaplain Young will report to the Headquarters of Commandant, Sixth Naval District, Charleston, S. C., filling the billet vacated by Chaplain Dickman as District Chaplain.

Chaplain and Mrs. Dickman, the former Miss Muriel M. Jones of Bexley, Ohio, will reside at 2617 Reynolds Drive, Bay-side, Va.

HEADS XIV Corps

Col. Leonard E. Wellendorf has been named Acting Corps Commander for the XIV United States Army Corps with headquarters at 1006 West Lake Street, Minneapolis, Minn. He will head the five-state unit until the arrival of Maj. Gen. Frank H. Britton in September.

Colonel and Mrs. Wellendorf and their three children—Julie 16, Andrea 7, and Brian 5—reside at 7244 18th Ave. South, Minneapolis 23, Minn.

B/G Chapman TAC To MATS

Col. Bingham T. Kleine has assumed command of the Tactical Air Command fighter training base at Luke AFB, Ariz., from Brig. Gen. James W. Chapman, Jr. Colonel Kleine's last previous assignment was as Chief, Air Force Section, Military Assistance Advisory Group in Italy.

General Chapman has been reassigned to Travis AFB, Calif., where he will command the 1501st Transport Wing, Heavy (MATS), as well as the base itself.

Benjamin Swig Elected

Mr. Benjamin H. Swig, Chairman of the Board, Fairmont Hotel, has been re-elected to a second term as President of the San Francisco Chapter, Association of the U. S. Army. Under his first year leadership membership of the Chapter has grown from some 400 to more than 1000 members.

Other officers elected are: 1st Vice President, Mr. Francis V. Keesling, Jr., 1st Vice President and General Counsel, West Coast Life Insurance Company, 605 Market Street, San Francisco; 2d Vice President, Mr. Chester Forsberg, Deputy Director of Administration, Hq. U.S. Army Transportation Terminal Command, Pacific, Ft. Mason, Calif.; 3d Vice President, Judge Carl H. Allen, Judge, Superior Court, City Hall, San Francisco; 4th Vice President, Mrs. Ambrose Diehl, Director, Department of State Reception Center, Federal Office Building, San Francisco; Treasurer, Mr. W. W. Denney, Vice President, United California Bank, 405 Montgomery Street, San Francisco, and Secretary, Col. Glenn L. Clinebell, Military Personnel Procurement Officer, Sixth Army, Presidio of San Francisco.

SecDef Goes To Army, Navy Secretaries, Not JCS, For Latest Study On Berlin

Rumblings of protest are being heard in military circles over the latest reported slighting of the Joint Chiefs of Staff, this time in connection with the formulation of new plans for meeting the renewed Soviet threats to Berlin.

Following a meeting 8 July with Secretary of State Rusk, Defense Secretary McNamara, and General Maxwell D. Taylor, newly-appointed Military Representative of the President, President Kennedy ordered a new survey of what measures may be taken to strengthen U. S. conventional forces during the coming six months.

On 11 July, after beginning of the new survey had been announced, Secretary McNamara is reported to have personally called Secretary of the Army Stahr and Air Force Secretary Zuckert to request new plans for meeting immediate threats to Berlin.

Senior members of the Army and Air Staffs worked through the night to prepare these new plans, which presumably would be submitted to President Kennedy as quickly as possible.

In the process of requesting the new plans Secretary McNamara reportedly bypassed his own military advisors, the JCS organization, who had submitted recommendations earlier and who were continuing to work on the problem.

The Army, which must bear a major share of the conventional forces build-up, told the Defense Department that it could on short notice deploy either the 82d or 101st Airborne Divisions overseas.

The 82d, commanded by Maj. Gen. Theodore J. Conway, is stationed at Ft. Bragg, N. C. New commander of the 101st, at Ft. Campbell, Ky., is Maj. Gen. Charles G. W. Rich.

Deployment of either of these STRAC divisions would require the strengthening of other stateside units and their inclusion into the quick-reaction STRAC forces.

Under such circumstances, one of the first divisions to be integrated into STRAC would be the 1st Infantry Division, "Big Red One," at Ft. Riley, Kans. This division is now under the acting command of Brig. Gen. William B. Kunzig. Its new commander, Maj. Gen. John F. Ruggles, is scheduled to take over 1 August.

Col. Wys Named DCofS Logistics Command

Col. Robert A. Wys will become Deputy Chief of Staff, Headquarters, Air Force Logistics Command on 1 August. He succeeds Col. J. E. Miller, who is being reassigned to Headquarters, Supreme Headquarters Allied Powers Europe (SHAPE), in Paris.

Colonel Wys has been Assistant for Inspection in the office of AFLC's Inspector General.

Col. Dwight H. Bridges has been assigned to Headquarters, Air Force Logistics Command Wright-Patterson AFB, Ohio, as Chief, Management Analysis Division, Office of the Comptroller. He replaces Col. Norman T. Kincade, who is being reassigned to Supreme Headquarters Allied Powers Europe (SHAPE).

Colonel Bridges goes to Logistics Command from Washington, D. C., where he has held several assignments with the Comptroller of the Air Force.

Col. Collins Ass't CO Medical Field School

Col. Glenn J. Collins has been named Assistant Commandant of the Medical Field Service School. He went to Brooke Army Medical Center from Fort Leonard Wood, Mo., where he was Commander of the U. S. Army Hospital and also Post Surgeon.

Colonel and Mrs. Collins have one son, Roger, a student of the University of Arkansas. They are living at 415 Dickman Road, Fort Sam Houston, Tex.

Overseas deployment of STRAC divisions would require a corresponding activation of organized Army National Guard and Reserve units.

At his press conference 11 July, Deputy Secretary of Defense Gilpatric stated that the Defense Department had made no specific recommendations to President Kennedy on means of bolstering quickly U. S. conventional war forces. He said, however, that calling up the Reserves is "one of a number (of possibilities) which would be included when we make our recommendations to the President."

Secretary Gilpatric said that the Defense Department's new survey "will cover all types of conventional forces, ground forces, naval forces, air forces, which might be utilized or deployed in connection with the world situation that we are in today. I am not limiting it to simply Western Europe. There are places all over the world where we may be asked to be in a position where we will have to take more military action than we have today."

In addition to the deployment of STRAC forces, the Army is considering a speeded-up timetable for reorganization of its combat divisions.

The reorganization would see a switch back to a triangular organization concept. Although scheduled to begin next year, plans are being considered to begin as early as this month in Europe and the Far East.

Navy officials have suggested a strengthening of the U. S. Sixth and Seventh Fleets in the Mediterranean and Far East, including the deployment of more Marines to those areas and increased air support.

The Air Force, in addition to recommending a stepped-up airborne alert for the Strategic Air Command, is also expected to propose the deployment of more tactical fighter support to possible areas of conflict.

During his press conference, Secretary Gilpatric also stated the possibility of increased short term purchases of ammunition and other necessary combat items.

Various DoD officials estimate that increased readiness to meet the Berlin threat may cost from \$3 to \$5 billion more than is budgeted for the present fiscal year. A large part of this—possibly over half—would go to the Army.

Preventive Dentistry Gets New Army Stress

Maj. Gen. Joseph L. Bernier, Chief of the Army Dental Corps, has arranged for the services of a group of highly placed civilian dentists to serve on an Army Medical Service Advisory Committee on Preventive Dentistry.

The General will serve as Chairman, with four other military members, and the following outstanding civilian dentists: Dr. John C. Brauer, Dean of the School of Dentistry, University of North Carolina; Dr. Hamilton B. C. Robinson, Dean of the School of Dentistry, University of Kansas City, Mo.; Dr. Joseph C. Muhler, Professor of Basic Sciences, Indiana University, and Dr. Irving Glickman, Professor of Peridontology, Tufts University School of Dental Medicine.

The Committee will meet quarterly. The new Advisory Committee is drawing up plans for a totally new concept of treatment recording. The present method of charting the mouth and listing individual operations performed will be gradually phased into the new system based on the total treatment plan concept. This will begin early in 1962.

In order to fully coordinate this new program, a Preventive Dentistry Division is being established within the Office of the Special Assistant for Dental Services to the Army Surgeon General. Through this mechanism implementation advice, technical procedures, and educational data will be disseminated. Col. Russell Sumnicht, DC, who has a Degree in Public Health Dentistry, will be brought to Washington from Brooke Army Medical Center to head the new division.

JOURNAL CLASSIFIED

For only 14 cents a word (\$1.40) minimum, you can reach a world-wide audience through the classified advertising columns of the "Spokesman of the Services."

The Journal is the only weekly publication which covers all the U. S. Armed Forces. This assures top caliber impact for your message.

WANTED

Retired physician from one of services as THE Doctor in Grand Lake Medical Clinic. Adequate office facilities furnished rent free first year. Inquire Box 307, Grand Lake, Colorado.

Shear-Forming Task Goes To Temco Unit

Temco Electronics & Missiles Company, Dallas, a division of Ling-Temco Electronics, Inc., has won a contract of undisclosed value from AFSC Aeronautical Systems Division, Dayton, Ohio, to determine the mechanical properties of materials made by an advanced metalworking process called shear-forming.

According to Frank Jacobs, jr., Materials and Process Group Engineer, Temco research engineers will spend 15 months conducting tests on 32 metal alloys shear-formed to a conical shape. Tests will provide such information as hardness, tensile strength, shear strength and microstructure of each shear-formed alloy.

Temco has been conducting its own research and development of shear-forming techniques for the past two years.

Shear-forming machines employ a rotating mandrel as a male die for the metal being shear-formed. As the metal rotates, a roller forces the metal against the mandrel. Pressure from the roller causes the metal to shear, or "flow", over the mandrel, duplicating the particular shape of the mandrel.

Goodyear Will Build X-15 Landing Gear Skids

A contract to supply new main landing gear skids—resembling wire brushes on skis—for the North American X-15 rocket plane has been awarded to Goodyear's Aviation Products Division at Akron.

Cutler, Kenneth C. CGD1 (p) to CASCO (duty).

Republic Opens New Materials Lab

A new half-million-dollar manufacturing research laboratory for developing "advanced and improved techniques" for the production of aerospace systems has been completed by Republic Aviation Corporation.

The company believes this new laboratory represents the largest installation of advanced research equipment of its kind in private industry. Equipment for example, includes such units as a \$75,000 one-of-a-kind 'TIG' (Tungsten Inert Gas) welder that makes possible the joining of many space-metal structures which cannot at present be joined by conventional methods.

Another unique welding apparatus in the facility uses a high-powered electron beam gun. The gun bombards the weld joint with a concentrated high-energy beam of fast-moving electrons to generate about 6,000 degrees F. of heat, permitting the joining of metals which heretofore could not be reliably welded.

Company spokesmen said the new laboratory is already working on a number of corporate studies as well as process development contracts from National Aeronautic and Space Administration and the Air Force. These studies involve such metals as molybdenum, columbium, tungsten and beryllium, in addition to the ceramics, plastics, super alloys and advanced titanium alloys.

Army Award To Aerojet

The Army has awarded a \$12 million contract to the Aerojet General Corporation to fabricate, install and checkout instrumentation for a solid propellant rocket motor test facility at the Huntsville, Ala., home of the Army Ordnance Missile Command.

YOUR WASHINGTON SPOKESMAN

When your rights and benefits are in jeopardy, who represents your interests as an officer? Who brings to the attention of Pentagon officials, Congress, the courts, the Comptroller General's office and even the President programs or policies which are not in YOUR best interests? The answer is—The JOURNAL.

For 98 years, The JOURNAL has been fighting for your interests, for your family's welfare and for a sound National Defense policy. The JOURNAL is dedicated to the cause of freedom through strength. The JOURNAL's voice is strong, effective and gets ACTION. Be the officer "in the know." Join the other selected JOURNAL subscribers today by taking out a personal subscription while this notice is before you.

INDUSTRY IN DEFENSE

Honeywell Value Engineering Seminar Foresees Savings In Electronic Systems

Projected savings of as much as 88.5 per cent in the cost of electronic system elements were reported by study groups at a value engineering seminar recently conducted by the Aeronautical division of Minneapolis-Honeywell.

Participating with Honeywell personnel were representatives of the Air Force, a number of large military prime contractors active in value engineering and 30 vendor firms serving Honeywell. The seminar was conducted for three days a week over a four-week period.

As a part of the seminar, production components and sub-systems were subjected to exhaustive study using value engineering techniques and projections made on savings that could be realized

through redesign, simplification, specification changes, improved materials and other methods.

"In every case, savings of 25 per cent or more were found to be possible and in one instance recommended changes could produce a saving of 88.5 per cent," according to Robert Crouse, Honeywell's value engineering manager, who directed the seminar.

Mr. Crouse reported that the components and systems studied were selected at random and included such equipment as an AC-DC power supply, a pressure-ratio transducer, a flight control system computer and a suspension system.

SPERRY GETS \$29.9 MILLION FOR SERGEANT

THE Army has awarded two contracts to the Sperry Rand Corporation totalling \$29.9 million for continued production of the Sergeant ballistic missile system.

An award for \$3.1 million went to Fruehauf Trailers to procure trailers and enclosures for the Sergeant system.

AF Awards \$96 Million In Contracts

The Air Force has awarded \$96.1 million in contracts to eight companies.

Lockheed Aircraft Corporation, Marietta, Ga., \$6.9 million for ground support equipment and spare parts for VC-140B jet transports.

Boeing Airplane Company, Seattle, \$23.1 million for production of C-135A jet transports for MATS.

Martin Company, Baltimore, \$6.1 million for R&D on the Dyna-Soar booster.

General Motors Corporation, Flint, Mich., \$40 million for production of components for bombing and navigation systems, at its Milwaukee plant.

General Dynamics Corporation, \$22

million for testing of the Atlas missile at its Astronautics Division in San Diego.

Radio Corporation of America, Camden, N. J., \$13.8 million for production of data link radio receiving sets.

General Electric Company, Syracuse, a definitive contract adding \$2.6 million to \$1.5 million originally awarded by letter contract making the total contract price \$4 million for production of 70 modification kits for height finding radar sets.

Continental Aviation and Engineering Corporation, Toledo, \$1.3 million for furnishing materials and data for J-69 jet engines.

GARRETT NAMES AEROSPACE MEDICAL CHIEF

Dr. James N. Waggoner has been appointed Aerospace Medical Director for The Garrett Corporation, Los Angeles. He had been Medical Director for Garrett's AiResearch Manufacturing Division and will continue to supervise AiResearch's employee medical facility.

Dr. Waggoner assisted in the development of the AiResearch environmental control system for NASA's Project Mercury manned satellite. Before joining AiResearch, he was Regional Medical Director for United Air Lines with offices at Los Angeles International Airport. He was one of nine recently elected a Fellow by the Aerospace Medical Association for his outstanding contribution to the aerospace medical field. The association's by-laws allow only 15 to be honored each year.

Dr. Waggoner is a member of the faculty at the University of California at Los Angeles and University of Southern California. He received his doctor of medicine degree from the Indiana University School of Medicine. He served ten years' duty with the Navy, including six active, and is the recipient of six battle citations.

L.A. Ordnance Dist. Has \$1.8 Billion Task

The Los Angeles Army Ordnance District, which buys defense systems from contractors in Southern California, Southern Nevada, Utah, Arizona, Texas and New Mexico, currently is administering \$1.8 billion worth of contracts. Disbursements run to almost \$300 million annually.

Some weapons in whole or part under the jurisdiction of this District include: Nike-Ajax, Redeye, Honest John, Sergeant, Jupiter, Lacrosse, Nike-Hercules, Mauler, Little John, Shillelagh, Pershing, FABMDS, Nike-Zeus, Hawk, Corporal, and Redstone.

The District administers 1,200 to 1,400 separate contracts. Approximately 350 new contracts are let and released each month.

Col. P. H. Scordas is District Commanding Officer.

Jet Star Certificate

Lockheed's Georgia Division has received a Federal Aviation Agency Class 1 Provisional Certificate on its C-140 Jet-Star.

More than 550 hours of flight time have been accumulated on production versions of the JetStar to date.

The company is well into its FAA certification program with five airplanes active in the flight program. Official FAA functional and reliability testing will begin around 10 July.

The four-engine, 550-mile-per-hour compact jet transport is slated to begin operations with the Air Force and with corporate fleets later this year.

The C-140 is designed to serve many military missions, including those of flying laboratory for checking Jet Age navigational aids at Air Force bases over the world; transport for high priority personnel and cargo; trainer, and test support.

People In Industry

Alva M. Hill has been named Manager of Gilfillan's Washington office, succeeding Roy Field who has been transferred to the company's Los Angeles offices after 10 years in the Washington area.

Mr. Hill, who has been with Gilfillan eight years, was in Navy electronics in World War II and during the Korean War.

Leo W. Killen has been named Assistant to John R. Moore, President of Autonetics, a division of North American Aviation, Inc. Before coming to Autonetics, Mr. Killen was Director of Sales, Director of European Operations, and Acting Executive Vice-President for Fairchild Engine and Airplane Corp.

A former Air Force colonel, he is holder of the Legion of Merit, the DFC, and the Air Medal.

Gerald C. Schutz has been named Vice President of Vitro Electronics, a division of Vitro Corporation of America. He will be in charge of engineering and sales activities for this precision electronics manufacturer, according to Dr. Donald M. Allison, Jr., President.

Mr. Schutz was formerly with Bendix Systems Division, Ann Arbor, Mich., where he held the position of Associate Technical Director.

William G. Johnson has been appointed Washington, D. C., representative of the Aerospace-Rockets Division of Bell Aerosystems Company. He began his career with Bell in 1951 as a helicopter production pilot. He later served the company as a contracts administrator and became a member of Bell's marketing staff in 1958. Mr. Johnson was a World War II RCAF pilot.

N. V. Petrou has been appointed General Manager of the Westinghouse Electric Corporation's Air Arm Division, Baltimore, it is announced by B. M. Brown, Vice President and General Manager of the Westinghouse Baltimore Divisions.

Mr. Petrou succeeds Dr. Patrick Conley, who was elected a Vice President for Industry Engineering Apparatus, Service and the newly created Industry Systems Department at East Pittsburgh, Pa.

Mr. Petrou served for four years in communications and radar work with the Army Signal Corps.

Charles R. Green has been appointed Chief Engineer of the Communications Laboratory in General Dynamics/Electronics' Military Products Division, Rochester, N. Y., it is announced by David Y. Keim, Division Director of Engineering.

Mr. Green comes to General Dynamics from the Admiral Corporation, Chicago, where he was Chief Engineer of the Communications and Countermeasures Branch. During WW II he served as a radio technician in the Coast Guard.

Stanley E. Benson has been appointed Manager of Long Range Planning in General Dynamics/Electronics' Marketing Division, Rochester, N. Y. He joined the company last year as Systems Staff Manager in the Military Products Division after service at the Pentagon with ARPA.

Armand G. Manson, Bell Aerosystems Company Assistant Director of Public Relations since 1957, has been appointed Assistant to President William G. Gisell.

Mr. Manson previously served the Navy as public information officer with the Naval Air Basic Training Command, Pensacola, Fla., and Naples, Italy.

Vincent P. Huggard has joined the Washington office of the Radio Corporation of America as Manager, Army Affairs, Defense Electronic Products, it is announced by Max Lehrer, Manager of the Washington DEP office.

With the exception of two years of service with the Air Force during WWII, Mr. Huggard had served in the Department of Defense since 1940. During this period, he held a wide range of positions and most recently served as Assistant Chief Deputy Chief of Staff for Logistics, U. S. Army.

In 1958, Mr. Huggard received the Exceptional Civilian Service Award, the

AF Orders \$5-Million In T-37Bs For MAP

Cessna Aircraft Company has received letter contracts totaling approximately \$5,000,000 from the Air Force for additional T-37B jet aircraft.

The new contract will extend production of the T-37 into mid-1963, according to Robert L. Lair, vice-president and general manager of Cessna's Military Division.

First deliveries on the new contracts will be made in February, 1962. Although he declined to name specific countries, Lair said the airplanes would be delivered to "several friendly foreign countries under the Military Assistance Program (MAP) to bolster their defense and training forces."

More than 600 T-37's have been delivered to the USAF's Air Training Command since the two-place, side-by-side, twin-jet trainer went into production. The T-37 has a top speed of more than 400 mph and a service ceiling of 40,000 feet. It is powered by two Continental J-69-T-25 engines, each generating 1,025 pounds of thrust.

Lockheed Installs "Space Chamber"

A 55-ton satellite "space chamber" designed to duplicate conditions 200 miles from the earth has been placed in position at the Sunnyvale plant of Lockheed Missiles and Space Co.

The stainless steel chamber will test Lockheed space vehicles.

Principal space craft to be tested in the \$1.6 million system will be Lockheed's Agena, which is used in the Air Force Discoverer (capsule recovery from orbit), and Midas (infrared early warning from orbit) satellite programs.

Vitro Gets Task At AF Missile Range

The Air Force Systems Command has awarded a \$7.4 million contract to Vitro Corporation of America for operation, maintenance and engineering of the Eglin Gulf Test Range in Florida.

The contract includes the extensive land test network located at Eglin AFB, a part of the Air Proving Ground Center. The 450-mile Eglin Gulf Test Range is the site of the development tests of medium- and short-range missiles, space probes and electronic countermeasures.

AF Vet Joins Sperry Utah Production Div.

Edward R. O'Hara has been appointed Assistant Production Manager for Sperry Utah Company, Division of Sperry Rand Corporation, it has been announced by Mr. C. D. O'Nofrio, acting division manager. Mr. O'Hara will have specific responsibility for the Purchasing, Production Control, and Divisional Planning operations.

During World War II, Mr. O'Hara spent three years in the Army Air Force, serving as a pilot with the 15th Air Force in Italy.

Army's highest award for civilian service. He is married and the father of six children and resides at Silver Spring, Md.

Appointment of John A. Duvall to the corporate public relations and advertising staff of Litton Industries is announced today by Crosby M. Kelly, Litton Vice President.

Mr. Duvall, a WW II Fifth Army veteran who has been an account supervisor with Charles Bowes Advertising, Inc., Los Angeles, specializing in electronic company accounts, will direct advertising activities and provide marketing assistance to Litton Systems, Inc., a division of Litton Industries.

Air Force Lists Criteria For Reserves To Be Considered For 20-Yr. Retirement

THE Air Force has listed the criteria for all Reserve officers, below the grade of general, who will be considered for retirement after 20 years' service under the FY63-1 20/10 program.

In the previous cycle, FY 63-1, the 20/10 board retained 1097 officers on active duty. There were originally 2293 officers eligible for consideration by the board, of whom 405 chose voluntary retirement before the board met. The board considered the remaining 1888, and selected 791 for retirement through September 1962.

Officers to be considered by the 63-2 board will include those with:

- TAFMSD between 1 July 1942 and 31 December 1942, inclusive, and TAF-CSD on or before 31 December 1952;

- TAFMSD before 1 July 1942 and a TAF-CSD between 1 July 1952 and 31 December 1952, inclusive.

Also to be considered by the 63-2 board are those Reservists who were omitted from previous cycles of the program.

The Air Force has requested major commanders to "categorize" Reserve officers in their command as follows:

"Category 1—Officers who should receive first priority for retention on active duty. Up to 20 per cent of the total eligibles may be placed in this category.

"Category 2—Officers who should receive second priority consideration for retention on active duty. Up to 50 per

cent of the officers remaining after Category 1 and volunteers are deducted may be placed in this category.

"Category 3—Remaining officers who do not intend to retire voluntarily.

"Category 4—Officers who intend to retire voluntarily.

"(Example: If a command has a total of 500 officers eligible, it may place 100 in Category 1 regardless of the number of volunteers. Eighty officers indicate they will retire voluntarily and are placed in Category 4. Of the remaining 320 officers, up to 160 may be placed in Category 2 and the remainder in Category 3.)

"The following criteria will be used in categorizing officers who do not intend to retire voluntarily: a. Essentiality to the unit mission; b. Possession of a critical skill; c. Manner of performance; d. Specialized knowledge of a particular project."

Headed For Hahn

The Interceptor Weapons School at Tyndall AFB, Fla., will lose its Commander, Lt. Col. James C. Covington is scheduled for assignment in Hahn, Germany.

Navy Tells Choices For Sub Training

The Navy has announced selection of officers for the class convening 25 September at the Submarine School, New London, Conn., and announced by dates of rank, those lieutenants (jg) and ensigns who are eligible to apply for the January 1962 class.

Applications for the course convening in January are desired from lieutenants (jg) whose date of rank is on or subsequent to 1 July 1959, and of ensigns whose date of rank is prior to 1 January 1961.

Applications should reach the Bureau of Naval Personnel not later than 1 September.

These are the selections for the September class.

Signal Corps Veteran Named

Motorola Communications and Electronics, Inc., has appointed Robert A. Wylie as Government Account Specialist in a 10-state Midwestern area with headquarters in Omaha. He served seven years in the Army Signal Corps.

Battle of New Orleans: American forces charge against the enemy during the closing phase of the Battle of New Orleans, during the War of 1812. The engraving is the work of H. B. Hall, an early nineteenth century artist.

...in the finest tradition of service

The fact that the treaty ending the War of 1812 had been signed did not diminish the glory that the defense of New Orleans, under Andrew Jackson, brought to the archives of American arms. There is no brighter page in the recorded history of men who gave the last full measure of devotion to freedom.

The men who founded Federal Services accepted the obligations of sharing a tradition of service to their country and their fellow servicemen. Both they and those who have followed in their footsteps have acknowledged this obligation by extending these finest traditions to the field of financing. Federal Services is wholly dedicated to serving those who serve the nation.

World-Wide Automobile Financing & Personal Financing for Officers and Top NCO's of the U.S. Armed Forces

Air Force's Senior School Selections Set For September; Official Criteria For 1962-3 Listed

AN Air Force board will meet in September to select Regular officers to attend the 1962-3 classes of the National War College, Industrial College of the Armed Forces, Imperial Defense College, and Canadian National Defense College.

Those selected will include 45 for ICAF, 34 for NWC, and one each for the CNDC and IDC.

Names of officers selected will be announced on or about 13 October, AF Headquarters said.

To be eligible for consideration, the Air Force says, officers must meet the following prerequisites. No waivers will be granted.

"a. **Grade:** Serving in the temporary grade of colonel.

"b. **Service:** Promotion list service

date of 1 September 1939 or later."

"c. **Prior Schooling:** Officers must not have attended the War College, Army War College, Naval War College, Armed Forces Staff College, an AFIT resident college course, or a course at a civilian institution in a PCS status within three years prior to class-starting date.

"d. **Component:** Regular Air Force.

"e. **Colonels Serving in the Washing-**

ton, D. C. Area: Colonels assigned to the Washington, D. C. area, as defined in AFM 35-11, prior to 1 September 1959 are eligible for consideration.

"f. **Colonels on 'Fixed Tours' in the Zone of Interior (Not in the Washington, D. C. Area):** Colonels assigned to ROTC, ANG, and Staff and Faculty duty will be considered if they are scheduled for completion of such tours during the pe-

riod of 1 May 1962 to 30 November 1962. Colonels assigned to the Deputy Inspector General for Inspection, Norton AFB, California and Kirtland AFB, New Mexico, will be considered if assigned to those activities on or before 1 September 1959.

"g. **Normal Tour of Duty in the Zone of Interior:** Colonels who will have completed a two-year tour of duty at one station in the Zone of Interior prior to 1 August 1962 will be considered.

"h. **Colonels on Overseas Tours:** Colonels forecast by their major air commands for return to the Zone of Interior during 1 May 1962 to 30 November 1962 and who meet the requirements of a, b, c, and d above will be considered."

TO CEDEC

Col. Ernest V. D. Murphy, formerly Senior Advisor to the 21st Republic of Korea Division, has assumed command of the newly activated 1st Experimental Regiment, the major troop unit of the U. S. Army Combat Development Experimentation Center, at Ft. Ord, Calif. The Regiment, first of its type to be organized in the Army, was previously commanded by Col. Claude L. Bowen, Jr., assigned to the XIX Army Corps, Ft. Chaffee, Ark, as Deputy Commander.

Colonel Murphy, his wife, Nonie, and their two children, Ernest age 13 and Peter aged 7—reside at 214 Salerno Road, Ft. Ord.

COL. ISHOY

Col. Victor A. Ishoy, former Director of Supply and Procurement, U. S. Army, Alaska Support Command, has been appointed temporary USARAL Quartermaster, replacing Col. John B. Baker, USA-Ret.

Colonel Ishoy lives with his wife, Lyla, and five children at Ft. Richardson. His oldest son, Kenneth, 21, will graduate from the U. S. Military Academy at West Point next year.

The colonel will hold his new position on 30 July, when he leaves Alaska for a position in the Office of the Quartermaster General, Washington, D. C.

New 10-place jet trainer

The Lockheed C-140 is a compact jet transport. It flies fast and high like jet fighters and interceptors — at just a fraction of their operating and maintenance cost. It can train an entire class of students for hours at a time, rather than one man for a few minutes. And students learn the fine art of operating radar and weapon control systems in tactical and strategic aircraft in a favorable environment, because the C-140's entire cabin is pressurized and air-conditioned. Students see the real thing on their radarscopes and instruments. The Lockheed C-140 also can stretch defense dollars when used for navigational aids checking, casualty evacuation, aerospace system flight testing, and for high priority cargo and passengers.
